Town Council.

A special meeting of the town council was held on Monday evening. The following members were present:—His worship Mayor Wallace, and Messrs. Ingle, Sinclair, Graham, Brady, Weese, Winters, Connolly, Cahill and Crandell.

"SPEECH FROM THE THRONE." Mr. Wallace stated that he had called the council together to take action on several important questions, amongst which was the fire system, and wished to hear something from the fire and water committee on the matter. He thought it would be a good idea to establish a water fountain on Kent street to be used for drinking purposes. The council would be asked to decide as to whether it would be advisable to paint the roof of it would be advisable to paint the roof of the town hall. Also to consider the very ineffective mail service of the town. The Bell Telephone Company's application asking leave at the council to place poles on Kent street, and a proposition from Col. Stevens on behalf of the Lindsay Paper Mills to the town buying an engine and better and leasing to said company will also require consideration.

THE SCALES. A communication was read from Mr. Denis Scully referring to the ineffective state of the present scales for weighing live stock. Mr. Winters informed the council that the matter had already been looked into, and gates and other improvements made. The communication was, however, referred to the town property committee with power to act.

SIOU STREET.

Mr. John Millburn by communication asked the council to take proper steps to have Siou street opened up, it having been closed by the Midland railway. Mr. Crandell hand the mayor would take action against the arbitrary power and not allow them to close our streets and railway cross the state that the town with railway cross that the town with so much contempt. Connolly concurred in this view. The mayor stated that he had done everything in his power to stop these nuisances except summoning Mr. Cox up in the court, but would ARGYLE. go to that extent if the evil is not reme-died hereafter. The communication was referred to the street and bridge com-

Clover is a heavy crop here the company the council thought that by this season. putting them up on a back street it would answer the same purpose. On motion an agent of the company was heard, who stated that their object in putting poles on the south of Kent was because the bulk of their customers was on that side. He thought only fifteen or twenty poles would be required. Other towns allowed them these privileges, and it would be pleased to afflict her with. impossible to carry on their business in committee without any guarantee from hale and hearty. the town that they will be allowed to remain there permanently. - Carried.

"TOO FAST." A petition was presented from Mr. P. G. Pilkie and sixty-nine others complaining of the over-rate of speed travelled by the Midland Railway Company's trains inside the corporation. The council was immediate steps to have the trouble

FIRE-PROOF PAINT.

A proposition having been made to paint the roof of the town hall with fireproof paint Mr. A. May was heard. He thought it would be a saving to the town as the building would have to be reshingled in a year or so in the event of it not being painted. It is also water-proof as well as fire-proof. He would paint the entire roof for \$100. Mr. Connolly favored leaving the matter open for the present on account of the heavy expenditure already this year. Mr. Crandell was sure the building would have to be re-shingled directly if not painted, and more than the price of painting. The majority of the council seemed of the same opinion, and the matter was disposed of by Mr. Crandell moving that Mr. May be given the work at \$100 providing the cown property committee deem

it expedient. WATER-FOUNTAIN.

The mayor thought that a water-fountain would be of great service to the citizens. There was a spring on Victoria avenue that water could be furnished from, and if a fountain was erected on Kent street it would be of great conveni-ence. He thought it could be built by IMPROVEMENTS.—Mr.

Col. Stevenson had spoken to the mayor as to whether the town would be willing to buy an engine and boiler and lease the same for a term of years at a nominal rent to the Paper Mill Company as a means of assisting them, as they were losing money by running with their present machinery. The mayor told Col. Stevenson he would hear what the council let them remove the mill for all the good it was to the town. Mr. Crandell thought we might at all events talk with them and see what can be done. Mr. Brady was of further discussion the matter dropped.

of all committees and if they do not act to get others that will. Mr. Connolly thought thers was no immediate danger as the water is high and has been all spring.

EAST WARD GRIEVANCES.

On motion Mr. Thos. Walters was heard in reference to several grievances suffered in the east ward. He thought the council did not deal fairly with that ward this year. The first was that the bridge near the tannery needed some plank in order to put it in proper repair; a culvert had been started near Mr. Cullon's shop and left in a dangerous state by the street and bridge committee; that some of the streets should be repaired; that the lighting of lamps on the bridges and streets had been neglected; and that a fair number of gas lamps should be given them. Mr. Crandell moved, security of the standing of the pupils at the June examination: onded by Mr. Cahill, that the chairman of the fire and water committee be requested to re-light the lamps in the east ward and on the bridges until the same is furnished by gas; also that the street and bridge committee see that the bridge is

attended to .- Carried.

A communication was received from Mr. Geo. Carr asking the council to furnish him plank enough to repair the dangerous state of the walk in front of his hotel and that he would pay all other expenses.-Referred to street and bridge

An account from Mr. Bannan of \$2 for clearing away nuisance in front of his premises on Lindsay street was referred to the finance committee.

Mr. Crandell gave notice that he would at next meeting introduce a by-law to prohibit cattle running at large if he sees that such a by-law will meet with the
