LINDSAY, FRIDAY, NOV. 18, 1887. GRAVEL ROADS AGAIN.

As the roads are getting bad again it would not be amien to consider the onestion of a moderate gravel road scheme. The county conneil meets next weekearlier than usual-and it would be a timely topic for discussion in the smoking parlament, if not on the floor of the house, There will, of course, be a good supply of tobacco and pipes. It might not be a bad plan to take the county council in a body over the Bohcaygeon road, or rather through it, and if the elements have had time to do their prettiest, which is doubtful at this date, not only the 37th but all rules would have to be suspended. The council in fact would not be able to deploy out of committee into full session again: and some of the Muskoks reeves would probably disappear altogether in the mud. This might be a good way to settle the Muskoka problem-just take the reeven out for a drive on the Bobcaygeon road. The gravel road question will not down, It will come up from year to year until

REV. MR. LOGAN AND THE TRENT VALLEY CANAL.

On our seventh page will be found an interesting letter from Rev. Mr. Logan regarding the recent line case of Rubidge v. Logan, which puts Mr. Logan's position in sfavorable light. Of Mr. Logan's zeal, setivity and carnestness in promoting the construction of the Trent Valley canal scheme there has never been any doubt; and we venture to suggest that in view of sil the circum-tances of the case Mr. Logan should not be left to bear singly the costs that have been saddled on him. We make this suggestion without Mr. Logan's knowledge, and with the feeling that it may in a measure be distanteful to him. If he had some countries is in fact, the two dollars a barrel duty did not come out of their pockets—it is not at all probable that the Dominion government would have gone so far as to give the all probable that the Dominion government to admit Canadian the into !heir markets free of duty. It being acknowledged, then, that the duties on goods exported from Canada to the United States are paid by the Canadian producer, the following statement of the value of our exports to that country in 180, and the duty collected thereon by the American government, will give a pretty accurate idea of the loss sustained by Canade last year, owing to the failure of the two countries: s mesenre be distacteful to him. If he has erred at all it has been through seal in s public cause; and the community at Fension Falls and those interested at other places should see that he is not made to suffer pecuniary loss. There need be no personal or political feeling in the matter. That the people of the Falls believe there was ground for Mr. Logan's letter may be seen from the subjoined resolution adopted

"Moved by Mr Brandon, seconded by Mr. Aus in, that the cierk communicate with the minister of rail ways and canuls in report the report made by the ongineer in charge of works as Fencion Fails, as to what reason he had for making such report, as it is not known that he ever had any difficulty with parties along the route, especially as reporte the pivot and rust piers for the railway bridge, of which the conference were relieved; also why swing bridges are not put on, as the present bridge across the local is dangerous, owing to being too marrow, and the conal will be perfectly unless until the swing bridges are built.—Carried."

The evidence are built," and the proconnect for f. "Improvide to pro"the construction of the interior is the

ka waters. This is, a capital idea; but Mr. Cockburn will see by the resolution of the Fenelou Falls council that the Dominion government seems unable to construct swing bridges over the cause at that

Haidimand has been carried by Dr. Monsauc by 17. The contest was of the keenest and most vigorous; but the govern "still hunt" and promises of lavish expen-diture of public money prevailed over the solest statements that could be made by the opposition speakers. The victory will be claimed as a severe blow to commer-cial union or reciprocity, and with certain superficial reason.

ested in Toronto to improve the civic govrument and get the city's affairs properly sed out. Some extensive change are badly needed, for the city has managed among other things to overdraw on its bank account nearly two millions of dollars. For this accommodation it must pay 7 and 8 per cent, while its debentures should not bear more than 4 per cent. Any number of candidates are in the field for

Four of the Chicago Auarchiets, Spies, Engel, Parsons and Fischer, were hauged Friday morning, all meeting their fate with bravado. Ling cheated the gallows by exploding a small bomb in his mouth, nearly blowing his head to pieces. The entence of three others were commuted to imprisonment for life. Columns of sickening details are printed in the daily papers all over the land, and in some the criminals are described as heroes. All this is not good reading. The particulars of an execution ought to be confined by law to the plainest and most matter of fact description that would not occupy haif a column. This reform will come some day.

there has ever been, a liberal voted for Dr. Montague to turn the election in his favor. The white and negro voters gave Mr. Colter a majority of 40. The Indian reserve, where Montague stood all day on Saturday, gave 53 majority for the tory. How many ballot papers the partisan deputy returning officers pur-Seikirk alone, 7 ballots marked for Colter were thrown out by the deputy. The promises of public works in the county may have had some effect, but the still hunt with money did the greatest mischief. The tory canvass, summed up a week san, showed a majority of 66 votes for Mr. Colter, and the time remaining uatil election day was devoted to overcoming that majority. There was no lack

Canada's National Market," prints two compilations from the official returns of great practical interest in the discussion of the leading question of the day. The first shows that the total values of our chief classes of exports to the United States in 886 were as follows :-

This does not include the three million "estimated shortage at inland ports." The Free Press continues: The fact that the imposition of a duty by the American government upon a Canadian article of export reduces the price of such an article to the Canadian producer is admitted by the government, who are now trying to induce the Americans to admit Canadian fish free of duty for the benefit of Nova Scotis fishermen. If the exaction of a duty of two dollars per barrel on mackerel exported to the United States was not an injury to if, in fact, the two dollars a barrel duty did

ely in hie native township. ous county of Ontario. The province was was a dirty little village where is now the have taken place in the natural, social,

seisting to bring them about. It was his town and township of Uxbridge in partic lar," but old age and illness prevented the carrying out of this design. The wor which the veteran contemplated, and had actually commenced, Mr. Higgins has most satisfactorily completed. He has produced not only a faithful biography of a worthy man who from his youth upward, through telligent and increasing interest in public affairs, but also a full and authentic history of the county in which he was born and i which he had lived and labored. For this task Mr. Higgins was very specially quali fied. His thirty years residence at Whithy and his connection with the Chronicie all that time made him thoroughly acquainted with county affairs and brought him into for them. The knowledge thus acquired and the with such judgment that his pages are neverdull, but always interesting and some times amusing. The county history proper takes up many interesting chapters, while The names and services of old settlers are faithfully recorded, the settlement, extent, population and progress of each township described, and whenever possible the in formation respecting valuations, population, etc., is taken from the returns made

tion, etc., is taken from the returns made for this present year. The account of the settlement of the northern townships is particularly full and interesting; and our readers in Brock, Thorab, Mara and Rama will not be disappointed in the chapters relating to those townships. There is a well-told, but heart-rending story, illustrative of the dangers which beset hunters and pioneers in the back-woods some eighty or ninety years ago. The scene of this story is said to have been in the neighborhood of Beaverton, but whether it occurred there or not there can be no doubt that similar tragedies were not infrequent; and it is only by the perusal of books such as the one now under consideration that our younger people can become familiar with all that their fathers braved and suffered to make the country what it now is. The volume has a beautiful steel portrait of Mr. Gould, and intypographical execution and binding is everything that could be desired.
