An excellent program has been arranged, including addresses and essays by Prof. Robertson of the agricultural college, Guelph, on (1) The production of milk; (2) The handling of milk for cheese facteries and creameries; (3) The creamery business and its profits. John Dryden, M.P.P. on "How can we make farming pay!" William Rennie, vice-president Toronto industrial exhibition, will lead discussion on "How to exterminate Canada thietles and other obnoxious weeds." The Lindsay board of education numbers among its members two M.P.'s. What other board can make an equal claim?

—Capt. Crandell proposes building another large brick house and a brick terrace. Stone for the foundation is being delivered on the ground. The captain as an east ward property owner is now a strong rival of Coun. Mallon. Reads south of the town are reported block-ed very badly with snew, and those to the north in about a like condition. In consequence of bad roads wood has been very scarce and prices have advanced.

-Mr. Gee, W. Curtis of Ope has gone to Michigan and other places across the border to purchase a Cieveland Bay stallion. Mr. Curtis will "get the best," and as he is a good judge a valuable addition to the stock of the county may be

The Warder has several paragraphs stating that certain reformers "personated" absentees or dead voters. The names of Hughan, Helson and others are mentioned in this connection. But the statements are simply "Warder lies." That is the shortest way of dealing with them. Proof can be given, but is unnecessary.

Proof can be given, out is unnecessary.

Betting men have been busy during the week in settling up. A deal of money was won and lost on the majority in South Victoria, a large number of bets having been made that Mr. Hudspeth would have over fifty majority. Several bets for respectable amounts were staked on the Emily majority and others on that of Mariposa.

Mariposa.

On Monday Mr. D. Masterson got badly shaken up and received a severe cut on the head besides bruises about the face. While driving along Kent-st. the horse ran away and turned into the lane at the Daly house. The cutter was dashed against the brick wall and Mr. Masterson thrown out. He had a narrow escape from more serious injury.

—We read in an exchange that with a view of weeding out the poorer class of horses the Wentworth county council has decided to petition the Ontario government for power to license stallions. We commend this course to the attention of our county council as a step in the right direction. Good horses are sure to be most valuable during the next few years.

most valuable during the next few years.

—It has been stated by Mr. Thomas Beall, who keeps account of such matters, that in the shape of snow and rain an average of seven inches of water has fallen in the section of country around Lindsay. This is an unusually large average and a flood may be looked for when the snow meits. Farmers are already predicting a good harvest, relying on the heavy snow falls to protect the wheat during the early spring months.

months.

The millinery opening at Toronto and Montreal wholesale dry goods houses during the week have collected hosts of buyers from the country. Lindsay merchants have shared in the general anxiety to "sort up" with the latest and most stylish novelties, and Mr. J. H. Soothera, of the City Store, Mr. W. Flavelle of Dundas & Flavelle Bros., Mr. J. Simons and others have been at headquarterson susiness connected with their respective millinery departments. Our exceedingly tory cotem, the Herald of Omemee printed last week a three column block of pictorial enthusiasm over the result of the contest and claimed for Sir John a large majority. To offset this exuberance the abie editor remarks as the opening sentence of an able article in an adjoining column: "If, then, I were a boy again and knew what I know now I would not be quite so positive as I used to be." These be fine words, sire, and will the able editor live up to them? Next.

tor live up to them? Next.

The news among the merchants—as Shakepere hath it—at Peterboro is that they have grown tired of paying high insurance rates and that a local mutual insurance company will be formed with the object of lowering rates, which are now said to be excessively high. Prominent men of the town allege that before the waterworks were built they were told by insurance companies that such a water supply system would lessen the cost of insurance. The result, as stated by business men, is that not only do they pay a high water rate but that insurance has been raised correspondingly, in one case from a rate of \$31 per year to \$51.

—Mr. William Leach, who has just returned

from a rate of \$31 per year to \$54.

-Mr. William Leach, who has just returned from the Northwest and the Rockies to visit his sister, Mrs. B. Cook of this town, has a fine collection of buffalo horns. Six pairs he selected for a hat rack and four pairs for ottomans. Others are adapted for ladies' jewel cases or window curtain holders. The collection is a very fine one. It includes one immense pair. Mr. Leach also has a crystal nearly transparent, which he brought from Silver City. It is really beautiful. Such specimens are rare and difficult to obtain. He has also a saddle and saddle cloth which Pie-a-Pot, chief of the Crees, offered as a prize with a pair of ponies to any squaw who would do the best work. Mr. Leach purchased the work. The colors are very bright and strong, yet they are blended with artistic taste.
