SERIOUS ACCIDENT.-In the forenoon of Friday last while a threshing machine was in operation at the barn of Mr. W. Hannah, Cartwright, his son Jabout fi years of age, was caught by the tumbling shaft, and before he shove the knees. Praise is due to Mr. Hisbard Green for his presence of mind in grasping the tumbling shaft and not done so in all probability the latter would have been killed. This should be a loud warning to parents to keep their children from about the barn during threshing operations. Their presence there is not essentially neces-

On Thursday night, Dec. 4th, a large representation from the Janetville Independent temperance organization visited the Carmel (Cartwright) sister society. As sustomary on such occasion the visitors brought an elaborate programme consisting of readings, recitations and vocal and instrumental music, and which was rendered in a style that gave, we believe, general stisfaction. Mr. Lavery occupied the chair and performed his part in a courteons and gentlemanly manner. Miss Lavery presided at the organ, cheerfully and efficiently. Mr. Laid law gave a humorous reading. Mr. Mills read that well known piece, Mary Queen of Scotts. The decalogue of Mr. Hobbs, Miss Mitchell and Miss Lavery aroused to action the laughing organs of the audience. A very appropriate and suggestive piece of vocal and instrumental music entitled the "social glass" was well received. The same may be said of the rendering of that sweet and touching melody, "garnering home." The "maniae" (recitation) was spiritedly and impressively given by the Rev. Mr. Tonkin. and Rev. Mr. Brown gave as his comtribution to the program a few sacy remarks. At the conclusion of the program of which the above only formed a part the large audience in a very brotherly manner partook of the repast manipulated by the fair hands of the daughters of Carmel. The singing of the doxology brought to a close a pleasant, sociable, entertaining and we hope to all a very profitable meet-

ONE by one the old pioneer settlers of the district pass away, and the re-collections of the early settlement become fainter and fainter. On Sunday last, Mrs. Margaret Irwin was laid at rest in the Dunsford cemetery, after a sojourn in the world covering some sixty-five years. She came to this country forty-three years ago, in the bloom of womanhood, and just after her marriage. She was smonget the first settlers of that corner of Fenelon adjoining South Verulam, and could tell some interesting anecdotes con-nected with the trials and lives of the hardy few who led the way into the wild woods for civilization to follow. She brought up a family of three sons and two daughters. On Tuesday of last week she was staying at Mr. Wm. Kennedy's, and at ten o'clock in the morning was as well as could be. In passing through the chip yard she picked up a horse shoe, and bringing it in the house remarked upon the luck attending the finding of a shoe. She then took a little baby in her arms and sat down chatting as usual. For a few moments it was noticed that she looked as if something was the matter, and then she fell back in her chair unconscious. A messenger was sent for Dr. Herriman, of Lindsay, and every attention given her, but she continued unconscious and helpless. The doctor declared it to be a paralytic stroke and negond relief. She was afterwards removed to the residence of her daughter, Mrs. Ed-ward English, where she expired on Friday, having remained unconscious throughout. Six of the old settlers acted as pall bearers at the funeral, samely, Alex. Burnett, Lewis Wilson, Robert McIlroy, George Willocks, Alex. Bell and John Breen, and some 70 vehicles followed in procession.-Independent,

> Needles are essentric things. Once in a while one reads of a needle going into a man's hand, and in the ful ness of time coming out at the end of his great toe. A reckless Hamilton paper stated not long ago that a numher of needles had been taken from the arm of a young woman of the sity. She did not know how they had been introduced into the system, but had felt them playing tag about her anatomy for many months. Another young woman of that city accidentally swallowed a package of needles, assorted sizes. One hundred and twenty years afterwards the package was out out of the lobe of her left ear. The wrapper was intact and the dealer's private mark "vox" was still there. A man in Winnipeg ran a darning needle into his
> foot last January. In 1872 the same
> needle was found in the body of a
> sequence of the same of the sam man by dissecting students at McGill university, Montreal. Many other wonderful stories are told of the travels of needles in the human system, but the most wonderful comes from Kincardine. According to the Reporter, of that town, Mrs. George Shaw accidentally ran a piece of a broken needle into her hand, about eight months ago, and-this is where the wonder comes in-the broken needle was cut out the other day from the precise place in which it had originally buried itself, and where it was all

OVER 20 YEARS' EXPERIENCE. The most successful dentist in this part of Canada. The GOLD ALLOY used by Mr. Neelands for artificial teeth is a grand success, notwithstanding the false statement made about it

withstanding the laise statement made about it by a Lindsay dentist jealous of Mr. Neelands' enterprise in buying the patent right. This in-dividual exhibits to his patrons a piece of gross metal resembling soft solder or lead, and tells them it is a poison and the same as Neelands' Gold Alloy, which is a falsehood, as the Gold Alloy used by him contains both gold and silver and no poison. and no poison.

Mr Neelands inserts numbers of perfect fitting

sets of teeth for people in Lindsay, Ope, Maripoca after this dentiat had tried and entirely failed to give satisfaction. Black Rubber has been used by Mr. Neelands for the last !7 years The only genuine English Black Rubber kept constantly on hand, Teeth inserted on any plate desired. In extracting teeth with gas it is a common thing for Mr. Neelands to extract from 10 to 15 teeth with one dose of gas and the person leaving quite well and strong. Mr. Neeands made a special study of this gas unsier Dr. Colton, of New York, the inventor, who writes to Mr. Neelands that he has given the gas to Mr. Neclands that he has given the gas to 136,615 persons without an accident. W. H. GROSS DENTIST.

OVER 24 YEARS' EXPERIENCE.

Mr. Gross has recently introduced the latest and most perfect system of Vulcanizing, where-by any variety of rubber can be hardened without a risk of impairing its strength or injuring its texture. This new process was invented more particularly for the working of BLACK RUBBER, which, being perfectly pure, to secure the best results, requires a more uniform and higher degree of heat than is attainable by use of the ordinary Vulcanizing machine. The inventor says, that with Ash & Son's GENUINE ENG-LISH BLACK RUBBER, bardened by the new Vulcanizing process, he can produce one of the best, if not the very best, dental plate in the werld. Mr. Gross, with this improvement, is enabled to make his BLACK RUBBER plates, here-

abled to make his BLACK RUBBER plates, heretofore good, still better than ever. All wearers
of BLACK RUBBER plates are delighted with
them. Artificial Teeth inserted on any kind of
plate desired, including Red Rubber and what is
called Gold Alloy. A set of teeth on the latter
material for \$8. A stock of about 10,006 ARTIFICIAL TEETH of all shapes, shades and signs
to select from. An upper or under set of teeth
from \$8 to \$65. No charpe for extracting
teeth when new ones are to be made. VITALIZED AIR administered, and ELECTRICITY
still used with success. The natural teeth preserved by filling with gold and other good materials. Mr. Gross, having superior facilities for
getting valuable improvements as soon as they
are invented, always avails himself of this advantage, thus keeping in advance of all competitors

Harper's Magazine. ILLUSTRATED.

With the new volume, being December, Harper's Magazine will conclude its thirty-fifth year. The oldest periodical of its type, it is yet, in each new volume, a new magazine, not simply because it presents fresh subjects and new pictures. but also, and chiefly, because it steadily advances in the method itself of magazine-making. In a word, the Magazine becomes more and more the faithful mirror of current life and movement. Leading features in the attractive programme for 1885 are: new series novels by Constance Fenimore Woolson and W. D. Howells; a new novel entitled "At the Red Glove;" descriptive illustrated papers by F. D. Millet, R. Swain Gifford, . A. Abbey, H. Gibson, and others; Goldsmith's "She Stoops to Conquer," illustrated by Abbey; important papers on

Harper's Bazar.

ILLUSTRATED.

Harper's Bazar is the only paper in the world that combines the choicest litera-ture and the finest art illustractions with the latest fashions and methods of household adornment. Its weekly illustra-tions and descriptions of the newest Paris and New York styles, with its useful pattern-sheet supplements and cut pat-terns, by enabling ladies to be their own dressmakers, save many times the cost of subscription. Its papers on cooking, the management of servants, and house keeping in its various details are emin-ently practical. Much attention is given to the interesting topic of social etiquette, and its illustrations of art needle-work are acknowledged to be unequalled. Its literary merit is of the highest excellence, and the unique character of its humorous pictures has won for it the name of the American Punch.
