\$500,000 TO LOAN \$500,000 G LOAN in sums of \$300 and upwards, on improved farms, in the older actived portions of the County of Victoria: he interest charged is eight per cent., and is not required in advance thereby giving the borrower the use of the money for the full term of the lean. Horrowers must bear in mind that when they pay back by instalments of principal and interest annually, they do not have the use of the money for the term of years they borrow and thereby pay, double the rate of interest. his makes the plan of borrowing for a term of years and only paying the interest annually by far the most favorable for the borrower.
