THEY VITALIZED AIR.—Unadulterated.

Administered with great success at the room of J. Neelands, dentist, Lindsay. Gas was called vitalized air ten years ago. Within the last two or three years persons got machines patented for mixing Chloroform, Sulphuric Ether, Alcohol, &c. with gas, and called those mixtures vitalized air. Every man who manufactured those machines would furnish the buyer with a recipe of his own. Mr. Neelands bought the celebrated Harris vitalized air apparatus over two years ago. He can give this mixture to persons who want to run the risk of taking it. A recent editorial in the Cosmos, the leading dental journal of the world, edited by the most eminent medical men and dentists in America, condemns those mixtures with the gas, says, "pure Nitrous Oxide gas is the safest anesthetic ether is beyond controversy."—19-1.
