LINDSAY, FRIDAY, AUGUST 31, 1883, THE MINNESOTA CYCLONE. TERRIBLE DESTRUCTION OF

A SCENE OF APPALLING HORROR-HOUSES

last gave further particulars and the subjoined graphic description of the great cyclone in Minnesota on Tuesday: The weather on Tuesday was beautiful until the evening, when clouds began to gather said that it was not at all likely that the model school could be restablished unless the use of the public and the atmosphere became oppressive. About six o'clock the rain fell, the clouds assumed a greenish appearance, and there was a rumbling noise. In a short time the was found that the studies and work of the was found that the studies and work of the threatened with disease. The vine is force of the cyclone was felt, and what was force of the cyclone was felt, and what was he felt that the board would not entertain once a well-populated portion of the city the idea unless it was effected as he had (Rochester) was a scene of ruin. Its stated. He admitted the possible hard ship main course was through lower town, but its force was felt more or less in all parts of the city, and its freaks were wonderful. It demolished well-built structures on objection of interference with the work in Broadway, doing no harm to adjacent the schools still remained. He saked the buildings beyond overturning chimneys board to consider the matter as if the idea and stripping coverings from the roofs, was entertained it necessitated the engage-Handreds of trees were torn down, render-ing many streets impassable. Some of the trees were stripped bare, even the bark being torn off.

A WHOLE SECTION DEVASTATED. A portion of the city north of the rail-road called lower town received the most damage. Not a house is uninjured, and not twenty are standing. It looks at a distance as if there never had been a building in that portion, while in other sections the remains of the houses show the terribly destructive force of the wind. As soon as the cyclone had passed, and people in the more favored portion began to learn of the damage, they went to lower town to render assistance, many working

A SCENE OF APPALLING HORROR. While all knew the destruction had been fearful, no idea of its extent could be obtained until next morning, when its horfors were appalling. Commencing at J. R. Cook's house, on the St. Paul road, which was entirely demolished, the cyclone took Mr. Leland's residence, barn and outbuildings, not leaving a stick standing, thence sweeping through lower town. It seemed as if a terrific flood had swept over the section. In many places where there had been residences scarcely a board was left. The grass was filled with dirt and sand, as If a muddy stream had poured over it. Ten business blocks were unroofed and two hundred houses damaged. The total loss will be \$100,000. Twenty-six persons were killed and lifty wounded, many of them

THE STORM THREE MILES WIDE. The cyclone started near Owatonna. It varied in width from one to three miles, and did not skip as usual, but swept every thing clear. Houses, barns and crops are all gone as far as heard from. About six persons were killed outside Rochester. The loss to crops will be \$300,000.

A CLEAN SWEEP OF CROPS AND BUILDINGS. ST. PAUL, Minn., Aug. 23. North of Viola the cyclone swept crops and buildings clean. Along the failway people saw the clouds rolling over with a roaring

A WOMAN BLOWN AWAY. DODGE CENTRE, Minn., Aug. 23. The crops in the path of the evelone two miles south of here were destroyed, and heavy damage was done to buildings. A man and wife working in a field saw the storm and clung to each other. He was knocked senseless, and she was blown some dis-

tance and horribly mutilated, her arm being twisted off. A number of others were ACCOUNT OF AN EYE-WITNESS. Mr.E.A Peck gives the following account of the cyclone: Ht seven o'clock Tuesday evening ne reached Rochester, Minn. The entire north part of the place from the Chicago an Northwestern track is a con-fused mass of debris. Scarcely a house is standing; o few which were had been shattered a by an earthquake. The af-frighted survivors were rescuing the injur-ed and the dead. Before midnight twen-ty-three courses lay in the hotel, pitiable figures, some mangled out of human re-semblance. Nearly all were injured about

head and face, and appeared as if they

had been dragged in the earth. Forty were welled d. It was thought twenty bodies remained in the ruins. The portion of the city swept by the cyclone included generally the pierer dwellings. The storm appeared to hive formed about eighteen or wen'y miles northwest of Rochester, gath wenty onless northwest of Rochestengathering viole case it progressed. A lowering, due colored, funnel shaped clond was seen a rehing, and in a few moments the cyclon was accomplished. There was north to escape, The place where the dead lay was miserably sad. Mothers wildly earched for children, while homeens wife were found whom the tempest had or sheed. One child was the only survive of a family of seven. The passengers of the color of the c

to be re-established—a fourte was-FINANCE COMMITTEE-TEACEER FOR

THE BAST WARD. A special meeting of the school board was held in the council chamber on Monday evening of this week. Present: Mr. Wm. Grace, chairman; and Messra. Pilkie, Barron, Heap, Wray, McNellie, Bradburn and Irwin. In the absence of Mr. Speir Mr. McNeillie acted as secretary.

ABOUT A FOURTH TEACHER. The CHAIRMAN, in a short address, explained to the board the position in which the staff of the high school stood. A proposition had been made at a former meeting to carry on the high school until the end of the present year with three teachers. This possibly could be done, but in view of

a proposition to re-establish the model school a fourth teacher would be necessary. He was in favor of seeing the vacancy filled. Four teachers could certainly manage the work better than three. The headmaster had been consulted and favor-

Mr. S. Irwin was of opinion that if the amount of salaries now paid four teachers was divided amongst three thoroughly competent men it might have the effect of

Mr. GRACK could not see that three men, no matter how zealous, would or could do the work of four teachers. Mr. Inwin again reviewed the arguments he had already advanced. The present time was a favorable opportunity to

THE LINDSAY MODEL SCHOOL.

THE LINDAT MODEL SCHOOL.

[Ipon the suggestion of the chairman Mr. W. E. Tilley, headmaster of the Linday high school, briefly told the board what he knew about the proposed re-establishment of the model school in Lindsay.

At the request of the chairman, Mr. J. J. Filley, inspector of model schools, addressed the board and said that he came to Lindsay at the suggestion of Mr. Marling, to see what could be done about the re-establishment of the model school. Mr. Tilley briefly reviewed the facts with reference to the working of the model school formerly in Lindsay. He also mentioned the methods of working the model school in the neighboring counties and referred to their general success. He contended that it was rather an anomaly that model school pupils from the county of Victoria should be should studying in the schools of Port Hope and other localities.

At the request of a member Mr. J. H. Knight addressed the board with regard to a model school in Lindsay. Mr. Knight said that he had not, before hearing Mr. Tilley's explanation, been in a position to recommend a scheme. He felt that if the board succeeded in engaging a teacher to fake the place of Mr. Smith, who would be competent to manage the model school, it would be a good plan. If such a teacher could not be obtained the model school might be carried on by Mr. Tilley, the headmaster, devoting a portion of his time to the work. He (Mr. Knight) would also give assistance.

Mr. Grace said that it was not at all

vind became violent, and soon the full | pupils were seriously interferred with and ment of another teacher.
Mr. W. E. Tiller said, referring to the

high school matter, that when the number of pupils was over seventy it was difficult to do the work with three teachers. The average attendance now stood at about one hundred pupils. He did not think that the work could be done with three teachers, irrespective of model school duties. Practically he was opposed to experiments in high school matters. He was satisfied that four teachers were needed. If the hoard decided to work with three teachers, very good. But let the arrangement be a per-

manent one.

Mr. Inspector Thirry gave the figures shewing the financial position in which the board would be placed and how favorably the government were disposed to aid model

Mr. BARRON said that he did not believe to become teachers were practicing on the children of ratepayers who were sent to the schools to be educated by the competent

teachers already under salary.

Mr. McNEULLE said that his feeling against the model school was limited to the point that in former years the public schools seemed to be secondary to the model school. He felt, after the explanation he had heard, that the standard of our high school would be raised, and that the model school could be carried on in an advantageous way. The fourth master needed in the high school should be

master needed in the high school should be at once engaged. He would support a resolution to revive the model school.

Mr. HALLET, head-master of the public schools, was asked to give his opinion and said that in the case of a scheme as mentioned by Inspector Tilley, he would be in favor of a model school. The provision that a model school pupil should have six weeks preparation before being allowed to attempt to handle a class was a good one.

Montreal Horse Market.

Business in horse flesh has been very dull these last few days. Mr. Kimball, of the Montreal horse exchange, expects on Monday next 21 horses by the steamship Concordia. The following is a list of horses shipped to the United States for the week ending August 25th:—August 20th: Five mares for \$2,000. August 21st: Two

to handle a class was a good one.

Mr. Frap enquired if there was the necessary accommodation in the high school buildings for the model school. There were now several classes more in the high school than when the model school Mr. W. E. Tilley assured the board

that there was sufficient accommodation. Mr. S. JRWIN was not satisfied that the proposition to start afresh the model school should be entertained. The old difficulty of interfering with teaching the pupils always cropped up. If model' school pupils were placed in the schools, on probation, as monitors for a time, it might be a good ar-

rangement.

Mr. Inspector Tilley said that the arrangement suggested by Mr. Irwin was practically the plan suggested by himself.

It was then moved by Mr. McNeillie, seconded by Mr. Heap, that the model school be re-opened.—The motion was car-

SCIENCE MASTER AND MODEL SCHOOL

MASTER. Mr. McNetlate also moved, seconded by Mr. HEAP, that the chairman be authorized Mr. Hear, that the chairman be authorized to advertize for a science master to fill the vacancy in the high school staff caused by the resignation of Mr. Gilbert A. Smith, salary to be \$600, applicant to hold first normal school certificate, and the teacher appointed to be qualified to fill the position of head master in the model school and to sesume the position if required to

-This resolution was at once carried. REPORT OF FINANCE COMMITTEE. Several accounts for stationery, printing etc., which were certified to, were ordered

Upon the suggestion of Mr. Irwin the chairman or secretary of the board was authorized to advertise in the local papers for a teacher to fill the place formerly held by Miss Hunter. It was decided to place consideration of the applications received in the hands of a committeee composed of the chairman and Messra. Pilkie and Mc. Neillie.

gera of the relation were not aware of the cyclone in til their attention was directed to it by foother bede and wearing apparet ledged against the barbed wire fences.

VOTE OF THANKS.

The thanks of the board were tendered to ing dental with the lagged against the barbed wire fences.

The thanks of the board were tendered to ing dental with the lagged against the barbed wire fences.

sent meeting.

The board, however, adjourned with out taking any action.

COMMERCIAL NEWS

OFFICE OF THE CANADIAN POST LINDSAY, Aug. 30th, 1883. Business and Produce.

The local market has been dull during to move in quantity and the season is to use a farm expression "just between hay and grass." Samples of Fall wheat have been brought to the mills and the results of an examination are not encouraging. After cleaning out six pounds of refuse to the bushel the sample does not show up anything like as good a grain as last year's yield. It is plain that fall wheat is badly rusted. Spring wheat turns out much better than anticipated, the quality being good and the yield fair. In barley the good and the yield fair. In barley the estimates for the district in this country is that the crop will be about one-third less than that of last year's, but the quality is better. The outlook at present is that fully as much barley will be marketed, but on account of the large quantity of malt held over that prices will open low.

In provisions there is little if any change in prices. Eggs have advanced to 14c to 15c if fresh and sound. Butter and other dairy products are still at last weeks prices.

The Ohio fruit crop is a failure. Pot oes are doing finely. Buggs and maggo are destroying nearly all the cabbag cucumber, and squash crops. The outlook for the peach crop in th

Hudson river valley has suddenly change for the worse. The trees are blighting and the fruit shrivelling. The crop will be failure. The grape crop will be very large A Milwaukee despatch says :- One of the best posted apple-buyers in the country, just returned from an extended tour, says there will be a winter apple famine this

year throughout the country, caused by the

wet weather. The Hungarian wheat crop is estimated at a full average; the Austrian crop 15 per cent. below. The wheat available for export is estimated at 5,500,000 metre centals; the amount of barley, 3,000,000 metre centals. It is expected no rye or oats will be exported.

The Market Lane Express in its review of the British grain trade says the fine weather of the past fortnight has had an inestimable effect on the crops which are being threshed and marketed very fast, but present indications are that the wheat crop in the united kingdom this year will be one of the smallest ever known. Trade during the past week in foreign wheat off stands now quite demoralized by the sunshine. In the off coast cargo trade almost nothing was done. The sales of English ter against 12,701 quarters at 17c 10d for the corresponding week of last year.

attacked with a black rust, which is first noted by brown spots on the margin of the leaves, corrugating the entire plant as it spreads. A rapid extension of the disease to nearly all of the leaves and stalks ensues to nearly all of the leaves and stalks ensues and the foliage dries up. The potato itself becomes affected and decays. A large number of potato-growers who a few days ago were anticipating an abundant yield now foresee the almost complete destruction of this crop. The cause is attributed to the moist and unusually cloudy summer. The price of early gardened potatoes has been raised in many of the immediate been raised in many of the immediate

The Montreal Gazette in reviewing the wheat situation says :- "In brief, the world's big crop of 1882 was largely in excess of the actual consumptive requirements of the past twelve months, as demonstrated by the heavy supplies carried into the new cereal year. It may therefore be perfectly true that the wheat yield of urope and the North American continen for the present harvest is considerably below that of 1882, but its effects will no be felt to any extent until the big supplies in eight, which at present greatly over-lap legitimate requirements, are sufficiently reduced to induce the importing nation of Europe to anticipate their future want of Europe to anticipate their future wants more generally. So far as speculation is concerned, the deal has hitherto been against it, most operators having bought upon the "short-crop" cry, regardless of theability of last year's surplus to indemnify the expected shortage of the crop now being reaped on both sides of the Atlantic, and unmindful of the fact that there is no short' interest of any magnitude to afford much spur to a speculative boom."
While, therefore, up-turns may be expected at intervals the outlook at the moment does not favour any sharp and permanent

for \$2,000. August 21st: Two

Montreal Live Stock Market. There were about 200 head of cattle offered on Monday, an unusually large proportion being of indifferent quality, while really good cattle were scarce. Prices for the best quality were higher than last week, but other kinds were neglected and difficult to sell at former rates. A few head of the best cattle were sold at from 5c to 5tc per pound, and it is probable that somewhat higher rates would be paid for choice steers and heifers. Common steers in fair ondition sold at about 4c per lb., and good fat cows at from to to 4½c do., while ordinary dry cows sold at from \$25 to \$35 each, or from 3c to 3½c per lb. Small lean stock sold at from \$12 to \$24 each, or from 2/c to 3c per lb. There were about 500 sheepandlambs on themarket Monday, and higher prices were demanded by drovers, higher prices were demanded by drovers, which butchess seemed unwilling to give, and trade was very slow. Good lambs in lots sold at from \$3 to \$3 50 each, and common lambs at from \$2.25 to \$2.75 each. Sheep sold at from \$3.50 to \$5.50 each. Live hogs are still duil of sale, and prices are about 61c per lb. Shippers are buying good store steers at about 51c per lb.; fat

The Improved Dominion Water-Proof Roof Paint. LINDSAY, 30th July, 1883.

To the Improved Dominion and Water-Proof Raint Company. Gent Company.

Gent Company.

Gent Company.

Gent Company.

Gent Lemen, —I have much pleasure in recommending your roof paint. The roof you painted on my woollen factory was leaking so badly that I considered it impossible to stop the leakage without reshingling, but I was advised to try your roof paint as it was so highly recommended by some of the first men in Ontario that had used it, and I did so and found it to be everything it was recommended to be, a first-class water-proof paint, as it stopped the leakage and saved me reshingling my factory.

WM. Dundas.

LINDSAY, July 31st, 1883.
I know the above named building (having used it for six years) and can certify that the statements are correct.—J.W. WALLACE, mayor.
