

Odds and Ends.

Why does a cabman think it a fine day when it rains hard?—Because he considers it fare-weather.

Farmers' Column.

CURE FOR BEES.—Of applications for a barn, we believe that there are none equal to a simple covering of common wheat flour.

SIMPLE RECIPES FOR MAKING VINEGAR.—B. Miller of Clayton, Ind., has communicated to the Farmers' Club the following simple recipe for making vinegar.

WINTERING BEES.—To winter bees successfully in our cold Northern climate is a question of great moment with every apiarist.

A French author says: "When I lost my wife, every family in the town offered me another; but when I lost my horse, no one offered to make him good."

A DIFFICULTY.—"You have only yourself to please," said a married man to an old bachelor.

Somebody, who writes more truthfully than poetically, says: "An angel without money is not thought so much of now-a-days as a devil with a bag full of guineas."

"What dogs are these?" inquired a gentleman of a lad, who was drawing a couple of terriers along.

A new feature has thus been introduced at balls and parties in Paris. The supper is not served on one long table, as usual, but on little tables, at which presides a lady of the company.

Whiskey is now tested by the distance a man can walk after tasting it. The new kind called "Tangleleg" is said to be made of diluted alcohol, nitric acid, pepper and tobacco, and will upset a man at a distance of 400 yards from the demijohn.

"Biddy" said the landlady of a boarding-house to a new recruit in the kitchen, "did you bake the bread we had for dinner, or boil it?"

Two young ladies were promenading the street recently when one of them slipped and came down on the icy pavement.

ARITHMETICAL PUZZLE.—If four dogs with sixteen legs, can catch twenty-nine rabbits with eighty seven legs, in forty-four minutes, how many legs must the same rabbits have to get away from eight dogs with thirty-two legs, in seven-leap minutes and a half.
