The success that has attended the Association is not to be measured solely by the distribution annually of a large sum in premiums. The Association has been instrumental, in connection with the Board of Agriculture, in collecting a mass of thorough practical, and valuable information, which now appears in 'The Transactions of the Board of Agriculture of Upper Canada,' comprising three volumes, and inducing a zealous competition from all parts of the Province, and from some of the neighboring States, whereby the most improved machinery and labors saving implements, and descriptions of stock, which are not to be surpass-Association is not to be measured of stock, which are not to be surpassed on this Continent, are made available to the Canadian farmer.

of Agriculture, it was decided to erect an Agricultural Museum in Toronto. The building is to be proceeded with at constant and the constant a reeded with at once, and will be completed in the early part of next year. The Agriculturist will then have a repository where samples of the various products of our country can at all times be viewed—an object of interest and importance not only to the Canadian farmer but to

foreigners and intending settlers.

The office of the Board of Agriculture is to be placed in the building, and a portion of it is to be occupied by Mr. James Fleming, the enter-prising and reliable seedsman of the Association.

The Association has exercised a strong influence in aiding this success and prominence.

. It is much to be regretted that no provision has been made for the representation of Canada at the World's Exhibition of 1862, to be held in London. An earnest appeal should immediately be made to the Government. The advantageous position occupied by Canada at the former Exhibitions of 1851 and 1855 advanced her reputation and interests. The Provinces of New Brunswick and Nova Scotia, and even the Islands of Prince Edward and Vancouver have taken the requisite steps to be represented; surely Canada will not be less emulous,

In addition to our Agricultural products and the valuable timber in our forest, our mineral resources will eventually become a great source of wealth to Canada.

M. Dufrenoy, Member of the Institute of France, and Inspector General of mines in that country, thus alluded to the collection of minerals at the Great Exhibition of 1851, made by our talented Provincial Ge-

Gentlemen of the Provincial Agricultural Association:
In accordance with the usual custom adopted by the former Presidents of the Association, I now proceed to address you.

the object of every farmer to endeavour to produce 'two blades of grass where only one grew before.' We fear that in many instances our system of farming in Canada has been the reverse of this. We have cropped our land under the supposition that its fertility and productiveness were inexhaustible.

dents of the Association, I now proceed to address you.

The gentlemen who have heretofore so ably filled the Presidency have so well treated the different subjects that come within the scope of an Address, that little is left for me to allude to, but what is trite to my brother farmers. A slight retrospect, however, of the benefits conferred on the farmers of Canada by this Association may not be deemed out of place upon the present occasion.

The Agricultural Association of Upper Canada, which was organised in 1846, has steadily advanced in prosperity and usefulness. In that year the sum of £220 only was awarded in Premiums—at the last Exhibition the Premiums had been to our wheat crops by that little emissary, the 'midge,' to be a great disappointment and loss; but that injury will prove eventually a blessing, by compelling us to improve the system of farming, and by adopting the 'mixed husbandry' which has proved so advantageous and profitable in the mother country. The breeding of horses, cuttle, sheep and pigs, (for which there is such a demand from the neighboring States) and the fattening of stock on green corps will rapidly renovate our overworked lands.

The Agricultural census, recently taken, will record the change of system which the Canadian farmer is now adopting,—fields containing more agreement of the containing more proved so advantageous and profitable in the mother country. The breeding of horses, cuttle, sheep and pigs, (for which there is such a demand from the neighboring States) and the fattening of stock on green corps will rapidly renovate our overworked lands.

Great improvements have been recently made in many parts of the country in the construction of barn and farm-buildings, and for housing and feeding of stock and securing root crops. Many of these are mo-dels of good arrangement, and are constructed in a most substantial manner, at a cost, in many instances, which would have been considered a few years ago, when the cultivation

MESSRS. TACKABURY, BROS. AND CO. of LONDON, C.W., Are about to publish a large, full and complete Topographical County Township MAP of CANADA WEST. This Map is being prepared from full and complete surveys of the Province, thirteen Counties of which are already completed or in progress, and will show Upper Canada with far greater minuteness of detail than any work of the kind heretofore attempted. The Map will be drawn on the scale of six miles to the inch, and will show each County divided into Townships, and will show each County divided into Townships, and will show each County divided into Townships, and in each Township the concessions and lots will be shown with their respective numbers. All roads will be shown, and those which are travelled will be distinguished from surveyed roads which are not opened. Particular attention will be given to main, gravel, plank or macadamised roads. The location of all towns and villages will be shown, and those which have post-offices will be designated from those which have not. All the rivers, lakes and hills will be shown, with the general topography of the country. The various Railroad lines will be a prominent feature of their Map, and each depot and station will be carefully shown. Prominence will be given to the cities and principal nence will be given to the cities and principal towns by an enlarged plan of each, in the margin

of the Map.

There will also be zoological and meterological

Maps, as well as a Time-Table, Table of Distances,
and the general statistics of the Province as shown by the new census, also a business directory of the LINDSAY. eities and principal towns.

The size of the Map will be 64 inches square, will be handsomely engraved on copper, beautifully colored and mounted, and finished in the highest style of art; will be furnished to subscribers at six dollars per copy—while other works of a similar style sell at ten dollars.—Agents are now canvassing for subscribers in those parts of the Province not already canvassed, and all will be called upon in due time.

13 The public is cautioned to beware of imposition, as parties are endeavouring to obtain subscribers for a map which purports to be similar, but it is only intended to be lithograph map, which can in no way compare with a Copper-plate Engraving.
