But its credit was so weakened that its bonds fell to low prices, capitalists did not care to advance money on the security of its lands, and settlers were restrained trom going in to take them up. Who was benefitted? It is easy to tell who was injured. The company was injured; but the whole dominion of Can-

In consequence of the assaults on the company's credit, that company found itself unable to complete the great work it had undertaken, and the government was forced to do one of three things: it had to let the great scheme fail : to take over the work, complete it and operate it; or to extend further aid to the company. It is unnecessary to argue here that the last was the least of the three evils; but it was an evil, and that evil was forced upon the sountry by those who so bitterly assailed the Pacific railway.
