the Aventiens notice, being havilles and botton adapted for the butcher when around the shade and how pens it will the hoge also, and leave it on th

of the nests are medecupen the ground.

The Herr Harron. Prof. Atwester states that the best ration for a cow in full flow of milk is a hundred parts of comment by weight) alighty parts bean and sixty five parts described the description and meat.

The Public With the October Ecolor. A Portland butcher was decenstruck something, which, on examina-tion proved to be quirté. An assay revealed the presence of gold, and the class of the precious stuff found in the fowl's crop is \$1.50. Excessive Sweather in Honers, A reader requests a remedy for excessive weathing in horses. This is usually egued by freding too much corn, and honce the best remedy is to diminish the quantity of corn and year the feed is much as possible. Some horses, however, are constitutionally subject to averte.
