 This is the only one that will cure the disease and restore the system to its normal condition. It is the only one that will cure the disease and restore the system to its normal condition. It is the only one that will cure the disease and restore the system to its normal condition.

Midland District Notes.
 Sidney R. Stokles was sentenced at the Northumberland and Durham quarter sessions last week to three years in the Kingston penitentiary for poisoning a horse belonging to a neighbor.

A baseball match between the clubs of Hartley and Palestine, played on the 21st, resulted in Palestine being beaten. Nine innings were played, Hartley winning by nine runs. This is the second victory gained by Hartley over Palestine.

A young girl, an inmate of the Orillia idiot asylum, recently eluded the vigilance of her keepers and escaped from the asylum. The official went in hot pursuit and succeeded in capturing, not the fugitive, but a servant girl who was walking on the esplanade near the asylum. There was a resemblance in the manner in which the hair of the two girls was dressed, said the keeper.

Friday evening Mr. R. M. Goodman, of Oshawa, made a serious mistake in taking a teaspoonful of acetic acid instead of another medicine on which account he had a very narrow escape from a painful death. He was at once given a dose of goose oil, which somewhat relieved him. Although he lay at death's door for several hours he is now convalescent.

James H. Duffy, aged 28, was found drowned at the foot of Bay street, Toronto, last Friday evening. Deceased had been missing five or six days. He was the son of James Duffy, the well-known hotel-keeper, who died three months ago. His father left all his property to his daughter and two other children. It is rumored that deceased snatched an account of being out of the inheritance.

A fatal accident occurred in Monck township on Tuesday about noon, by which Gilman, the young son of Mr. W. Gibson, lost his life. While working in the woods an old tree stub fell upon the boy, prostrating him to the earth, and causing his death before medical aid could be obtained. The deceased was about fourteen or fifteen years of age, and was the only son in the family; consequently his loss will be the more keenly felt.

The Times says—"It is the opinion of not a few well informed railway gentlemen that after all the talk about the Midland Railway workshops, no other than at present will be built, at least not for some time. The works at Port Hope will be gradually enlarged to meet the demands of the road in running repairs, while all new works and heavy repairs will go to Montreal, as was the case with the G. W. R. after its amalgamation with the Grand Trunk.

The Brook house, Oshawa, was entered during Thursday night at an unknown hour, by some one well acquainted with the premises, and one who was audaciously free enough to take from the bar till \$20 in cash. From there he went to the bedroom of Mr. L. Brooks, snatched his pants from under his pillow and made off with them. The pockets contained \$20 in cash and a cheque for \$20, drawn by Mr. H. G. Gibbs in favor of Mr. F. Motherill.

The crop of strawberries promises to be enormous this season. Peterborough alone will contribute no less than thirty-five thousand quarts, and in addition to this about twenty thousand quarts have been contracted for from out of town, which will make a total of some fifty-five thousand quarts to be disposed of in Peterborough within the next three weeks. There will be a lively and jolly time with the luscious fruit, and the prices that now rank among the tens will probably drop to more insignificant units.

G. Thorn, V. S., Port Perry, performed an intricate surgical operation a few days ago on a valuable mare, the property of Mr. Thomas Smith, of Port Hoover. For some time past a film had been observed forming over one of the mare's eyes, and after examining the eye he administered chloroform to the mare and on thorough examination found that the sight of the eye was destroyed and a worm about three inches long lodged in the eye. He succeeded in removing the worm; the eye will soon heal but it will be sightless. Mr. Thorn states that in all his practice he never before had a similar case.

The concert held in the town hall, Bethany, under the auspices of the Bethany brass band on the evening of Wednesday was more than fairly attended. The citizens made a noble turnout, which shows their zeal for the maintenance of the band. The overture was a selection from the orchestra, under the leadership of Mr. A. Staples, which gained repeated eulogiums from the assembly. The singing and instrumental music given by Miss Lamb and Miss English, of Oshawa, were received with delight, and were encored sounding through the hall after their retirement, and, with courtesy unsurpassed, they favorably responded. Mr. A. Sherwood, of Port Hope, gave a recitation which merits praise, and adds credit to the town in which he resides. The songs given by Mr. Duncan, accompanied by Miss Richardson, of Millbrook, were re-

ceived with avid by the listeners, and repeatedly were they encored, each time achieving a greater success than before. The chair was taken by R. Grandy, jr.

John Atkins, the principal in the Centreville murder, indicted for manslaughter, but found guilty only of assault, has been sentenced to three years in the penitentiary. The judge's charge to the jury was the prisoner should have been tried for murder.

On Sunday a little son of Mr. A. B. McLean, of Woodville, came near losing his life by drowning. It seems the little fellow was looking into the stream when he fell head first into it. There being five feet of water he would quickly have been drowned, but on rising to the surface he managed to grasp the edge and cry for help.

The large barn and stable belonging to Mr. Robert Johnson, 14th con. of Markham, were completely destroyed by fire last week. The fire is supposed to have originated in some mysterious way in a straw stack in close proximity to the barn, and quickly spread to the buildings. Several animals were burned, and a quantity of grain. A small insurance was on the buildings.

The wife of James M. Campbell, a former resident of Newberry, Mich., was taken sick on Sunday, June 2nd, and was delivered of a son (still born). Mrs. Campbell still lies in a precarious condition, but there is hope of her recovery. She is a daughter of Roderick McIntosh, of Dalton township, and is well known in this vicinity. She will have the sympathy of all acquaintances and it is hoped she will soon recover.

On the arrival of the Rev. S. Salton, at Brooklin, from conference Friday night, a large gathering of his many friends took possession of the parsonage. The ladies at once went to work and spread the tables as if for a wedding feast. After the rich feast had been fully appreciated by all an address was read by Mr. and Mrs. Salton, accompanied by a well-filled purse; short addresses were given by several of the company, after which Mr. Salton replied in appropriate and touching terms; he expressed his unworthiness of this another kindness added to the many he had received from the Brooklin friends. He would always have a place in his heart and memory for Brooklin, and would turn to it with mingled feelings of joy and sorrow.

The veteran editor of the Port Hope Guide tells this little story. He knows how it was. He was "thar." Some forty years ago, in the township of Markham, Jake went one Sunday night to see Susie. They were sitting one on each side of the old-fashioned fire place, fully six or eight feet apart. Jake's heart went pitty pat. He couldn't muster courage enough to get an inch nearer Susie. At last Susie started Jake by saying, "Quit pinching me!" "I ain't pinching you!" "Well, don't you intend to?" "No, I don't." "Then, Jake, you had better take your hat and start for home"—and he started. But the affair got out some way, and Jake never heard the last of that Sunday night's courtship.

A process has been discovered by Mr. John J. Blair, of Ardes, of North Orillia, by which hydro-carbon oil is at once converted into a gas of high illuminating power. The principal novelty of this process is that the oil about to be converted into a gas is partially oxidized so that it is converted into a hydrated bicarbonic oxide. The density of this gas is one-half greater than carbonic acid. It can be carried in an open vessel as if it were a fluid. With the apparatus now designed any housewife can in ten minutes manufacture enough gas to illuminate the house for twelve hours. The gas cannot be exploded by ordinary means as it requires a large quantity of oxygen to render its combustion perfect. It cannot fail to be of great utility in the near future and will render brilliant lighting feasible in every home at a fraction of the cost of coal oil. It is to be hoped that Mr. Blair (who has an experience in chemical and electrical research second to none of his day) will at once give the world the benefit of this discovery.—[Times.]

The frequent showers accompanied by warm weather are forcing vegetation forward in an almost unprecedented manner; especially in the case with grass, and we may add weeds of all kinds. Grain is also growing rapidly where the land is not too wet, but in the wetter portions a great deal of it has been drowned out, especially along the edges of the furrows and lower portions of the fields; and in almost all cases where the grain plants have been killed or considerably thinned by the wet, a rank growth of weeds is making desperate efforts to choke out the little grain that is left. Owing to the protracted wet weather an unusually large percentage of land is still fallow and is likely to continue so, especially in the case with land intended for late crops. In many places the earlier planted fields of potatoes did not come up regularly owing to a portion of the seed rotting in the ground, but in the case of late planted potatoes, even in places where the land was not dry as it ought to have been, the plants have made a rapid and vigorous start and give promise of large returns although the bug seems as troublesome as usual. From present appearances hay will be an enormous crop, and the same may be said of fruits of all kinds, strawberries making an especially fine show, but a speedy return to dry weather is necessary for the ripening of the young berries.

Messrs. R. & G. Strickland have purchased from Messrs. Thompson Smith & Son their limits in the township of Ridout and Shebourne. The timber and logs from these limits will go to Lakefield, their waters being tributary to the Otonabee river. These limits added to those previously in the possession of the firm will afford a supply to the Lakefield mills for many years to come. Messrs. Strickland have also purchased from Messrs. T. Smith & Son their large steam saw mill at Bradford, at which they propose cutting the logs from the limits in Oakley and Hinton, which they purchased from the Dominion Bank the year before last, and on which they estimate that they have over 100,000,000 feet of lumber. This estimate does not include the north-west quarter of Oakley, which Messrs. Strickland lately sold to Messrs. Thomson & Baker, of Hamilton, for \$30,000, and on which it is estimated that there is about 3,000,000 feet of lumber, but which the firm sold on account of its not being tributary to the waters in connection with their mills. The capacity of the Bradford mill is 100,000 feet in twelve hours, and being situated on the Northern railway, about forty miles from Toronto, it will find a ready market there, not only for the lumber, but also for the slabs and other mill refuse for fuel. It is possible that the Midland railway may see the advantage of making an extension from Atherley to Black river, so as to put themselves in a position to carry the lumber of the extensive limits in the district. If this were done Messrs. Strickland

would remove the mill from Bradford to the Black River. It is currently rumored in both Port Hope and Peterborough that Mr. W. T. R. Preston, of the Port Hope News, has accepted a position in the insurance office of Mr. Geo. A. Cor's office, and that the G. & H. management is about to buy out the plant of his paper.

Ninety-five plum pits which caused great trouble were found in the stomach of Mr. Jas. Nicholls, of Aurora, during a post mortem examination. Many believe that swallowing the stones prevent difficulties consequent upon eating green fruit. It is an erroneous impression.

A young Englishman named Jacobs was recently drowned near Bayville, Muskoka, while running Holman's rapids. The heavy laden boat became partially filled with water, and Jacobs stood up in alarm, thus capsizing the boat and throwing all the occupants into the water. All except Mr. Jacobs reached the shore.

On Saturday last three boys while bathing in Lake St. John got beyond their depth, and before assistance came one of the three named Murray had floated under some logs and was drowned. The other two had a narrow escape, one being unconscious when taken out, but with the persistent efforts of friends animation was restored.

The Advocate says "we have had two mammoth eggs placed on our table for inspection. Large eggs have now become almost a drug on the sensational market, and although we do not expect ours to champion we will give them a chance: One furnished by Mr. B. F. Andrews, of Argyle, measures 4 1/2 inches, while another by Mr. H. Edwards, of Woodville, is 4 1/2 inches."

On Friday Mr. Daniel Parliament, of the 14th con. of Brock, went out to the field to catch a horse, when the animal kicked him in the side, causing such injuries as resulted in his death on Sunday evening. No one witnessed the accident, and it was two hours afterward before he was found—his prolonged absence causing a search to be made. The deceased leaves a wife and large family to mourn his untimely death. Strawberries have been for some weeks in the market, but are still too high in price for general use. The Ontario crop this year is backward, like every other product, but promises to be very large and of good quality. In a good year there is no more profitable crop than that of strawberry. During the height of the season the yield is about 500 quarts a day per acre, so that one day's picking, at seven or eight cents a quart wholesale, is worth more than an acre of wheat. And this can be repeated many days together. It is probable that an acre of strawberries, in a prosperous year, is worth to the cultivator about \$300. It is little wonder, then, that the attention paid to the raising of this luscious fruit should be much greater than formerly. The only matter of surprise is that it has been so long comparatively neglected. Besides being among the very lightest kind of farming, demanding a minimum of labor, it is among the most remunerative. Yet there is not enough grown in this district for local consumption. Although large quantities come here from Oakville and elsewhere, the profits of the local grower are not materially affected. It will be seen that under such circumstances there is a good deal of room for expansion in the culture of strawberries hereabouts.

It is probable that Captain Webb, who swam the English Channel in 1875, will swim the terrible whirlpool rapids below Niagara Falls on July 21st. Capt. Webb was born in Shropshire, England, and is the son of a physician. He took to the sea early and became the captain of a merchantman. Many years ago he jumped from the deck of the Cunard mail steamer Russia during a storm to save a sailor who fell overboard. For this act he received from the hands of the duke of Edinburgh the first gold medal ever given by the Royal Humane Society. So daring was he as a ship captain that he could never get a crew to go to sea with him a second time. After his thrilling swim across the channel the 24th regiment, which was afterward almost annihilated in Zululand, gave him a Barmese cup taken in battle. He has a trunk full of decorations and trophies.

Rupture Cur ed
 By four months' use of the SUTHERLAND RHEUMATINE, I have cured my Rupture. I have been suffering with it for many years, and have tried every remedy, but have not been cured. I have now been cured by the use of the SUTHERLAND RHEUMATINE. I have been suffering with it for many years, and have tried every remedy, but have not been cured. I have now been cured by the use of the SUTHERLAND RHEUMATINE.

SUTHERLAND'S RHEUMATINE
 THE GREAT CURE FOR RHEUMATISM

IT IS A SURE CURE
 Testimonial from Mr. W. S. Wisner & Son, manufacturers of agricultural implements, Lindsay, Ont.
 J. N. SUTHERLAND, Esq., Dear Sir— I take pleasure in bearing testimony to the efficacy of your Rheumatine. Last spring I was completely disabled with Rheumatism, and tried various remedies, baths, etc., and finally heard of your cure. I purchased and used three bottles of it, and it effected a complete cure, for I have not had a return of the disease since.
 Yours truly,
 W. S. WISNER.
