-Attacks on Irish harvestmen such as diegraced Cheshire last year have recommenced. Three English farm laborers without provocation threw a shower of stones at Patrick Phillips, an Irish harvest-man at Durham, as he was going home, and two of them struck him violently their flats, knocking him down, and causing blood to flow freely. Hall, of Dashwood, has a cow that gave milk continuously for two and a half years, (about 900 days), and he believes she would have continued to do so as long as he liked to have milked her. - Frederick Mann, the young Englishman, who is charged with the diabolical murder of several members of the Cook family in the province of Quebec last year, is reported to be trying to cheat the gallows by making attempts to escape lately from L'Orignal gaol. His first attempt was nearly successful, as he had scaled the walls surrounding the building, but some boys on the outside commenced stoning the malefactor, and the noise brought the warden in time to prevent the prisoner making off. The second attempt was also a hold hid for liberty. It appears the war-den had gone away for a day, and left a eeble old man to look after the murderer On the new keeper entering the prisoner's cell the latter saw his opportunity, and got out and locked his attendant in. The incarcerated man called so loudly as to attract the attention of the warden's wife, who gave the alarm, which brought assis-tance, and made the second trial as un-successful as the first. The prisoner occupled his idleness in reading and walking through the corridors and yard of the gaol, seeminaly quite insensible of the peril he is in. His trial takes place this month.

-Last evening, says the Detroit Free Press, a comely Canadian girl, about nine teen years of age, called at the central police station and asked for lodging, saying that she was a stranger in the city, and had caused that request to be made is pitiable and interesting in the extreme. Some months ago the young girl, who lived in Collingwood, and whose parents are very respectable people there, commenced keeping company with a young man named Frederick Ballston. He was not long in discovering that he had awakened the tender passion in the breast of the fair young girl, and being unacrupulous, worked upon it to such an extent that she finally consented to run sway with him. On Saturday afternoon they left Collingwood. Before going the girl had told her parents that she was going to visit an old aunt who lives a short distance out of town, and that she would stay with her over Sunday. They loitered around Hamilton for the few hours they had to spare and left on the Chicago express for the city of the straits, their deatination. Arrived here early Sunday. day morning they went to a cheap hotel, where they registered as man and wife. The presumption is that found it, but in some other city. At any rate, he has not returned and has not been seen by the girl, from which she concludes he has deserted her. Alone and friendless in Detroit, she waited for a couple of days for her pseudo lover to turn up, but he failed to come. She sought protection from the police, as has already been told, and as she was very respectable looking her appeal was granted. Mr. Gross uses the purest English Black Rubber, and never during his experience of nearly twenty-three years, has he been so uniformly successful with nur material. and cigars. Good stabling, attentive hostler. May 18, 1880.—32-1y. English Black Rubber, and never during his experience of nearly twenty-three years, has he been so uniformly successful with any material, Black Rubber is non-irritant and non-conducting, and cannot therefore produce congestion or any other disease of the mucuous membrane of the mouth. Thousands of people who have been not only annoyed, but actually tortured by the attempted use of red rubber and other poisonous plates are to day wearing BLACK RUBBER PLATES with pleasure never before known in their experience with artificial teeth. An attempt is being made by a certain nonplused dentist to force upon his patrons a humbug called a "gold alloy plate." Do not be deceived by it. It is nothing new, but an old thing revived, and does not contain an atom of Gold. Mr. Gross has a sample of the genuine article from which goldalloy plates are made, and any one can see it by calling at his office. He will make plates of what is called Gold Alloy or of Red Rubber for persons who want such plates, after their poisonous nature has been fully explained. If you are about getting artificial teeth, and want something that is good, and that will stand the test, get them made on Gold, Platina or Black Rubber, and you will have no cause for regrets. In some respects the Black Rubber is superior to either of the metals named, and can be furnished at about one-fourth their price. A full upper and under set of teeth from \$9 to \$65. Mr. Gross is using Liquefied Nitrous Oxide Gas, the purest, safest, and most reliable form of gas in use. The natural teeth preserved by filling, and fillings guaranteed for five years. Mr. Gross will take pleasure in explaining everything to persons who call for information. Rooms over J. KEN-NED Y'S Store, Kent-st., Residence Russell-st.—16.
