"OLD ENGLISH CONDITION POWDER."

JOSEPH STABLES, Manvers, writes: "I have used anything to equal the Old English Condition Powder. It has done more for my horse than any other powder I have used. It has made my horse's coat shine like a mirror. It has also made my horse's skin healthy and his appetite good. I have used it for several months and I can truly say that it is the best in the market. I have used it for several months and I can truly say that it is the best in the market. I have used it for several months and I can truly say that it is the best in the market."

M. & J. SAWEY

On Easter week we will have on exhibition some of the best beef ever brought into the market. One fine THOROUGH BREED HEIFER, fed by Mr. S. Barclay of Opa, and also THREE OLD HEIFERS, weight 1,500 lbs., fed by Mr. James Brydon, of Mariposa. Also MUTTON, LAMB and VEAL. Call and inspect our display and we are certain you will be satisfied.

SCENES FROM THE CAPITAL.

(Continued from first page.) principles of the Order explained to him and he understood them to be simply ultramontane Protestants. He thought it would be discourteous to a large and respectable body of men to throw the bill out at this stage. Mr. Ives pretended to give great weight to Mr. Bowell's speech, and spoke of this gentleman as especially representing the views of the House in the House. He asked Mr. Bowell whether he spoke on behalf of himself, of the Orange association, or of the government. Mr. Bowell said he spoke on behalf of his responsibility, and for nobody else. Mr. Bowell, of Toronto, spoke in much the same terms as others of the discourtesy to a large body of intelligent men who would be involved in the vote in favour of the motion. He knew nothing of the bill, but knew of no reason why the members should not vote against it. Mr. McNeill was the last speaker, and he for the same reason as the others favored the bill going to a second reading, and urged Mr. Counsel to withdraw his amendment.

THE VOTE ON THE "HOIST."

A vote was then taken on the amendment, which was lost by 91 nays to 80 yeas. As several voted against the "hoist" as discourteous who may not, and probably will not, vote for the bill on its merits, it is quite problematical.

PROSPECTS OF THE ORANGE BILL.

The debate will not conclude until after the Easter holidays, and an Ottawa correspondent says:—It is now evident that the Orange incorporation bill will be defeated by from 20 to 40 of a majority when it comes up for a second reading. As a matter of fact the six months' hoist was only defeated by the courtesy of several members, who will vote dead against the second reading. The bills voted against it by persons interested in the success of his opponent, and in support of this theory they adduce, amongst other specious circumstances, that in one locality at least in the north a number of persons who are engaged in a nomination day, that they could not meet their taxes or store accounts, have since paid the collector and the merchant with the note of the hoist in circulation in that part of the riding.

PROBABLE SHERIFF.

Whether or not Let- water eyes are more prolific than others we do not know, but Mr. John Copp has two which have this season produced three lambs each, and he hopes that the rest of the year may do as well. The lambs are a cross between the Leicester and the Southdown, Mr. Copp having bought a ram lamb of the latter breed last fall from Mr. T. Guy of Ottawa for \$15, and the animal was so small that when he got to home his neighbors all thought he had got a bad bargain, but they are now inclined to change their opinion.

A DANGEROUS DIALOGE.

A few days ago a little boy about two years old, son of Mr. Charles Harding of this village, took a sup of two of a bottle of muriatic acid which his father kept in his house for use when soldering metals. Soon afterwards the child complained of a burning pain in his stomach, and his mother suspecting he had swallowed some of the acid, immediately gave him a dose of salt and water, which caused him to vomit. Dr. Wilson, who was at once sent for, administered medicine and the little fellow was soon all right again. Muriatic acid is a poison, but he had probably taken but a very small quantity, and his mother's prompt action saved him from any serious consequences.

KICKED BY A HORSE.

Last Friday Mr. Frank Bell, a young man from Fenelon Falls, was working at Minden, when he was kicked by a horse. The horse was about to put the crupper under its tail the animal suddenly stepped forward and kicked Mr. Bell on the head. The horse was not shot on his hind feet, as one of them struck Bell on the forehead over the left eye with such violence that he was thrown into the air. The horse's hind feet had been a shoe on the foot he almost certainly would have been killed. As it was he had a narrow escape, as he received an ugly wound about the neck and down to the bone. Dr. Curry of Minden, who attended him, says that he has never seen a more unfavorable specimen of a horse than the one which he was kicked by. He is now doing well, however.

THE HALF-YEARLY CONVENTION.

The half-yearly convention was held in Lindsay on Wednesday and Thursday, the 21st and 22nd inst. The attendance of teachers and others was good. Mr. Kirkland, science master in the Normal school, Toronto, gave a lecture on Wednesday evening, on the "Conservation of Life." The pictures were well exhibited on the canvases, showing the various stages of life from earth to a state of liquid fire in its preparation for man, and the accompanying remarks of the lecturer were very interesting and profitable. Mr. Kirkland gave a lecture on "Combustion," illustrated with experiments on oxygen, hydrogen, phosphorus, sulphur, etc., showing various curious and interesting phenomena. He also gave a lecture on "Composition and heat of them in a masterly manner. Mr. Sherwood read a paper on "Boys of Fenelon," and the president of the convention, Mr. Sherwood, alluded to a variety of subjects, including changes in examinations, spelling grammar, and other matters of interest to schools and visiting days. Owing to the amount of time taken in discussing the various subjects introduced several of these were done on the program had to be left over to a future convention.

The lumbermen are returning from the woods and report that the snow never was so deep in the bush, in any case, as it has been during the winter, and in some cases impossible.

THE ORILLI PACKETS.

The Orilli Packet reported the man from Fenelon to be on Mr. Thompson's farm near Port Hope, as reported in this Post last week, was one Charles Lambert, who worked for Mr. Joseph Wallace, and left Orilli in Canada last week. Lambert was a quiet, inoffensive, industrious man, and Mr. Wallace regretted his leaving very much. He was a member of the brass band, and liked by all who knew him. When in Orilli he was fond of having night parties, while passing a night under a tree, in Muskoka. He had no relations in Canada.

COMMERCIAL NEWS.

OFFICE OF THE CANADIAN POST.  
Business and Produce.  
The market for grain has during the past week been comparatively flat. Buyers report that storage room is all filled up—completely crammed. Millers report that they have now on hand all the wheat they can find from the West. Sales of wheat, in bulk, are very slow and not much moving forward. There has been in the town a fair delivery although prices are unchanged. Wheat, 1st quality, 85¢; 2nd, 80¢; 3rd, 75¢; 4th, 70¢; 5th, 65¢; 6th, 60¢; 7th, 55¢; 8th, 50¢; 9th, 45¢; 10th, 40¢.

BRITISH CONSUL TRADES.

The Mark Lane Express of Monday in a review of the British grain trade during the past week says: "The supplies of wheat have increased and somewhat improved in quality. Prices are weaker. The demand for foreign wheat is restricted and prices unchanged. Cargoes were in small demand. There were fifteen arrivals and four sales. The forward trade was neglected. The winter wheat is a shilling lower. Flour is lower. Foreign wheat is in large supply. Maize declined slowly, while for barley and oats there was a fairly active country. Foreign maize unchanged. The total English wheat during the week were 57,384 quarters at 42s 2d, against 31,840 quarters at 44s 7d for the corresponding period of last year.
