Mr. James Boyd, of the township of ownship of Ridout. He has now a gang of fourteen men employed, which will be increased to twenty in a few days,

Present appearances would indicate that there will be a much smaller outtake of saw logs this winter than usual. The difficulty in making sales of lumber, the fall in prices, and the lack of demand, together with the high price of supplies, will all tend to banish the amount of stock to be taken out this season to only what is actually required. Mill men say that it will pay them better to let their limits stand for a year or two than to manufacture their lumber at any lower price than obtained at present.

Pratt's hotel, outbuildings and stables at Rosseau were completely destroyed by fire at 1:30 Saturday morning. A small quantity of furniture was saved. The contents of the stables were nearly all saved. 'The fire originated in the upper storey, and made rapid Leadway before being discovered. Nothing could be done to save the building. He asked the plaintiff to put them by until his wife could call in and see them. The jeweller put them away, but saw no more of his customers until March last, when the young wife called and said she was to see the articles laid past by her husband for her. She thought they would do, and inquired if the jeweler would wait for his money till after harvest. This he consented to do, and thereupon his customer purchased jewelry to the further value of \$20. When the flowers were in bloom and the honeymoan was over the defendant called on the plaintiff and asked if the wife had got a watch and chain from him. DENTIST. Nearly 23 years experience.

Mr. Gross is using for his best dental plates Gold, Platina and Black Rubber, three of the most reliable materials now in use for the purpose. Mr. Gross uses the purest English Black Rubber, and never, during his experience of nearly twenty-three years, has he been so uniformly successful with any material. Black Rubber is non-irritant and non-conducting, and cannot therefore produce congestion or any other disease of the mucous membrane of the mouth. Thousands of people who have been not only annoyed but actually tortured by the attempted use of red rubber and other poisonous plates are today wearing Black Rubber plates with pleasure, never before known in their experience with artificial teeth. An attempt is being made by a certain non-plussed dentist to force upon his patrons a humbug, called a "gold alloy plate." Do not be deceived by it. It is nothing new, but an old thing revived, and does not contain an atom of gold. Mr. Gross has a sample of the renuine article from which gold alloy plates are made, and any one can see it by calling at his office. He will make plates of what is called gold alloy or ofred rubber for persons who want such plates after their poisonous nature has been fully explained. If you are about getting artificial teeth and want something that is good, and that will stand the test, get them made on Gold, Platma or Black Rubber, and you will have no cause for regret. In some respects the Black Rubber is superior to either of the meta's named and can be furnished at about one-fourth their price. A full upper or under set of teeth from \$9\$ to \$65. Mr. Gross is using Luquified Nitrous Oxide Gas, the purest, safest and most reliable form of gas in use. Electricity successfully used.
