e, a larger profit could not be realized from the poultry, if the houses were constructed upon a different plan, and one which would admit of making the hens comfortable by artificial heat. In a tight, but well ventilated house, in a sheltered ferent plan, and one which would admit of making the hens comfortable by artificial heat. In a tight, but well ventilated house, in a sheltered location, having a cellar three or four feet below the surface, and windows facing the east end south, there will be few days in winter in which will be few days in winter in which the temperature at the bottom will be much below the freezing point. If provided with a chimney and a - CHIEF JUSTICE TANEY .- The edi-

There are few farmers who pay any aftention to the care of their nor other outhouse is considered quite good enough for them; and as by the ordinary mode of treatment they are a source of little or no profit, but few fowls are kept through the winter. Many thousands are killed for the table every year, just as they have attained to such age and condition as would, if rightly managed, enable the owner to realize the actual cash value of the fowls would be worth even more in the saving than in the fall. In the fowls would be worth even more in the spring, than in the fall. In fatal diseases arising from overwork estimating the profits of fowls, the in the spring, than in the fall. In estimating the profits of fowls, the manure is no inconsiderable item, view of this subject, and pay a little more attention to this method of increasing the products and profits of the farm. Large sums of money are annually expended upon graperies and grapehouses, with a view to and the labouring heart, trying to make a profit from the productions keep up against its wearines-, sucof exotic fruits and plants. But at cumbs; and so the overworked the usual price of fresh eggs in win- smith, boatman, or woodheaver falls ter, and early chickens in spring, suddenly, not more honoured than we have seen but few greenhouses the prize fighter of to-day, or the that would yield so large a return for the investment and labor, as if well stocked with fowls of that breed, ardson. carefully tended by a skilful or comnetent woman or child.

eess, and we can see no reason why they should not produce the same results here, where the supply of eggs in winter is never equal to the demand, and where spring chickens will bring double the price per pound that fowls of the same age and weight will command in the fall .-

Such experiments have been tried

in France with most abundant suc-
