PROSPECTUS Scottish American Journal A First-Class Family Newspaper ! Devoted to the Dissemination of Scottish Literature and News

The July Number commences the Twelfth Volume of the Atlantic Monthly, and will contain such a list of contents as will entitle it to marked consideration. Nathaniel Hawthorne contributes for the first number of the new volume "Outside glimpses of English Poverty." one of the most interesting of his admirable English Sketches. Oliver Wendell Holmes has written for it "The Doings of a Sun-Beam." Robert Dale Owen discusses "The Claims of Labor or Service," and presents some new views for the study of the people of America. Gail Hamilton continues her popular "Gala-Days." Professor Agassiz offers another eloquent paper on Mountains. And many other articles, of equal value with the above, will be included in the forthcoming number.

weekly, a summary of general intelligence from England, Ireland, other parts of the world. Begun in 1857, the Atlantic Monthly has now reached its sixty-eighth number. Its circulation, increasing largely from the start, has given it such a currency throughout the country as no other American magazine has ever acquired. Its faith in impartial laberty as a principle, and its warfare against Despotism in every form, have made it a welcome visitor, far and wide, every month. It does not abate, in these our days of trial and battle, one jot of that firm belief in the brighter days to come which Right and Justice are sure always to win, but its future pages will show an increased activity in placing before the minds of the people an unfaltering confidence in the power of the North to limit the existence of a rebellion founded in cruel injustice and oppression.

England, Ireland, other parts of the world.

A distinguishing feature of the Scottish American Journal is its regular republication, verhatim et literatim, of the "leading articles" of the prominent British newspapers and other periodicals upon the most important topics of the day. This feature is a unique one, and has been found very acceptable to the people of the United States and British North America, and supplies a long needed disideratum on the American Continent.
