THE LATEST FRAUD ON FARMERS.—This time it is a "Wire Fence Man." He calls upon the farmer to sak of him permission to exhibit to the farmers of the vicinity his new fence wire stretcher, upon his farm. In consideration for this privilege he will build the farmer thirty or forty rode of gord fence wherever he may want it. All that he saks of the farmer is, to board him, and go for the machine at the depot, and new the charges on the machine, not over MARKHAM and go for the machine at the depot, and pay the charges on the machine, not over three dollars. In order to have it all understood, the farmer is asked to sign a contract to the shove things, written on a postal card, which the fence man mails to his partner. After the machine arrives a new man turns up to demand \$200 the price of the machine. The farmer then learns to his attosishment, that the "contract" for board, etc., that he was signing was really on order for the machine, at the price of \$200. This last comer claims to be the strong for the company making the machine and by threats of bringing a suit in court forces some kind of a settlement to his fraudient claims. Our injunction needs repeating once more: "Farmers, sign nothing for strangers!"—[Marking Reconomist.]

A SINGULAR ACCIDENT. A peculiar thing happened the other day to a colt owned by Capt. Kerr. It appears that the snimal was in its stable and in moving around in some way got its feet fixed in the side of the stall. It had resred up said the feet slipping into a crack were held fast. When the condition of things was discovered it was found impossible to release the horse by ordinary means and the stall had to be pulled down. This being done the colt was liberated and trotted away appearing all right. (Times.

THE WEARF AND EXCURSION QUESTION.

We are afraid we will be without any excursions by water this sensor, as the poor old wharf has been alrest destroyed by the ice the past week. It is really too bed that the council did not attend to it last season. A good wharf would be a great acquisition to our village. Many an excursions we could have to or from Orillia, Bayrie, Jackson's Point, Bradford, etc. We were credibly informed that two years age our village lost the benefit of five-large excursions from Barrie alone through not having a good wharf. Consider what an amount of good these excursions would have done Beaverton. The majority of the excursionist would lay out some money here—would at all events require dinner. It is not too late yet for some of the council—we have two or three good business men there—to bring the matter forward at the next meeting and have it attended to at once.

ROAD REPAIRS NEEDED. -If our ros commissioner would take a look over the village by laws he would notice that there is one—and a most important one at that — isregaried almost daily by our m. f. chante. See to it, Mr. Daley. And we may se well inform him that the culvert on the lake shore road, at the Cedare (5th cost) is as we apprecated it would be less. on the lake shore road, at the Cedare (5th con.) is, so we surmised it would be last fall, nearly washed out. The road has fallen in sud it is dangerous for horses or even human beings crossing the place after dark. The council, we feel sure, would not like to made pay a heavy bill for damager.

FENRLON FALLS. THE BAPTIST CHURCH.—Mr. J. W. Kelly, who has just completed his studies at Mc Master hall, Toronto, hes swrived here and taken charge of the Baptist church. He will preach next Sunday at the usual bour, Services every Sabbath, commencing at 11 a.m. The public are cordially invited.

The Fall, Wheat.—Last week we expressed satisfaction at not having heard any complaints of damage to the fail wheat, but since them supports have ranged us but since then reports have reached us that so many fields were badly injured by theapring frosts that they had to be plough-ed up and sowed with some other kind of

THE LOCK GATES.—The middle pair of the lock gates are now up, and the third and last will be erected in a few days. SPRING SHOW. -The first surual spring show under the suspices of the Fenelou Falls agricultural and driving park seed ciation, was held in the enclosed grounds, south of the river, on Tuesday, the 26th ult, and would have been noticed in our last issue if we could have obtained the prize list, which was withheld until some points connected therewith were decided upon by the directors at a meeting on the evening of the 1th inst. JUST AS WE EXPECTED.—The spring as sizes opened in Lindsay on Monday last, and the first case tried was Councily ve. Highes for libel. This was an action brought by Mr. Thomas Councily, a railway section foremen on the G. T. E. at or near Lindsay, spainet Mr. Samuel hughes, editor and proprietor of the Warder. It appears that during the late general election for the house of commons Mr. Councily had the misforture to become wist in legal parisance may be called a "made party" to a political squabble, and Brother Samuel went for him! with his secustomed fury. After the first attack upon him Mr. Connolly went to his assailant's office and domanded as spology, which was not only fastly refused, but the next week's issue of the Warder contained a second one and domanded an application of as a "creature," and the public were told that, amongst other things, that it was in consequence of railway companies employing such servants as Councily that secidents were accommons and that it was not his fault if assaiches and that it was not her fault if assaiches and that it was not her fault if assaiches and that it was not her fault if assaiches and that it was not her fault if assaiches and that it was not her fault if assaiches and that it was not her fault if assaiches and that it was not her fault if assaiches and that it was not her matter at the fault in second and the liberty and liberty a end that it was not his fault if and do cld not seem on the parties of the under his charge.
