It appears that for some half-dozen years his lordship has been in possession of a tame fox, which he iomenticated as a pet and used to take out in his walks and drives like a favorite dog. The teeth went sharply through glove and flesh, inflicting a severe wound: and the furious animal turned next upon the coachinen and bit him also in the hand and foot. Only a few days after the brute died, and an examination of the hody proved it to be a case of acute rables. Lord Doneralle then decided to apply to M. Pasteur for inoculation with preventative virue, and he and his coachman have repaired to Paris, where Pasteur's assistant, Dr. Grandier, is at present operating during M. Pasteur's stay at Bordighers. This shows a courageous faith in his inno-culation system, for Paris is still ablaze with angry criticism of M.
