LINDSAY, FRIDAY, MAY 25TH, 1866.

The Queen's Birth-day.

In order to give every one connected with the office a holiday to-morrow, we go to press a day earlier than usual. We are, therefore, compelled to leave over a number of advertisements until next issue, and have to ask the forbearence of cur patrons.

No formal manner for celebrating the day has been decided upon by the people of Lindsay; but as usual the shops and other places of business will be closed, and the day of our beloved Queen, as is their wont. in a becoming and loyal manner.

of the Town Council, several of the County Officials, and others, will leave by the morning train, for Cobourg, to take part in the reception of the Mayor and Corporation of Rochester, who will arrive in that Town during the day, per Steamer Corinthian. This is but right, bearing in mind the handsome manner in which our representatives were treated by the people of Rochester. when over there last summer. A good time is anticipated.

The Fenian Swindle.

When rogues fall out,' we are told 'hon_ est men will come by their dues.' The Fenian leaders-swindlers and rogues are in a state of chronic warfare. O'Mahony is deposed, Killian is sacked, Sweeney the fighting Sweeney-is yelling like a whipped spaniel, while Head Centre Stephens is master of the situation. Meanwhile the the Fenian treasury has been robbed by its chiefs, and chaos reigns!' A pretty picture truely. But the confiding Irish-Americans are not yet sucked quite dry of their hard-earned dollars, and Head Centre Stephens is about to employ his leisure in a peripatetic tour to raise the wind! The latest news from the Finnigans is telegraphed as

New York, May 18 .- Mr. Stephens is expected to start on his tour through the States on Monday next. A secret council sat yesterday to make arrangements for his route. The Herald has stated that Sweeney has said recently that he was satisfied Stephens was nothing more than a British spy, and that he was allowed to escape from prison by the British authorities for the sole purpose of visiting this country | with three other car loads of cattle belonging in their interests. Stephens continues to re-ceive large numbers of visitors. He is so courteous to all who call on him, that he is winning many of the Roberts-Sweeney faction over to his side. He receives messages from circles all over the land endorsing, his action, among others one from San Francisco, urging union of factions. Mr. Step- Town. This Lecture was given as preparatory the court house on garnishee order. Also that brings it within the reach of all. hens last night forwarded a letter to the circles in Washington City, in which he opens hostilites upon the opposing factions. He admits they have power, but it is power for evil to the cause.'

The Duty on Cattle.

The Bill passed by Congress providing that there shall be levied, collected and paid on all horses, mules, cattle, sheep, hogs and other live animals, imported into the United States from foreign countries, a duty of twenty per in aid of the Clergy Reserve or Sustentation beat 75. Moved by Mr. Clarke, seconded gentum ad valorem, has been approved of by Fund of the Presbyterian Church in Canada. President Johnson and is now in force. It contains a proviso to the effect that any such animals now bona fide owned by resident citizens of the United States, and now in any of the provinces of British North America, may be imported into the United States free of duty until the 27th of May.

The Detroit and Buffalo journals contain the following official announcement:

WASHINGTON, May 18. Collect twenty per cent duty ad valorem critish Provinces now ow sens, exempt until the 27th inst.
H. McCunnoen,

quested to intimate that a meeting for the inhabitant. In addition to this there were purpose of organizing a Literary Society 45,000,000 pounds of butter; 5,500,000 of will be held above T. Foley & Co's. Hard- wool, and 30,000'000 lbs. of beel. Besides suddenly in the Parliament House, Ottawa, wate shop, next Friday evening at 8 o'clock. these there were 1,7000,000 tons of har, and building. with each other. 3,000,000 bushels of corn. A fall attendance is discrable.

LECTURE.-The Rev. John Vicars, B. A., of Lindsey, is announced to deliver a Lecture on Electricity, in the school House here, on next

Friday evening at eight o'clock.

Onsuss Station.—A good deal of b considering the cise of the place, is done in the forwarding way at this point. The Flouring and Grist Mills, belonging to Wm. Cottingham, Esq., create a good deal of trade; and there are at the station just now, waiting shipment for the Albany market, 200,000 feet of excellent lumber and 200,000 shingles We are glad to notice that the prices obtained for both the above articles are remunerative to our Canadian

OMEMER TANNERY .- This establishment, we are pleased to notice, has been lately much improved in its facilities for doing work with greater dispatch. Not long ago the enterprising proprietor replaced the old motive power by a superior engine and boiler, and has since added a powerful rolling machine, by means of which he has been enabled to place in the market a quantity of leather creditable to the manufacturing energies of our County. Mr Lamb appears to be fully up to the times, and deserves much credit for the energy which he is exhibiting.

MAGISTRATE'S COURT .- A case of tresspass of a peculiar kind was brought before our magistrates on Saturday last. It appears that the third concession line of Emily makes a short curve around the base of hill opposite Lot 12 or 13, in order to avoid the steep ascent. Upon the space within this curve, a Mr. Turner, some time ago, erected a dwelling ; and having afterwards obtained some permission to remain there, he fenced a part of it, planted it with trees; and otherwise improved it. This season he has it under wheat and has been very much annoyed by parties throwing down his fences to allow cattle to injure his crop. Suspecting some of his neighbors, he procured a summons against Mr. Mitchell, and the case having been heard, Mr. Mitchell was fined one shilling, and an arrangement made by which the costs were divided, and by which Mr. Turner has agreed to remove his property from the road allowance within three years.

To CORRESPONDENTS .- "Publicola" and W. Thorphill. Communications will appear n next issue.

PEEL STREET CHURCH .- Mr. Fraser, of Knox Sabbath, at 11 o'clock, a.m.

We see by the papers there had been another brutal attempt to assassinate a Dublin police officer. It was not successful, altho the man was not out of danger. Two men were arrested for the outrage.

ce, but also the largest linen manufactory.

An address was recently carried in the tennant Governor Musgrave to cause enquiry to be made into the best means of extending

THE WEATHER .- So far we have had remarkably cold weather for this season of the year. On Wednesday Lindsay and neighborhood was visited by a slight shower of snow; and the continuance for several days, of cold northern winds makes it extremely disagreable to those who, in anticipation of fine warm weather, donned their summer garments.

The Nor'- Wester, alluding to the stories some time since circulated in Canadian papers about gold having been found in large quantities near Fort Garry, says they were originated probably be some relative of Barou Munchausen, and adds: -" There is no gold in the settlement except that which rewards the tiller of the soil and the enterprising trader."

CATTLE FOR THE AMERICAN MARKET .-Messrs. Denoon & Brownridge, of Halton, says the Hamilton Times, purchased on Wednesday from John White, Esq., M. P. eighteen head of very fine young cattle, 23,-090 lbs., for \$1,414,26, which were immediately shipped for Suspension Bridge, along

above subject was delivered by the Rev. John for the present year. Also to G. Martindale Lecture Room of the Union School in this so to J Hodgson for \$2.50, for attending at current literature, and is offered at a price to a course on the same subject, and included explanations of the principal terms used in the J. Cullis \$6 S, Dundas \$6, and J. Clarke science, and of the construction and use of the interesting and amusing experiments. There was an attendance of about one hundred.

ST. ANDREW'S CHURCH. - We have been requested to say that, on Sabbath evening first, the 27th inst., at 6.30, the Rev. J. B. Muir, B.A., will (D. V.) deliver a lecture in the above King and others, praying this council to ap-Church, when a special collection will be taken point James, Profit, Sen., Pathmaster for Subject of Lecture, "Intellect and Conscience," or the rise, greatness, permanency, and fall of nations, from the stand point of Christian Philosophy. The Story of a Settler in Victoria County.

We find in the Canada Emigration Gazzette, a new publication issued at Que-bec, by the Bureau of Agriculture, for cir-culation in Europe, the following interesting culation in Europe, the following interesting letter from the wife of a settler in Macaulay,

DEAR SIR,-I received the Emigration Gazette, and return you my sincere thanks. tion required. In reply to your request, I shall be glad to give you as much information as I can in regardto bush life. I take a great interest in the welfare of Canada, but more especially in the Muskoka Settlement. I am afraid my information will not be much. as we have had but short experience, it being only three years and two months since we came here. Our farm consists of 200 acres, fully a mile and a half from the Muskoka Falls. The soil is good, and well watered with beautiful creeks. We commenced with small means, and a small stock of cattle, the latter being only one cow and a few hens. Our grain crops did not do much the first year, as they were rather late being put in, but the potatoes returned seventeen bushels from one. Our wheat the second year gave a splendid crop, both in quantity and quality; we got one dollar per bushel for what we sold of it. We do not know what return we had, as there was no grist mill, and, as we did not expect we could sell it, we gave a good deal of it to the pigs. Although the season was particularly dry we had an average crop of everything. Last year we had splendid crops of every-

cellent quality. I may also state that we have been only twelve days in the three years without potatoes. Me commenced to and we used them constantly from the 20th of July. We sowed five bushels of wheat: I cannot tell how much we got from it, but we have sufficient seed, and flour enough to support five of a family. We have used our own flour since the 10th of November. raised a great deal of fine turnips, but I cannot give the exact amount of anything except the potatoes . but I will mention the number of stock we have wintered, and people had resolved to suspend the band charter can judge for themselves. We have eight head of cattle, viz., three milk cows, two young oxen, fit for the yoke; one heifer, one two-year old bull, one calf and six sheep; we also feed two pigs, all brought through in good condition, fresh and full of sport; they get turnips every day since the 1st October, and have sufficient to give them till the grass comes. We have a good deal more fodder, both straw and hay, than we will use. We have between two and three tons of good timothy hay ; we can get more beaver meadow than we can find time to cut it. We could sell all our fodder, but we do not approve of that system; the hay will the benefit of which to them cannot be over keep over a year, and we will get pienty of estimated. If unity of feeling on so importuse for the straw. Our oats, peas, and Indian corn were all good. Besides these we ments, along with perseverence, their efforts raised a great deal of garden roots, such as would be crowned with success; and surely carrots, onions, beets, parsnips, chickory, &c. | enough patriotism exists among them to take the old country. Besides these we raise our of what would be a boon to the whole County, ound. We also raised 12 lbs. of carraway seed, and the most part of our garden seed, turnip seed, &c. We sowed a small parcel of flax seed, and think it will do very well here. We manufactured it into ropes and binding for our own use; we intend to sow as we have increased our stock. We killed a cow and a sheep last fall; we sold the most of them; they paid very well. Imake my own soap and candles. I also raised 52 chickens from 4 hens last spring Now, this is a faithful account of the most

of our last year's produce, and it can easily be seen by every careful reader that we are now beginning to enjoy the fruit of our labor. We calculate that we have about fifteen thing else, but the chopping is too heavy for him. I may also state that my husband has Beauchamp's Little Plans. W. C. Chewitt earned some money to carry us on. He al-March, so that the chopping was never done till after the middle of March; and as we had no oxen, we thought it better to to do that "EVERY SATURDAY."-Boston, Tickner & than to chop more than we could properly cultivate, for you must understand it has been all wrought by hand labour. We have had no help from man nor oxen : nothing but ourselves, the hoe, the axe, and the spade. I must add that it is well wrought, for we are convinced that it pays all the labour expended upon it. We sometimes try experiments. such as hoeing one place and not another ; service the ablest, wisest, and wittiest of the crops very soon make it known that labour is profitable. We find that the land here is capable of raising any kind of crop that is needed.

Now, in regard to bush life in general, there are a great deal of difficulties to en-The selections in the numbers already courter at first especially those with small and many other inconveniences; besiles, than counterbalance the hard-hips; and although the labor is hard, we labor in hope of itate to say that bash life is very interesting to people of energetic minds; and I am sure that the generality of working men at home have to labor as hard, if not harder, than the poor settler has to do here : and the settler has a hope which the working man in the mother country knows nothing of-he toits for an independent living, and a home for himself and children, whilst the latter drags out his existence with no other prospect than of becoming a parish rauper, or a burden on his struggling family.

A few words in reference to this settlement. I think no one need be afraid to come Saturday." It is published by Tacknor & Here, as there is plenty of of good land to be got; likewise the roads are good. The want foreigness. The ship "John Bright" sailed of a market need to be no obstacle, as with 749 pas engers to New York, nearly all there is always a demand for everything that people can raise. We have here (within a mile and-a-half) three stores, one tavern, one grist-mill, one lumber-mill, a post-office, penters. There is no doubt of the settlement being in a fair way for prosperity. The ra- of March in the present year 12,491. pid progress it has made has quite astonished its own inhabitants.

MARION TAIT. P. S.-I shall be happy to satisfy any inquities. Address, Bracebridge P. Office, It has been decided, the Ottawa Post says, to offer the public lands on the Manitoulin Island for sale. We understand that actual

MANUFACTRES FOR LINDSAY

To the Editor of the Canadian Post : DEAR SIR-Lindsay has been often spoken action gives a complete refutation to the former—and it is to be hoped that some

action will be taken on the subject of this letter, giving a flat denial to the latter. Very few thought, and fewer would have pelieved, that so much surplus capital was ying dormant in the Town; but the petroeum excitement was so fascinating as to dazzle and captivate, by glowing reports of Fortunes being made so easily, that fourteen thousand dollars was subscribed munificently, and directed with energy to be sent to that region on speculation, whilst as large a field for enterprise, and a more philantropic and profitable investment existed at home.

Had the same combined effort been exercised towards the establishment of a Woollen Factory, as has been done in this foreign project, universal blessings would have been liffused through the Town and Countyprosperity would have been maintained, and the money so invested would return directly and indirectly to their coffers again, and those men would be esteemed benefactors to their species, and hold a permanent place in the gratitude of the people.

It must be obvious to every observing mind that the great desideratum we labor under is the want of manufactures, and that while almost every County Town in Upper Canada is progressing in material wealth Lindsay is at a stand-still, or rather retrograding. The population is fast decreasing; mechanics and laboring men are necessitated We planted ten bushels of potatoes, to leave, for want of employment : and and from that we raised 240 bushels, of exalthough the merchants must see and feel the effects, no exertions are made to stimulate action in so laudable an enterprise-no anxiety is manifested to secure the sources plant them last year on the 28th of May, of creating wealth and giving employment to hundreds.

If the mercantile gentlemen and property holders of the Town were alive to their own interests, a meeting would be held and plans devised to afford a handsome inducement to plactical men, or others who are or might he desirous of starting those branches of business, of which we are deficient. But, alas, on this point comprehension is dull; or, perhaps, indifferent to public progress. The Town and County wants a Woollen Faciery-we want another Grist Mill-we are in want of another Foundry and Machine Shop, for making all kinds of agricultural implements-and last, though not least, we want a Scutching Mill, for the encouragement of the Flax trade. Had those branches been in full operation last year, or partly so, our late redundant population would not have been necessitated to go to a foreign country to seek that sustenance which is denied them in the land of their adoption. It is surprising that so much anathy and

indifference should be manifested towards mechanical operations by our public men, ant an object, would characterize their movethese were superior to any we ever raised in the initiative steps for the accomplishment

the ball kept rolling till one or all of the above branches of business are established, is the wish of Yours respectfully, MECHANIC.

NEWS FROM JAMAICA.

New York, May 17 .- Advices from Jamaica to the 7th instant are received. Intelligence has been received in private communications from England that Henry Storks would be confirmed as Governor of Jamaca, in the room of ex-Gevernor Eyre, who would be immediately recalled. Col. Hobbs, the officer who commanded the forces sent ont against the blacks during the late disturbinces, and at whose orders some of the most horrible atrocities committed by the soldiery upon the negroes were perpetrated, has committed. He had lately become seriously deranged in mind, and i was thought advisable that he should return to England. He left Jamaica in the English steamer on the 21st ultimo, in the custody of an officer and two soldiers, but on the day after the vessel sailed, while walking on deck attended by one of the soldiers, he suddenly struck down the man, jumped overboard and

was drowned. Mrs. Gordon, the widow of Geo. Gordon, visits England in response to an invitation from the Anti-Slavery Society of the Jamaica Committee. Strange to say, she was a passenger in the same steamer with Col. Hobbs, when he jumped overboard.

The partisans of Gov. Eyre, who believed that he rendered great service to the Colony in causing hundreds of innocent blacks to be butchered, are doing all they can to raise money in order to present him with a testimonial in acknowled rement of those services. Notwithstanding their efforts, in only three parishes have arrangements been made for holding meetings in furtherance of their ob-

Ex-Gov. Eyre is reported to be in very bad health, completely prostrated both in

EMIGRATION FROM LIVERPOOL.

tion officer at this port show that the number of persons who left this port during the last month was, under the act, 18,452-namely, 399 cabin and 18,053 steerage passengers. To the United States there were 34 ships, with 16,317 steerage and cabin passengers, of whom 3950 were English, 386 Scotch, 9267 Irish, and 2834 belonging to other countries; to Canada 2 ships, 791 steerage and 60 cabin, of whom 316 were English, 178 Irish, and 297 foreigners; Nova Scotia, 1 ship, carrying 366 steerage and 1 cabin, and of those there were 165 English, 44 Septeh, and 57 Irish; to Victoria, 2 ships with 679 steerage and 6 cabin; there being 242 English, 21 Scotch, 400 Irish, and 16 with 749 pas-engers to New York, nearly all of them being Mormons prodeeding to Salt ships there sailed 883 passengers, making a blacksmith, a tailor, a shoemaker and car- a total for the month of last year the number of emigrants was 11,800, and for the mouth

CROWN LANDS ON THE MANITOU-

It has been decided, the Ottawa Post says, Island for sale. We understand that actual settlers will be charged 50c. per acre, while \$1.00 will be the price of the mineral and oil lands as the Government may choose to dispose of, according to the fifth clause of the Regulations just published by the Crown ing the summer.

Another attempt to cross the Atlantic in and Prince Edward Island, with a view to perfecting these arrangements, which will months has been at the rate of 14 000 per M. Hudson of New York. His craft is a loubtless prove a great facility to merchants month. It is estimated teat the Irish pop- metallic life boat, 27 feet long and 6 wide, in the different Provinces who are now en- ulation decreased further last year to the to be full ship rigged. A fine collection of specimens of Canadian timber has been made at the suggestion of Dr. Tache, Secretary of the Bureau of Agriculture. They are intended to be sent to Paris, and are now on exhibition in

THE LAST PRIPHECY .- A book has just appeared in London, England, under the title of "Louis Napoleon, the destined Monarch of the World," &c., by the Rev. M. Baxter makes the end of the world come in 1873; but for six or seven years previous, Louis Napoleon, the real Anti-christ, is to become substantially sole monarch of the work!. But, after making a covenant with the Jews for the rebuilding of Jerusalem, he is to begin the persecution of Christians, which answers to the pouring out of the vials. The time of "the ascension of one hundred and torty-four thousand wise virgins " is duly fixed, and also of the Battle of Armageddon, when the "great beast" (Louis Napoleon) is to be overthrown. It is said that twelve thousand copies of this curious and absurd book have already been sold.

THE ENGLISH BUDGET .- On the 3rd inst. the Chancellor of the Exchequer brought forward his Financial statement for the year, In includes a proposal for the gradual extinction of the national debt. The Budget for this year is comparatively modest and unpretending in its scope. For three years past it has been Mr. Gladstone's duty to dispose of a surplus of from three millions to hree millions and a half. This year the surplus in but a nett amount of £1,350,000. The actual expenditure of the last financial year was a triffe less than estimate; and the total amount was a decrease of £2,000,000 compared with the year 1859-60, but an increase of £2,100,000, campared with 1858-19 That is to say, the annual cost of the military and naval services is again slightly on the decline from that increace which began in 1859-60. Fortifications have had something to do with arresting this slow and gradual decline, which, so far as it goes, is a satisfactory symptom, but can hardly be said to go as far a might be reasonably desired. More re-assuring is the comparison of the estimated with the actual revenge of the past year, showing a surplus of £1,420,000 and a surplus, moreover, through all the principle branches of revenue-Customs, Excise, Stamps, and Income-tax.
