MILLEROOK

FIRE, -Wednesday night about halfpast nine o'clock a fire was discovered in the stove denot of Mr. Those Phillips Dut the flames had spread so rapidly that it was aseless to try to put it out, and the only alternative was to mount the massive block belonging to Messrs, Wood & Keels, near which stood the frame stove depot, and kept it from danger, which had to be done by men carrying water in pails.
It was only by the greatest exertion that
they succeeded in keeping the block from taking fire, which, if it had, would have swept the whole town, as there are no water works. It is not known how the fire originated. Philip's insurance is \$1,000, but does not near cover the loss.

A RAID ON THE TTALIAN CAMP. -A correspondent of the Port Hope Guide writes as follows:—On Wednesday night last a party of nine or ten young roughs who had got pretty full of whisky, undertook to rob the Italian camp near that willage, but the Italians wouldn't be robbed not much. They made a sortic and captured two of the would-be robbers, tied them together by their thumbs, then wet the cord and kept them in that position until morning, when the whole camp escorted the prisoners to Millbrook, where an investigation took place before prisoners, who proved to be young injured by frost. men, farm hands in the vicinity, were remanded until Friday. The prisoners were up on remand on Friday morning and dismissed. The Italians, about one hundred and fifty strong, were a dis-gusted crowd. Public opinion here is with the prisoners.

Black Rubber is non-irritant and noneconducting, and campost therefore produce congestion of any other disease of the mucous membrane of the mouth. Thousands of people who have been not only annoyed but actually tortured by the attempted use of red rubber and other poisonous plates are today wearing. Black Rubber, plates with pleasure, never before known in their experience with artificial teeth. An attempt is being made by a certain non-plussed dentist to force upon his patrons a humbug, called a "gold alloy plate." Do not be deceived by it. It is nothing new, but an old thing revived, and does not contain an atom of gold. Mr. Gross has a sample of the genuine article from which gold alloy plates are made, and any one can see it by calling at his office. He will make plates of what is called gold alloy or of red rubber for persons who want such plates after their poisonous nature has been fully explained. If you are about getting artificial teeth and want something that is good, and that will stand the test, get them made on Gold, Piatma or Black Rubber, and you will have no cause for regret. In some respects the Elack Rubber is superior to either of the meta's named and can be furnished at about one-fourth their price. A full upper or under set of teeth from \$9 to \$65. Mr. Gross is using Liquified Nitrous Oxide Gas, the purest, safest and most reliable form of gas in use. Electricity successfully used. The natural teeth preserved by filling and fillings guaranteed for five years. Mr. Gross will take pleasure in explaining everything to persons who call for nformation. His rooms are over Kennedy's store, Kent street. Residence, Russell street.
