The evidence showed that fifty per cent. was declared. This was not paid in cash, but was credited against the unpaid fifty per cent. on the stock, thus making it fully paid up stock. The point at issue is to the legality of this ingenious arrangement. The financial position of the company at the time has a bearing on the point, and as to this there was considerable contradictory evidence. was considerable contradictory evidence.

Toronto Live Stock Market, Business in this line remains much as before. The supply of cattle is light, but fully meets the demand, which has not yet shown any marked improvement. Buyers are picking up lots for exportation, but will not hurry them forward much before the first of May, which is looked upon as the opening of the season proper. Sheep and lambs are easier and coming in more freely, but quotations are not changed. Calves are also in better supply at firmer prices. We quote:—
