—The majority of our citizens are a unit in declaring that the electric light is indispensable, and that the system will have to be increased gradually until all the dark streets are illumined. Both opinions are likely correct, but at the same time there are those who claim that more powerful light will have to be given and—if if possible—an improvement made in the way the wires hang that run from the pole to the lamp. At present they swing with the wind, and the ever-shifting shadow thrown, while hardly perceptible close to the light, plunges half a block into gloom at a distance from the pole.

On Tuesday last Orin Bull, second son of the late Gersham Bull of Manilla, who met such a ead death about three weeks ago, came near being the victim of another somewhat similar accident. He was employed digging a well for Mrs. McDonald of that village, and while at work at a considerable depth a large quantity of earth and stone, which had been loosened by the heavy rains, caved in upon him. Luckily it missed his head, but he was severely bruised and cut, and his escape from death or serious injury was a very narrow one.
