THE BASTERY WAR. SHANGHAI, Aug. 80, -A'l the French have left Canton. It is asserted that Admiral Courbet left the Min river Admiral Courbet left the Min river wit's the intention of going to Canton. Chinese military commanders everywhere have received Imperial orders to attack all French war-ships and merchant vessels which attempt to enter the leading treaty ports. Those is port have been ordered to depart immediately. ADMIRAL COURSET'S REPORT.

Tie minister of marine has receivbit-" Min River, Friday, 6 p. m.-Throke for the expression of satisfaction on the part of the Government. I cannot too warmly prace the officers and crews. The operations in the Min river have been concluded. They were attended with complete success.
All the batteries along the river have been destroyed, and most of the cannons exploded with gun cotton. We were obliged to leave some intact because the men in order to reach them would have been exposed to heavy musketry fire to which no reply would have been possible. All our ships left the Min river to day, and sever il have the dy reached the Malson anchor age, I shall arrive there to-morrow with the Dugway and Trouin. The latter has served as my flagship since Monday. Our losses during the week are ten killed, including one officer, thirt en seriously and twenty eight slightly wounded. In the Mingan and Kinpai shannels there were sever al casemated batteries; two of these were clad from twelve to thirty centinetres thick with plates of sheet iron bolted together The calibre of the

Ferry, reply ing to a note sent him by Earl Granville since the bombardment of the Foo Chow, renewed the assurance that France desires to limit her operations in the east to those of her fleet. It is reported that M. Ferry has instructed M. Patenotre to resume negotiations at Pekin. Pending the result Admir-al Courbet's squadron will remain at anchorage off the isle of Matson. Should M. Patenotre fail to obtain the resumption of negotiations Admiral Courbet will be left with absolute freedom to act. In the latter case it is expected that Admiral Courbet will attack Canton. The consular body at Shanghai, through the French consul, | u-ney. have been assured Shingbal will not be attacked.

The Bank of New York, which is the

oldest in the city, stands 145. The Importers' and Traders' is quoted at 155, the City is 261, while the Chemical has reached the dizzy height of 1,952. The

latter presents the most remarkable ex-

pansion in the records of finance. Its capital is only \$800,000, being divided

into 3,000 shares of \$100 each. At the

present quotations this capital is worth

\$5,856,000. This, I repeat, is unequaled

in the history of banking.

The Chemical is the great note buyer of the metropolis. Having a surplus of

\$5,000,000 and an average of deposits of

nearly double that amount, it is ready

to discount or purchase all the good pa-

per that can be offered. At any time from 12 o'clock to 2 o'clock you can see

the note brokers rushing into the Cashier's rooms to display their array of names, over which he rapidly glances and checks off all that meet his ap-

proval. Business is done rapidly, and a

transaction of \$250,000 may be finished

in fifteen minutes. Year after year the Chemical has been buying paper, and its former President (John Q. Jones) could call off the gilt-edged names as readily as he could repeat the alphabet. He knew all the first-class men in the

city, and they were always under a close surveillance which insured the

bank against loss. The question al-ways before him was how much paper

the gik-edged houses were issuing, and this could easily be learned by the offer-ings made by the brokers. Hence the Chemical made but few losses, though

its purchases were estimated at \$50,-000,000 a year. Out of town banks fre-quently invest their funds in the same

manner, the Farmers and Mechanics'

Bank, of Albany, being the oldest and most extensive of this class. There are

a half dozen first-class note brokers who

clear from \$5,000 to \$8,000 per year, and a score of smaller men could be

mentioned who make a living at the

From time to time the papers tell us of persons who have blown out the gas-lights in their bed-rooms, instead of putting out the lights by shutting off the gas. Of course they have been found dead in the morning, suffocated in their sleep by the gas which had been pouring into the rooms all night. Persons accustomed to blow out lights given by lamps in their own homes should be especially careful lest their habit assentiself abroad, notwithstanding the knowledge of what they should do put out a gas-light.
