The man who for a year resides in a community and leads a respectable life, even though he be of moderate ability, will grow in the confidence and esteem of his fellows. On the same principle, a newspaper advertisement becomes familiar to the eyes of the reader. On wet and poorly try in the place of the local option act. It appears, however, that we sud the promoters of the Scott act in general are entirely mistaken as to its purpose. A recent order-in-council, with what appears to be a sort of grim humour, announces that, "In order to facilitate the operation of the Canada Temperance Act," authority is given to distillers to introduce whiskey in quantities of not less than ten gailous into Scott act counties. We presume that, under our constitution, the governor-in-council, which the late Sir George Cartier is reputed to have said was "a great institution," has authority to pass and put in force so important as alteration in an act of parliament as this appears to us to be, or it would not have been done, but that

present condition of the spring wheat crop throughout the province, though somewhat inferior to that of fail wheat, affords ground for hope of a fair average yield in spite of a good many adversities, Seeding was generally a little later than usual, and growth was further retarded by a spell of cold, dry weather in May and easily in June, which under ordinary conditions is a consequence not only did the plant fail in many instances to stool out fully, but the season was thrown backward from a week to two weeks, according to locality; nearly all the correspondents state the fields to be still green at the date of the reports, and cutting will not be general until about the 20th of the month. The fields in their green condition are almost invariably reported as luxurisms and highly promising; but these statements have to be accepted with some reservation in view of the vicinatudes to which the grain is liable during the ripening period, and in view also of the fact that many correspondents in seathern sections, where ripening has begun, report that it is failing to realize the expectations raised by its appearance a short time before. In July there was considerable hot, dry weather, which stimulated a too rapid maturity and appeared to expose the wheat to its usual enemies of rust, midge and weevil. These evils, especially the two former, prevail pretty extensively throughout the western peninsula formed by Lake Eric and Lake Huron, the rust attacking the fields just as they show signs of changing their color. It is not likely that the western bearing the fields just as they show signs of changing their color. It is not likely that he western bail of the province, where fail wheat is the staple cereal and spring wheat the exception, will yield more than a rather low average. In what is known as the spring wheat region of eastern Ontario it is gratifying to find that the accounts so far are more generally favorable. Indeed an unusually hopeful tone pervades the reports from nearly all parts of the St. Lawrence and Ottawa and East Midland districts. But insect peats and traces of rust are present, and it is possible that before the grain is fully ripe the experience of the western counties may be to some extent repeated here. A few fields wer retarded by a spell of cold, dry weather in

A POPULAR SUMMER RESORT. - Three the medium of THE Post we have adver-tised Beaverton as a splendid summer resort, and therefore the shores are swarming with visitors from town and country. Rev. Geo. Bishop of Uxbridge, with a large party, including Dr. Bascombe's and Mr. lamilles, are camping in the grove. Several camping parties from Toronto have been here and on the island during the past week. Truly Beaverton is the best place short of Orchard Beach and Cape May that any person could find. LACROSSE EXCURSION.—The lacrosse excursion to Stayner via Barrie on the 11th was postponed until the 12th on account of the propeller "Orillia" having grounded in a fog when coming to the wharf. A very respectacle crowd availed themselves of the run to Barrie on the 12th, being one of the run to Barrie on the 12th, being one of the most pleasant runs on the lake. The excurts enjoyed themselves mightily on board. The piano and the Indian doctor were kept busy dispensing music free to the crowd. Prof. Leigh gave some good instrumental music as also did Mr. M. C. Cameron. Mesers. Cameron and Smith sang several pieces which were well receiv-ed, and especially "Stop Dat Knocking" sang several pieces which were well received, and especially "Stop Dat Knocking" brought the house down—or rather the boat. An Apology to Mrs. Young.—We sincerely apologize to Mrs. Lucy Young of Bolsover, for not giving her her proper name, but we were under the impression that "Biddy" was her name, or at least, Bridget. (We cut it short for convenience sake.) We have had the pleasure of knowing Mrs. Young for a long time and feel disappointed now to find out that her name is not Bridget, because your correspondent has always loved and reversely that her name is not Bridget, because your correspondent has always loved and revered that name. The fight referred to will soon come off and we will explain all to Mrs. Young. But we are sorry—as the new name will seem

so strange.

OBITUARY,—It is with the most sincere regret that we learn of the death of Mr. Alexander Cameron, which took place at his residence, Simcoe-st., at noon last Thursday, resulting from apoplexy, with which he was seized on the 7th inst. while walking to his home. His death has cast a gloom over the entire community as he was a man that stood exceedingly high in the estimation of all who knew him. He entered mercantile life over twenty years ago, and the history of Beaverton is interwoven with that of his own. The partnership which existed for sixteen years between himself and Mr. G. F. Bruce as general storekeepers was dissolved four years ago, and he had since continued in business alone on Simcoe-st., where every one who came in contact with him estaemed him as a man among men, one in whom we could place every confidence; one to whom we could look up to for advice and counsel. Recrything that physicians could do for a patient was done for him, but all in vain. The decessed was 5t years of age, was born in Gruenock, Scotland, in the year 1831; came out with all the members of his family in 1844, and settled in South Mars in the year 1845. His connection in Scotland are of the highest branch of the great Cameron family and his relatives who deplore his loss here are numerous and highly respected. Beaverton has sustained a less that cannot as yet be fully realized, and the whole community mourns the and course. Patterson, Watson, Burnet and Briden.
