And not only Mr. Wood's "transcendent he had approsed, for before half the ionracy home had been accomplished the funds can out and the Province was again called on for assistance in order that they might find other lodgings than the Chicago station house. For all this Mr. Wood is entitled to a due amount of credit and as such we give him all the credit his abilities deserve.

Whether our friend thinks it or not the shilities of Mr. Wood have not been so "tennscendent" in his county's interests, and it is very doubtful whether any other men could have been elected for so long a term and done so little in return. True, he managed to saddle upon us many heavy sailway debts with the hope of having competing soads, and then voted for a charter to make them one road and do away with all competition. His abilities further lead him to take away \$1,200 of their take away \$1,200 of take \$1,200 of this country's money each year received their trip across the continent. from licenses, but which he and his Government have no more right to then they have to the private property of any citizen. We do not think it would be a very difhoult matter to find a representative equal ( to this or one that would be likely to do less than Mr. Wood has done for the county of Victoria. At all events we should know where to find him on any public question, which is much more than one be said of Mr. Wood, and would not like him be prepared at a moment's notice to suffender the interests of his constituents to those of his Government and a railway monopoly. Bad indeed will it be for the future of this county if no better or more true representative can be found than Mr. Wood or one that is so lost to all sense of honor and self-respect that he is ready at a moment's notice to either go on a big spree at the country's expense of at a nod from his leader will surrender the interests of those he was elected to protect to the charlatanism of Mesers. With all due respect to our friend's opinion we think a representative can be found in Victoria county who will be above such trickery, and if he has not the "transcendent abilities" of Mr. Wood in punishing appolinarie water will at least have sufficient ability to look after the interests of his constituency and to protect our farmers from the greediness of railway monopolies as well as the centralization of all municipal

If the Government were in debt and could not get along without it as it likely will be if Mr. Wood taken another northwestern trip there might be some excuse for drawing on the municipalities for this amount, but as Mr. Mowat claims to have over four millions in the treasury now, poverty cannot be urged as an exerce. The real truth of the matter is that the Mowat Government in its reckless extravagance cannot get along without large sums of money and in order to keep up its pretense of a surplus for an election cry is prepared to stoop to any injustice to effect its purpose. This the Globe knows well, and hence the attempt to discuss Quebec local politics, a topic on which the Mowat license system has nothing whatever to do.

BRITISH GRAIN TRADE.

A leading grain circular says there has been a copious rain in almost all the disposition of either alliance or hostility to tricts. The progress of the harvest is greatly impeded, but the wheat trade was quiet, as foreign supplies quite suffice to meet the demand here. There has been an extraordinary large arrival during the past three days. Although most kinds of wheat support previous rates, Red American winters slightly favor burers. Maize is steady. Seven wheat cargoes off the coast were yesterday withdrawn from sale. Fifteen remain unsold. At Thursday's market white wheat declined Id. and red Id to 2d from Tuesday's rates. Flour was in fair demand, but prices were unchanged. Corn relapsed a half penny. LINDSAY MARKETS.
