The people generally in this county are too intelligent to be misled and deceived by the elaborate concoctions of our cotemporary, inspired though they may be in this particular by small-minded pettifogger, who has the cunning to make the balls and get an eager accomplice "fresh" enough to fire

We are confident the public has from the first noticed the Warder's designedly unfair treatment of Judge Dean in this revising officer business. We do not take the ground that a judge or a revising officer is to be considered above newspaper criticism. But there should be a fair and true statement of facts, and such wellconsidered comment thereupon as might be deemed proper. We have not had that from our cotemporary. Instead of weighty and considerate criticism there have been intemperate attacks and most unmanly insinuations; instead of a full and correct statement of facts there have been repeated and unscrupulous perversions of the truth. "Hear the other side" a maxim as old as the hills; but it has been sedulously ignored by the Warder on one absurd pretext or another all through this discussion. Have not the public of this county, to whom an appeal has been made, been quick to perceive the gross unfairness of the Warder in assailing Judge Dean for the rejection of three hundred conservative applications. while

"In the Besty-Woodworth and Bowell-White cases the press has the plain duty set it to see that the country is exactly informed of every circumstance brought out in evidence. When the time comes for action at the polls, if the electors do not do their duty, it can only be because the jobbery and corruption that has been shown by the evidence to prevail among their representatives at Ottawa has the approval of the majority; in which case the minority can only continually protest till the public conscience becomes awakaned. Let this fact, however, be constantly kept before the country that in both cases these members of parliament have been trafficking on their parliamentary position—selling their influence to obtain favors from government for their own personal advantage; and that members of the government have, with a full knowledge of the facts, stretched authority to help the schemes of these speculators—let these facts, however, be kept clearly before the country, and there is little doubt that at the next general election an emphatic condemnation of such procedure will be shown. The evil is widespread, and to punish all that have been considered in it is perhaps not possible; but none the less, any member of parliament that is tainted with bribery, as are these men, is unfit to sit in parliament, and should be excluded in future, if he cannot be expelled now."

### NOT FAIR.

The Hamilton Spectator says:-"We believe Mr. John White to be one who has betrayed the trust placed in his hands by his constituents, and that if his constituents are the indepent and patriotic Canadians they ought to be, they will retire him to private life." What about the rest of them? What about Son-in-law Jamieson, Father-in-law Bowell. Beaty and the boy, Woodworth, Orton, Tupper, Pope, Hector Cameron, and many others? John White is no worse than they are. Is he to be sacrificed to save Mr. Bowell ? Those tory organs who have been saying there is nothing in Mr. Edgar's charges should now take a back seat.

A very significant feature of the recent election in New Brunswick is that where the most determined efforts were made by Ottawa ministers and local tory supporters to beat the provincial government candidates there the former received the most crushing defeats. In St. John city and county, where six members are elect-ed, this was particularly the case, the whose six tory candidates being left at

Coun. Keith deserves the thanks of the council and the town for reminding the Mayor of the advantages of brevity in remarks from the chair. uping in the Musicaka Region," This is the title of a neat volume of 164 pages from the pen of Mr. J. Dickson, P.L.S., Fenelog Falls. Mr. Dickson is perfectly familiar with the country described, having surveyed through it for several summers. He has an easy and graceful style, and not only gives highly interesting and graphic descriptive sketches of scenery and entertaining accounts of incidents of travel, but a good deal of practical and useful information, so that the volume will be valuable not merely to the tourist and sportsman in search of fresh fields, but to the farmer and farmer's son who wants to get new and cheap land. There is a great deal of very good land in Northern Muskoka and still further north, and now that railways are traversing the country it will be an attractive region to settlers. We predict a large demand for Mr. Dickson's book from all the classes named. The volume may be had at Porter's; James Bain & Son, Toronto, will supply the trade and fill all orders.

### WHAT IS CORDOVAN LEATHER?

ANSWER.—The finest Shoe Uppers are obtained out of the muscle or shell part of the hide, which begins at the root part of the tail and runs egg-shaped to the hip bone and down to the hind leg. Only the horse family, such as the zebra, quagga, gnu, etc., have this muscle; in fact, this shell or muscle laying between the grain and the fiesh, tightly woven to the grain part of the hide, gives that family their great strength and elasticity. The uppers cut out of this shell are finished and blackened on the shell or flesh side, while the rest part of the hide is finished for many different purposes on the grain side.

This muscle or shell is the most durable leather in existence, and is also most impregnable to water.
