Brereton, which was well rendered C. H. Brereton, which was well rendered and strongly encored. Then a recitation by Miss Winslow, was uncommonly fine. Miss Winslow appears to possess great ability on the stags. Then a series of songs and tableaux followed for some time which was very pleasing to all, till Lee and Pollard came forward with a piece, (I don't know what you would call it,) but they dealt bravely on Sandy and his Mill, which caused such an unusual uproar of laughter as to check the giass in accural windows. as to check the giass in several windows near by. They were so strongly encored that they had to return and give another oration. Towards the latter part of the program was a play designated "Jacobites," which was well performed and highly ap-preciated. Much credi: is due to the charac-ters in this play for the trouble they had n getting it up in such a short time. In onclusion we must not forget to give praise where it is due, and that is to Miss Nettie Kelly, who officiated at the organ. Also to the orche-tra for their kindness.

[Correspondence of The Post] CHURCH NOTES. -Rev. S. Houston, M.A., minister of Cook's church, Kingston, occupied the pulpit of the Presbyterian church here on Sabbath last and preached two able and instructive discourses. After his sermon in the evening the different congregations of the village met in the Presbyterian church and for an hour Mr. Houston descanted on the wookings of the Bible society. It was the ablest review of the history, etc., of the Upper Canada Bible society ever heard in the village.

The Lindsay Drainage Question. [To the Editor of THE CANADIAN POST.] Sir,-It appears from a remark in a recent letter from Mr. Thos. Fre in reference to the drainage of the town that the proposed great outlay of \$34,000 is mainly for the purpose of affording relief to "two doctors who have built houses in a mud hole." In all probability I am one of the doctors referred to, therefore I feel called upon to protest. The part of the lot upon which the house stands that I live in is not in a " mud hole," and would in no way that I can see be benefitted by the proposed outlay for general drainage purposes. The damage to my premises is caused by back water" resulting from obstructions placed in the course of the stream by the town, which obstructions I ask the council to remove or remedy the nuisance at their own expense and not by a two-third tax on the property they have themselves damaged. I indicated to some of the wise ones. high in municipal standing how this pre-

It was amusing to hear a counter suggestion that was made and attempted to be carried into effect. Of course it was a complete failure. It was about the same as promising to put a man at the place of obstruction to ladle the water out as it

comes rushing down the gully.

But the subject requires a wider consideration than merely to remedy the present troubles.

The plan for draining the town is of such importance that it demands very careful and intelligent investigation as well in its

and intelligent investimation as well in its sanitary as in its financial relations, and I am pleased to see that the council as a whole is disposed to deal with the question on its merits.

I see that in some, if not in all of the large cities in the States the "large sewers" or main drains are constructed by general taxation and the local improvements made by special drains charged to the lots benefitted.

Toronto is trying to benefit by the experience of other cities and the Globe published in detail the observations made by parties who have visited these various places. Perhaps Lindsay might take a hint from what has been reported there.—Yours truly,

W. L. Herriman.

hundreds are anxiously expecting him. The council have granted the use of the town hall and it will be reseated and lit up beautifully. Mr. Schwerea will preach to the united congregations in the Presbyterian church next Sabbath, and we doubt if it will hold the number who will seek admittance. The union choir under the leadership of Mr. Vallentyne is making progress and no doubt will render the beautiful hymns in Mr. Schiveren's book with
