How it is that Woodville cannot get a society with a similar object in view? Last year an effort was made to have a mechanic's institute, but opposition came from quavters where it would not be expected. The matter fell through. in last week's issue of The Poet concerning the difference in the price of grain between Peterborough and Lindaay, espacially burley, is causing much discussion and many very uncomplimentary remarks towards Lindaay grain-buyers. The statement that Peterborough tuyers only paid die, for barley at the same date that Lindaay buyers paid die, may be correct but meede a little explanation. die, was the average price paid in Peterborough, while die, was probably the highest paid in Lindaay at that date. We know one farmer within a mile of Dumsford who sold his burley in Peterborough at 91c, per bushel, within Ic. of Toroute markets. If Peterborough can pay se close to Toroute why cannot Lindaay. We know another who took a sample of barley to Lindaey and could only get 30c. He took the same of Peterborough and sold for die, an advance of 12c, per bus, and further, nearly all the farmers between Dumstord and Soberguou are drawing their barley to Peterborough because, as they say, they can realise from 11 to 15c, per bus, more in Peterborough than in Lindaay. Another point: Our farmers are not a lot of fools so more than the Peterborough buyers. They would not draw their grain an extra fifteen miles unless they were well paid for it, and they can judge-by their basshow many bushels their load contains so that seeds the paid for it, and they can judge-by their basshow many bushels their load contains so that the farmers are not a lot of fools so more than the Peterborough buyers. A PERSONAL MATTER.—(To the Editor of THE POST.)—I have noticed newspaper's communications in the Post Perry Standcommunications in the Port Perry Standard, from Sonya and other places, in which I have been referred to. I have hitherto avoided taking any notice of these communications, not wishing to give the imbecile malignity which prompted them the satisfaction of public recognition; but lest parties at a distance should be decayed. I think it heat to intimate that I among the property of lest parties at a distance should be deceived I think it best to intimate that I am not concerned in the Sosya correspondence of the Standard. The reference to me in that correspondence is only a continuation of the vile tactics employed against me a year ago, when I exposed the villanies of 'meeting in the dark," and it is another example of the cowardly methods of obtaining revenge adopted by those libertaines whom I compelled to abandon their prey. Let our Utica and other interested friends take notice, that it is not sawing these men are after at all—that is not in their line—it is something else. I am sorry that those parties who have been so anxious for a match should be disappointed, but although they cannot saw with these fellows, perhaps they can compete with them in perhaps they can compete with them in their own particular line. Should they decide upon doing se I have no doubt the office of the Standard will be at their disposal, for a meeting, to arrange terms and conditions. Communications addressed to

It appeared that Atthill took some liquor to the meeting. and was noisy, shouting obscene and blasphemous language, the most shocking.
When the Indian constables went to put him out, he produced a revolver. The constables handcuffed Atthill, but were prevailed upon to release him. The matter coming to the ears of the agent, he ordered the rearrest of the offender. Atthill is a member of the Scugog band. After hearing the evidence, the prisoner was fined \$10, inclusive of costs, or if not paid by the 21st, thirty days in goal. The prompt action of Mr. McPhee is commendable, but it seems to us imprisonment without the option of a fine was merited. There are five very fine churches, the English, Roman Cathelic, Baptist, Presbyterian and Methodist; two school houses, employing six teachers; in summer there are fifteen saw mills in full blast, employing five hundred men. The products of twenty-two mills are shipped from this place. This village is likely to become a great railway point in a short time. It is now the terminus of the Northern railway and the starting point of the Northern Pacific Junction, which takes the main line of the Canada Pacific at Callendar. Perhaps the most flourishing industry in the village is the foundry and machine shop of Mr. B. Mowry, where a large staff of hands are employed. In this foundry they manufacture a very superior shingle machine, for which they get ready sale. They ship a number of them to distant points. Mr. Clipshaw, carriage-builder, employs as many as sixteen hands in his factory. One thing highly commendable to the citizens is their fire protection, as they are supplied with a large fire engine and a chemical engine.

Clark, for whom much sympathy is felt. The remains of the deceased were removed to the Pinedale cemetery.

The Merting.—The tea-meeting announced in connection with the Methodist church is now a thing of the past. A large number sat down to a well-prepared tea, and notwith-standing the inclement weather it was a great success. Nearly \$89 was collected at the door. In the meeting which followed the tea, Rev. Mr. White delivered a brief but pointed address. He was followed by the Rev. Mr. Campbell, whose duty it was to address the meeting on finances, a subject on which Methodist ministers are always eloquent. A large sum was subscribed, sufficient, we believe, to pay the debt incurred in repairing the parsonage. Rev. Mr. Pearson addressed the meeting briefly.

Personal.—Mr. A. Clark, our old townsman, was in our village for a few days last week. We are always glad to see him, and are glad to hear of his success at Famelon Falls.

Bargains.—Mr. Gea. Douglass announces elsewhere decided bargains in remnants, etc., to clean out the stock for opening goods. Don't forget to call and inspect the goods and bargains.
