FRIDAY, MAY 16, 1884.

THE FIRE SYSTEM.

It can searcely be said that the convention of citizens and council on Wednesday evening respecting the waterworks system accomplished the object for which it was called, vis: to increase in some way the efficiency resent system of water supply. no water can be procured to stay a hee by season of unsufficient force for the pumps or when the water supply is too low? Will not this leave as in exactly the same position we are in every summer with some \$4,000 of a debt added onf If the improvements to the pumps were first made as recommended by practical men so as to inours a full head of water at all times, summer and winter, then the council would be perfectly justified in making extensions to the system. To do as is proposed now, extend the pipes without increasing the supply of water at the fountain head by improvements on the present pumps is much like purchasing a horse without the proper harness to use him. Further consideration of the fire question is evidently required and we trust the council will defer running us into

cety holders at Fort William by which from the Casinet. If we except the the terminue of the line is to be re- late Sir George Etienne Cartier, no moved from Fort Arthur to Fort Wil- man has over had since Confederation

The plane and specifications for the proposed extension of the Northern railway from Gravenhuret to Callendar are now being prepared at the engineer's office. It will be remembered that during its recent section the Dominion Parliament granted the line a subsidy of \$10,000 per mile, in all \$1,320,000 for the 110 miles of road. As soon as the plane are ready the contracts will be at once let.

of diseased entile has passed the British Parliament. It is gratifying to observe in this connection the steady increase which has been made The bill just passed by the British

Parliament makes Norway, Denmark
and Canada the only countries from
which cattle can be exported alive at
all, or even slaughtered on their arrival in England. Is is reported that
disease has now broken out among
eattle from Norway, in
Canada will enjoy almost a monopoly.
It is only fair to point obt that Sir
Charles Tapper, as Canadian Commissioner, exerted himself to some
purpose in the interest of the Canadian cattle teads.

The bill just passed by the British
fault with it, certainly not as much
as some made out. In nearly every
fire which had taken place it had been
confined to the building in which is
started. There was, however, a general feeling that something should be
done and he believed this meeting
sould render special assistance on the
question. He would say in any case
that what was thought here would
have great effect on the future course
of the council in this matter.

Mr. Mallon appeared to think that
according to the agreement between The bill just passed by the British the town had reason to find any great

ness of the novelty of an event has pipes. That there was not at certain seasons often more to do with the attention That there was not at certain seasons of one more to do with the attention putation who went to Brantford when of the year and at certain stages of paid to it than its intrinsic importance. the system was under consideration, the river sufficient power was freely Historical researches disclose that in said he believed then as he believed admitted; but instead of taking steps 1816 an earthquake "(wisted the new the system was a good one. He so remedy this the desire appeared to spire of Aherdeen church;" that in the system. If it was power that was he to extend the pipes and leave the 1843 a like calamity "damaged buildwater supply as it is. It may be all ings;" and that in 1862 a shook sight to extend the system if the town threw down some walls at Shrews- they had at present plenty of power can afford it and the people are will- bury. Obviously, however, all these and he believed the system much beting to pay the money; but how that disasters combined were not equal to is going to meet the ever recurring the trembling felt on the 20rd of April want of better supply when the water at Colchester, Langenhee, and Wyven-In the river becomes low we are at a hoe, where chimneys and some other loss to see. This was really the most structures were actually sumbled important question by far and as such should have received greater consideration. What is the use in going to the cost of laying new stretches of piping all through the town if no water can be procured to stay a particle not only to have laid low the

House of Commons. The judgment deals with the charges that Hesnan corrupted Beauvais, and that Roderick Pringle corrupted John Parker. The learned judge held that there was doubt about the treating of Beauvais and about the payment to him of the learned protect the whole sown. The learned protect the whole sown the learned protect the whole sown. The learned protect the whole sown the learned protect the whole sown the learned protect the whole sown. and about the payment to him of the first idea was the better one in the two sums of \$2 and \$50 by Heenan opinion of many but the town finanafter he had voted. He was clear cas would not permit it. The second one they could adopt easily enough.

Mr. Dundes, M. P., stated that at the two same of \$2 and \$50 by Heenan that is would not be proper to connect time of putting in a fire system he the giving of these sums with any antecedent promise. Roderick Pringle's one in favor of the present system. He thought now that an engine to give us more power might be required some time when great extensions of sometil will defer running us into \$6,000 more debt till they are sure that it will fully meet the accessities of the ence.

RDITORIAL NOTES.

**A biffer newspaper war is now raging in Toronto. If the statements of the various journale are betieved each one has the largest circulation in the city, and each one the smallest, each one is making money hand over flat, and each one is bankrupt.

**An arrangement has been entered into between the Canadian Pacific satisfact and heavy property in Canada will yery much ragnes to satisfact and heavy property in Canada will yery much ragnes to satisfact and heavy property holders at Fort William by which the farmings of the line is to be recommended. If we except the first satisfact with any power of the stream first satisfact with any power of the stream first satisfact with any power to throw two good streams in any part of the store.

**Sir Charles Tupper's many friends in favor of the stream first satisfact with any power to throw two good streams in any part of the store.

in against any steps being taken to remove Gooderham & Worte' entile byree from Toronto. The once is pending in court at the instance of the other residents for their removal.

FIRE PROTECTION.

wintow Parliament granted the line is called \$10,000 per mile, in all \$1,320,000 for the 110 miles of road. As soon as the plane are ready the contracts will be at once let.

A Sarnia architect, Mr. Blacker, has done a notable thing in tree moving. He transplanted a handsome maple, which was one foot in diameter and 30 feet high, from one part of the town to another, handing is by means of a capetan. It used to be thought a preposterone idea to move froad to be the easiest, quickest and cheapest mode of establishing shade frees in parks and bodievards.

The bill prohibiting the importation of diseased eattle has passed the Rettain Parliament. It is gratifying the mode of establishing shade frees in Parliament. It is gratifying the mode of the chair and explained the object of the meeting. It was a most important matter,

Our Spring Goods!

ARE COMING TO HAND.

And we commence to open out this and each following week one of the rarest and choicest assortments offered for the inspection of our customers since we had the pleasure of commencing business in this town.

To say that the goods are first-class would not convey all that the statement means. They need to be seen and worn, and then allowed to speak for themselves.

We shall not attempt at present to give a description of the styles and qualities, as it would be premature, and defer that until we have all opened out for inspection, when the real magnificence of the goods can
