The Victoria Warder

THURSDAY, JAN. 7, 1875.

The Office of the VICTORIA WARDER is removed to Hamilton's new block, north side Kent street, next door to Hamilton's Carriage Shop.

KINGSTON ELECTION.

Few electoral contests have excited such wide-spread attention as the struggle between Sir John Macdonald and Mr. Carnuthers at Kingston. It had been the Grit boast for years that unless aided by Government influence, that constituency could not again be won for the Conservative chieftain. Under the ballot, they said, the Grit nominee could walk the course. All shallow pretence has suddenly collapsed. Sir John had to fight under very discouraging circumstances. The forces of two corrupt and unscrupulous Governments were arrayed against him. No stone was left unturned to crush out Opposition by Government influence, or to buy it off by Government money. The Ministerialists, who spent untold sums in Kingston at the last election, were more lavish than ever in their outlay of hard cash. The long absence of the Conservative candidate, during the many years that public duty monopolized his time at Ottawa, told heavily against him with many of the electors. He had also to contend with the prejudices aroused by the fierce attacks directed against him on account of the over-zealous conduct of certain of his friends in the last election. Yet, under the weight of all this, Sir John has achieved a victory of no ordinary significance. The fact of a reduced majority compared with last January simply demonstrates that Government influence was brought to bear with more effect than formerly. At the general election, there was no opportunity for Mr. Mackenzie to concentrate his efforts against one particular opponent. But the victory of the leader of the Opposition in a constituency where the Government is able to put on the screw as it can at Kingston, is a sure sign that Grit influence is everywhere on the wane. The ancient city has done well; and in the fight upon which we are now entering, many a constituency in Ontario will take courage from the example of the Kingston Conservatives in winning victory against such seemingly hopeless odds.

WHAT HAS TO BE DONE.

The decisive day is rapidly drawing on. Next Monday for the nominations, and the Monday following for the elections, will leave but a short interval for the work which has yet to be done. During the next ten days a heavy responsibility will rest upon every elector who feels it his duty to oppose the present Government. Let all such be unremitting in their efforts to place the political questions of the day in their true light before those who are inclined to waver or to abstain from voting. Let them remember that a single vote may carry the day; that on their individual action may hang victory or defeat. If every Liberal Conservative in the county will go into the contest with the determination to use all constitutional means to win victory, the two divisions of Victoria will henceforth protest unitedly against the policy of extravagance and dishonesty.

THE BEGINNING OF THE END.

That individual must be wholly blind to the signs of the times, who does not recognize in the recent elections to the Commons, unmistakeable indications that the days of Grit supremacy, whether in the Dominion Parliament or in the Ontario Legislature, are fast drawing to a close. In the result at South Simcoe, at Niagara, at Centre Wellington, and at Kingston,—not to speak of their near escape in the northern division of this county,—the Government may read, plain as the hand-writing upon the wall, the judgment which is about to be recorded against them. They have been tried in the balances, and found wanting. The two-headed monster that has stood with one foot at Ottawa and the other at Toronto, is tottering to its fall. The campaign in Ontario will be brief, but decisive; and in the decision of the electors of this the premier province, the Government of the Dominion too may read its fate. Let true and good men everywhere put their shoulder to the wheel this next fortnight, and the incubus that has so long weighed down the province can now be thrown off.

TROUBLE AHEAD.

It is impossible to view the present aspect of affairs in the United States without serious apprehensions. The constantly recurring scenes of anarchy and bloodshed in the South are arousing a spirit of bitter resentment in the North. Last November's Democratic gains have only embittered the feeling on both sides. The party that insist upon the right of local self government in the fullest acceptation of the term, find themselves, though possessing an actual majority in the House of Representatives, shut out from power for another eighteen months; while the Grant party, whose aim has been to centralize the whole functions of government at Washington, is incensed beyond measure by the prospect of loss of power. The Buffalo *Commercial Advertiser*, ordinarily a sufficiently moderate and sagacious organ of the government, actually calls out in its largest type for an army of "fifty or sixty thousand men" at once, in the face of the "imminent danger." That paper asserts that 100,000 well-equipped men are "ready to spring to arms at the call of Southern leaders to fight against any military attempt on the part of the Federal Government to enforce the constitution." If half of this be true, our neighbours have trouble ahead.

THE POSTAL SERVICE.

It is announced that an important agreement has been come to, between the Governments of the Dominion and of the United States, having for its object the "unification of the postal "system of the two countries in re- "spect to correspondence exchanged "between them." Under this arrangement each country will forward and deliver, free of charge, correspondence received from the other; such correspondence being prepaid at the ordinary rate at present charged for its transmission within the limits of the country where posted. The reduction of postage to and from the United States will no doubt tend to increase the correspondence between the two countries; but that increase will be at a considerable expense to the revenue. If our postal department were producing a large excess of revenue this would be of little consequence; but the contrary is the case. Most people who give the question their serious consideration will probably arrive at the conclusion that whatever additional facilities the postal department can afford to grant, would be more advantageously directed towards the development of internal and "domestic" correspondence, rather than that with a foreign country.

THE BALLOT.

Modern history teaches us nothing more definitely than this, that in the hands of reckless rulers, whether Imperial autocrats Republican demagogues, there is no more serviceable tool than the ballot. Secret voting, whatever may be its theoretical advantages, opens the way in practice to almost innumerable evasions of the law. Under the manipulation of Imperial prefects, the ballot in France became the snare in which popular liberties found themselves engulfed; in the United States it has proved the medium through which a thousand corruptions have fastened upon the body politic; in Canada, a few months' experience has been sufficient to show that Grit ingenuity is capable of perverting the same agency to the vilest ends. It is no exaggeration to say that the conduct of the Government in regard to the Montreal election has caused a feeling of dismay throughout the country. And with that feeling there has been aroused, too, a feeling of stern indignation. There is a limit to popular endurance; and Mr. Mackenzie may find that his refusal to permit an examination of the ballots by which Mr. White was defeated, will prove the turning point in the short-lived term of Grit ascendancy.

SPAIN.

Once more a change has come over the face of affairs in the Iberian peninsula. When the feeble Spaniards arose a few years ago and drove Queen Isabella into exile, there were many who prophesied that the return of the Bourbon family was only a question of time; and that the only doubt was as to which branch of that family would in the end be successful. In the years that have passed Spain has been rent by internal conflict. For a few months the reign of the young Italian prince who was induced to accept the crown, promised well, and under his rule there was, for a time, peace. But the haughty Spanish pride could not brook a foreign king; so once more there came chaos. Three years more of turbulence and anarchy,—Republicans, Communists, and Carlists, engaged in fierce internecine strife;—and now a silent and apparently thankful reverbation has placed upon the throne Alfonso, prince of the Asturias, [illegible] of ex-Queen Isabella. An official despatch from the Spanish Minister of the Interior announces that Alfonso is unanimously accepted as King by the army, the navy, and the ministry.

MORE SLANDER.

Last week the readers of the Grit sheet published in this town were treated to one of the semi-occasionally fits of Globular personal vindictiveness which, during times of election or other excitement, usually attacks the worthy who conducts that veracious journal and his local inspirer. Those of our readers who have perused that column of personal abuse against some of our most respectable townsmen know full well that abuse coming from such a quarter is a surer sign of respectability than the most fulsome flattery. That he must follow the lead of his master is evidently clear, but we are pleased to note with a like result his scurrility like that of the *Globe* is sure to bring victory to those who are fortunate enough to incur his displeasure. For evidence of this we would merely refer to the votes recorded at our municipal elections. There is no respectable person in our town whom we have heard refer to the matter but thoroughly condemns the low personalities contained from time to time in the writings of that sheet. We do not think the article in question of so much importance as to notice it at length, as we consider the ratepayers for whose benefit it was written gave their verdict upon the matter.

THE PRESS.

The "Liberal," Toronto, a new daily journal expected to take a prominent position, will be issued by J. Cameron & Co., of the London "Advertiser," about the 20th inst.

The Brampton "Conservator," a sprightly 28-column journal, has lately come into existence, and will doubtless be an able exponent of the true faith in that locality.

The "Weekly News" (Milton) is the name of a new and promising aspirant for journalistic honors, which bids fair to be a credit to the Liberal-Conservative party it represents in the County of Halton. It is edited by Mr. T. H. Burns, and has already secured, in its fifth number, a liberal amount of support from the local merchants.

Our old friend, the Belleville "Intelligencer," is to the front again after its second severe "baptism of fire." On Saturday evening, the 26th ult., a fire occurred in the establishment, which soon reduced the stock-in-trade to a most desolate-looking mass of "pie" of the worst kind. The "Intelligencer" makes its appearance this week in a half-sheet form, and arrangements have been already made for the speedy production of the paper in its original form. The following is from the report of the fire given by the sufferer:

"As may be imagined, the office presented a desolate appearance after the fire. Scattered over the floor in every direction lay the type which had been used in printing the newspaper, mixed with half-burnt wood, coal and plaster; whilst on the racks on which they were kept, were the large wooden types used for poster printing, bent, twisted and curved out of all useful shape by the combined action of heat and water. On the imposing stones lay the pages of the daily and weekly paper in a most discouraging condition, viewed with the eye of a printer. Here an election address had been mixed up with somebody's more prosaic advertisement; there a handful of editorial, half melted, still holding forth boldly against political tergiversation, at least such of it as could be read after being cleared of its coating of plaster and coal. In one corner were some cases partially burnt, and the type which they had held melted into one solid mass; and close by was the faithful power press which our readers have, for upwards of eleven years been supplied with printed sheets, its wood-work gone, many of its vital parts twisted and warped with the fierce heat it had encountered, and altogether in a very bad condition—damaged, indeed, to such an extent as to be valueless for the time being. The whole loss may be summed up as follows: Newspaper material and outfit, a total loss, $7,500; insured for $6500 in the Queen. Newspaper press $1,150; insured for $750 in the Royal. Building $2,000; insured for $1,000 in the Provincial and Queen."

HEAD LAKE.

From our Own Correspondent.

There is about one foot of snow here; the weather is cold, and snow still falling.

Our temperance order is increasing; we have now 28 members in Head Lake Temple and 51 in Uphill Temple.

Mr. Washington is busy taking out saw logs, and so is Mr. Pinsbrook, for the purpose of supplying their mills next summer.

Our ratepayers are busily preparing for the elections. Mr. McRae is a strong man in this neighborhood and will secure a big vote here.

At the nomination on the 28th, the result was as has been reported in the Warder, the re-election by acclamation of the old Council; John Kelley, Esqre; Richard Rikers, Jas. Campbell, Jas. Perkins, Jr., and Edward Rutterworth, Councillors.

There were three names omitted from the voters' list—all Cameron men. Mr. Lapp, another Cameron man, marched away from Cambridge here to vote for his man, and declined to take the oath because he thought it was incumbent on him to be a resident. 'Mr. McLennan's agent was very busy swearing every third voter.

The population in this Township is rapidly increasing. Since last August a great many births have been registered here—for instance—the wife of John Tyers of a son; the wife of Hugh Bailey of a son; the wife of George Winterbourne of a son; the wife of Jas. McDonald of a son; the wife of Henry Davy of a son; the wife of Thomas Southern of a daughter; and two or three coming on. Hurrah for Lenton!

[Another correspondent writes from this neighborhood, confirming the foregoing statement. We shall be glad to hear from such a quarter when it is prepared to give us the name, not for publication but as a guarantee of good faith.]

The Dominion Telegraph Company have made a still further reduction in the cost of telegraphing by establishing a tariff of fifteen cents for ten words and one-half cent for each additional word on messages received by them for transmission between points in Canada after six p.m. The step is much to be commended, and one that will no doubt be appreciated by the public generally.—*Mail.*

ALL AROUND US.

Pa-tah-se-ga, the popular Indian lecturer, will hold forth in Orillia on the 11th instant.

The Joseph Hall Manufacturing Co., of Oshawa, are purchasing new premises and enlarging their business generally.

The Fenelon Falls folks, says the 'Gazette,' hanker after the ballot wherewith to vote for the village fathers in a quiet manner "unbeknownst" to any body.

The "Expositor" reports a Christmas spread under the auspices of the Orillia foundry men, and pointedly remarks the fact that it was strictly a temperance affair.

Mr. Kean's canvass in East Simcoe is progressing very satisfactorily, and, says the 'Packet,' he is receiving the hearty support of many who rank themselves with the Reform party.

The Cannington folks are discussing the advisability of fitting up their town hall for the purposes of a court room, their attention having been directed thereto by a notice from headquarters.

The Brantford police force return thanks in the columns of the "Courier" for the very handsome present of a turkey which formed the staple item of their Xmas dinner. The Lindsay police force has yet to be heard from.

On the morning of the 4th inst., about eight o'clock, the residence of Dr. Byers, of Bracebridge, was destroyed by fire. Nearly all the household furniture was saved. It is believed that the premises were insured for $400.

A daring safe robbery was effected on New Year's Day, at Mr. G. A. Smith's dry goods store, Guelph, when funds to the amount of $4,000 were abstracted from the safe. No clue has yet been obtained towards the ferreting out of the burglars.

A quarrel between two men named Wm. Hiney and Wm. Boyle, in a shanty, in the 7th Con. of Hope, resulted in the infliction of a dangerous wound from a revolver pointed by Boyle at his antagonist. The 'Guide' says that Hiney is hardly expected to survive.

A sad gloom has been cast over the village of Port Perry by the sudden death on the 2nd instant of Mr. Charles Paxton, also by that of Mr. Daniel Ireland, having on New Year's day accidentally shot himself so seriously as to leave little hope of his recovery. Both gentlemen were much respected.

The Port Perry "Observer" reports the destruction by fire on the 30th ult. of the residence of Mr. Wm. Vickery, sr., of 3rd concession of Reach. All the household property was destroyed, also some $900 in bills, and the inmates had a very narrow escape. There was an insurance on the property of $600.

The Peterboro' 'Times' says:—"On Christmas evening the Flax Mill at Ashburnham was burned to the ground with its contents, a portion of the machinery being saved. The curling rink on one side and some piled lumber belonging to Mr. Rogers, on the other, were both ignited, and were with difficulty saved."

Mr. Beatty shipped 2,835,547 feet of lumber this season, also 445,700 lath, 444,500 shingles and 11,681 pickets. The Parry Sound Lumber Company have shipped 7,185,215 feet of lumber. The latter company have enlarged their mill to a capacity of about 80,000 feet in 11 hours. The Guelph Lumber Company have recently erected a large mill here.—"North Star."

A most destructive fire is reported at Collingwood, on the 3rd inst., by which many prominent citizens have been heavy losers, the estimated loss being about $25,000. The principal sufferers are Messrs. J. Fagan, T. Lawrence, J. Greaves, W. R. Baker, E. Seager, J. B. & D. Henderson, P. Howard, E. C. Florence, J. Castor, G. McLean, and the proprietor of the Albion hotel.

A correspondent of the 'Mail' writing from Muskoka, says that the distance from Port Hope to Gravenhurst is 112 miles; from Toronto 116 miles; from Port Perry 80 miles. From these places to the Canadian Pacific is set down at 202, 206 and 170 miles respectively. The writer says that the Northern by taking the east side of Lake Muskoka will add to their mileage from twenty-five to forty miles.

The Rev. Charles Freshman, D. D., formerly a Jewish Rabbi, but converted to Methodism, and who has for three or four months conducted the Westminster Church, at London, Ont., died on the morning of the 4th inst., from congestion of the lungs, caused by being thrown from a sleigh on the 23rd ult., whereby he broke several ribs. His loss is deeply regretted. The reverend gentleman was not long since assistant minister of the Lindsay W. M. Church, and his loss will be equally regretted in this locality.

The Port Hope 'Guide' reports the opening, under very promising auspices, of a new Y. M. C. A. hall in that thriving town. The building, says that paper, "is two stories in height, 26 feet wide, and 44 feet deep. Its cost when completed and furnished will exceed $12,000. On the first floor is a lecture room 33 feet by 63 feet, library and secretary's room; and above there is a room for reading and prayer meetings; besides others for classes or occasional purposes. The contract for its erection was entrusted to Mr. P. R. Randall, and has, we believe, been carried out very satisfactorily."

From an interesting report in the 'Independent,' of a concert, given in the new town Hall, Bobcaygeon, in aid of the building fund of Christ Church, we clip the following: It was more numerously attended than any meeting previously held in Bobcaygeon, large parties from Lindsay, Omemee, Peterborough and other places being present. The reserved seats were all taken, and the hall was well filled in every part. H. T. Wickham, Esq., Chairman of the Committee, presided. The piano which was a very good one, was kindly lent by Miss Simpson, and the decoration of the hall was tastefully performed under the superintendence of Mr. Bottum. Punctually at eight o'clock, Mr. Wickham conducted Mrs. Boughton and Miss Clarke to the instrument, and those ladies played a rather difficult duet with considerable skill and judgment. This was followed by a song from Mr. Wallace of Lindsay, "The White Squall." Mr. Wallace has a bass voice of good quality, he has it under perfect control, and manages it with excellent effect, but this particular song did not enable him to display his powers to advantage, and it was not until he sang "The Larboard Watch," with his brother, that the full effects of his really fine organ were developed. The Bobcaygeon audience were fairly taken by surprise, for they had enjoyed but few previous opportunities of hearing the grand and massive vocalization of a good bass. Then came Miss Cottingham, the 'prima donna' of the evening, with the song "Spring,Spring, Beautiful Spring." Miss Cottingham possesses a soprano of considerable compass and purity, and it has been trained with care and skill. The consequence is that Miss Cottingham is unrivalled as a vocalist in this section of Canada. She subsequently sang "The Sacred Banner" with Miss Beatty. This duet was the gem of the evening, and was really a very perfect piece of vocalization, for in that the only deficiency that can be attributed to Miss Cottingham's singing—a want of dramatic effect and expression—was not in the least observable. Miss Beatty sang "I'd choose to be a daisy" so nicely that it was redemanded, and she likewise sang "Tyrolo Lovely Dell," with so much feeling as to cause protracted applause. Mr. Hodge's song of "Good-bye at the Door" was so well received that it was encored. Mr. Tupper and Mr. Holland each sang several songs of a humorous character which were most favourably received; their song of "Rhine Wine" was loudly applauded. The proceeds of the concert were considerable, and will add a nice sum to the Building Fund of the Church.
