THE HIGHLANDER'S PRAYER.

A Scottish Highlander, who served in the first disastrous war with the American colonies, was brought one evening before his commanding officer, charged with the capital offence of being in communication with the enemy. There was, however, no direct proof against the Highlander. He had been seen in the grey twilight, stealing out from a clump of underwood that bordered on one of the huge forests which, at that period, covered by much the greater part of the United Provinces, and which, in the immediate vicinity of the British, swarmed with the troops of Washington. All the rest was mere inference and conjecture. The poor man's defence was summed up in a tew words. He had stolen away from his fellows, he said, to spend an hour in private

MEDICAL USES OF ICE.

To a person burning up with internal fever, is a comfort beyond expression. Swallowing ice freely in small lumps is the chief treatment in inflammation of the

The constant application of ice, pounded fine, and enveloping the head with it by means of a cushion or other contrivance, is the most reliable remedy for that very dangerous malady, inflamation of the brain, which so often sends its victim to the grave in a few days, or to that living death, the mad house.

In all inflammations, whether internal or external, ice diminishes rapidly the size of the blood-vessels, and thus relieves the pain they give when thus swollen by their pressing against the nerves which are already in the neighborhood of the arteries of the system.

Dip heria, and some of the worst of other forms of sore throat, has been arrested in a very short time by pounding a piece of ice in a bag, then laying the head back, take the lumps and swallow them continually until relieved, allowing them to remain in the throat as long as possible, there to melt.

All forms of diarhoea and dysentery, where there is great thirst, the gratification of which by drinking any liquid increases the malady, are promptly controlled, and in many cases perfectly cured, by simply swallowing lumps of ice.

Epilepsy itself, one of the most uncon trollable of human muladies, is said to be treated successfully in London, by the application of ice to the spinal portion of the system.
