for Friday evening, Nov. 13th. Addresses are expected from the Rev. J. L. Murray, Woodville, and resident An attractive programme, consisting of vocal and instrumer tal music, readings, &c., by the member of the Council.

The Mayon said it had not; and at the will also be present.

The brass band will also be present.

FENELON FALLS.

REMOVAL -- UNIVERSITY HONORS-NEW [From the Gazette.] Mr. Malcom McDongall, until lately a member of the firm of R. C. Smith & Co., left here on Monday. Mr. McDougall has been connected with the firm for many years, first as employee and then as partner, and during his resi-dence in Fenelon Falls has made hosts of friends, all of whom will no doubt be as sorry to lose him as we are. As far as he knows at present, his future residence will probably be in the city

that the three young mea who were here during the summer under the charge of Mr. C. J. Logan have all entered Trinity College, Toronto, with much credit. At the college there are three scholarships to be completed for over crowded with orders. The first in "was most sati factor, and showed a considerable economy. The speed was fired for about nine hundred impressions an hour, though of course that number can be greatly increased, and consequently each "side" was printed in about two hours.

The new Methodist Church on the telegraph road, Vernlam, is finished and ready for occupation, but the opening of it will be defer.ed ti'l errly sleighing, when opening services and a tea-meeting will be held similtaneously. The building is a frame of the most substantial character, 26 x 36 feet, cost 3900, and is the best on the Bobcaygeon Mission, if not the best of its size and material outside of the towns in the district. Mr. Jas. A. Kennedy, of Fenelon Fails, was the contractor, a and trustees, but did it in a tasteful, elegant style and highly workmanlike manner; so much so that they had not

even once to find fault with any part of the work. The build g is highly

creditable to all concerned The men employed at the railway cut The men employed at the railway cut near Green & El's's mill in this village, disgusted with the small effect upon the rock of ordina. Ulasta, determined, on Monday last, to see what the wholesale use of powder would do, and the result was eminently satisfactors. They are was eminently satisfactory. They set to work about noon with a three-inch drill, and when they had got down as far as it would go, a crowbar was welded to the top and the perforation resumed. By noon on Tuesday the hole was twelve feet deep, and, after two or three 'squibs' had been fired off to loosen the bottom, the grand charge of about sixty pounds of powder was rammed in, the fuse lighted, and the men skedaddled with unusual celerity to places of safe y. The report was not ve. loud but the upheaval was tremendous, about eighty cubic yards of rock
