NARROW CHANCE OF ESCAPE. A person exposed to the sudden changes of our northern climate has little chance of escaping from colds, sore throat, rhuematism, frost bites, and other troubles incident to change of temperature, to say nothing of accidents and emergencies. A New York doctor has made an assault on the swallow tail coat, saying that it affords no protection to the chest. Every emigrant with any precountry, owns a gun, a bowie knife, a swallow-tail cost and sometimes a dog. He not only intends to bag all the game in the country, but to paralyze the poor colonial with his style. The gun, bowieknife and dog part company with him the first week, but he clings to the dress-coat as a British institution from which death alone will part him. This assault upon him, through his coat, by a Yankee doctor will be remembered when the day of reckoning comes.
