

The Victoria Warder

FRIDAY, NOVEMBER 4, 1877.

In Memoriam.

Lies composed by Hattie S. Martin in memory of Lewis Pritchard, who died August 1st, 1877.

Yours loving son now has gone
To dwell within the tomb;
But his freed spirit soared away,
To dwell in Heaven's bloom.

Many friends he has left,
To mourn his early loss;
They kiss the chastening rod,
And bow beneath the cross.

The while he lived our hearts to cheer,
And bless us with his love;
Now he dwells in bright sphere,
Under heavenly hosts above.

Mark only now his deck repose,
Within his narrow bier,
Companion of earth's bitter woes,
His hands upon his breast.

May all who now his loss deplore,
Prepare to meet their friend,
In Canada's bright and peaceful shore.
Wh're all their grief shall end.

And now, dear friends, one and all,
Be ready at your Master's call;
For blooming health may soon decay,
And you like him may pass away.

Guelph, Oct. 27, 1877.

THE TWO COUSINS.

(Continued from last week.)

After he was in his room he began to consider what was best to be done. He made up his mind to leave the country, and also to leave a letter with Mr. Aspin, one of the leading lawyers, in which he would confess the alteration of his will, and tell all the circumstances connected with Mr. G. Glendower's false promise, and say that if he attempted to lay the charge, which it was quite possible she would, they could write to other witnessess of the will, whose address he also left, and he could show that the will was not the same as that at the old Earl's bedside.

The next morning, before there was any time, he took the letter, which he addressed to Mr. Aspin, and having posted it, he boarded a train and was soon being hurried into the distance.

CHAPTER XXIV.

Some few days after, a gentleman called at May Penn Hall. It was not his self, which bore the name of Mr. Aspin. He was soon joined by Earl Glendower.

"I have some very sad news to tell you," said me, "exclaimed the Earl. "What is it, pray?"

"I am afraid it will be too big a shock, I hope you will bear it manfully."

"What has happened? Tell me quickly," said Earl Glendower, excitedly, pointing to his teeth.

"Sit down and calm yourself, and I will tell you."

He then related the whole circumstances which related to the changing of his will, and of the sudden disappearance of his wife, and the heavy suspicion that rested on his daughter's head.

At first Earl Glendower thought it must be a dream. It was too dreadful to realize.

Mr. Aspin then showed him a letter from the other witness, saying he was unable to certify there were \$100,000 to an unknown florist, fancy, and that it was necessary he would come back and prove it.

"And what will be done to my Millie? What will be the consequence of all this to my daughters?"

"I am very sorry for you, and shall try and make the punishment as light as possible, but under the circumstances the law must have its way."

The bigger part of the task was assigned to be done, which was to tell only Glendower of this terrible calamity which had befallen them. The Earl did not tell her of Millie, or even let Millie know that he had been informed until the following morning.

That evening Pearl showed a letter which she had received from Col. Vass, saying that he was well, but very lame, come she had left May Penn. Pearl handed the letter to Millie, who examined it.

"I am not worthy of your trust, Pearl. You have no right to put the last concern in me!" and bursting into tears, she hastily left the room.

It was not often that Millie was in such mood as this, and her mother felt very anxious about her, and implored if Pearl knew the cause of such strong trouble. She replied that she had not as least idea.

Very soon after tea Millie retired to her room, saying that she was not very well. The next morning, although the ocean rang but does bell several times, she did not appear at breakfast. Her mother, fearing she had taken worse, sent herself to Millie's room. She was in her room, as Lady Glendower conducted her best room only and gone for a walk. She was soon started by a servant, holding her a letter, which she had just found on Millie's bed. She was a widow, a woman who was as poor as a church mouse.

In order, therefore, to make provision for the escape of the flood water above referred to, in the sewer which I propose to be constructed from the corner of Cambridge and Durham-st., extending eastward along Durham-st. to Lindsay-st., thence northward along Lindsay-st. to Kent-st., and from this point thence a short distance westward along Lindsay-st. to the river.

2d. I would recommend that an egg-shaped tea brick sewer 8 ft. x 5 ft. be constructed from the corner of Cambridge and Durham-st., extending eastward along Durham-st. to Lindsay-st., thence northward along Lindsay-st. to Kent-st., and from this point thence a short distance westward along Lindsay-st. to the river.

3d. I would recommend that an egg-shaped tea brick sewer 8 ft. x 5 ft. be constructed from the corner of Durham and Bay-st., extending northward along Bay-st. to the river.

4d. I would recommend that a 15 x 15 ft. x 15 ft. x 15 ft. sewer be constructed from the corner of Wellington and William-st., extending northward along Wellington and William-st., thence westward along William-st. to the corner of Bay-st. to the river.

5d. I would recommend that a 15 x 15 ft. x 15 ft. sewer be constructed from the corner of Wellington and William-st., extending northward along Wellington and William-st., thence westward along William-st. to the corner of Bay-st. to the river.

6d. I would recommend that a 15 x 15 ft. x 15 ft. sewer be constructed from the corner of Wellington and William-st., extending northward along Wellington and William-st., thence westward along William-st. to the corner of Bay-st. to the river.

7d. I would recommend that a 15 x 15 ft. x 15 ft. sewer be constructed from the corner of Wellington and William-st., extending northward along Wellington and William-st., thence westward along William-st. to the corner of Bay-st. to the river.

The Drainage Scheme.

To the Mayor and Council of the Town of Lindsay.

GENTLEMEN.—We, your special committee appointed to consider the advisability of proper drainage for the town, beg respectfully to submit for your consideration a scheme for the drainage of those portions of the town suffering most severely in the time of freshets.

The proposed sewer to be constructed and watercourses required to be deepened are needed for sanitary purposes, as well as for general and special drainage. The mode of construction, locality and fall particulars thereof being set out in the engineer's report hereto annexed, which we would recommend the adoption of, with the following alterations, viz:

That a trunk-sewer be constructed on Lindsay-st. from Durham-st. to the river, an egg shape 8 ft. x 5 ft. from Durham-st. to Kent-st., and a 6 ft. circular from Kent-st. to the river; a trunk sewer from the river to Wellington-st. to Victoria Avenue; thence along Victoria Avenue to Kent-st.; from Kent to William-st., to be of egg shape, 8 ft. x 5 ft., from William-st. to the river, to be of the most admissible plan suitable to the grade; that the watercourses from Kent-st. along Sussex-st., to Durham-st., shall be deepened and widened; also to deepen the watercourses from Lindsay-st. along Durham-st. to Sussex-st., and the watercourses forming connection therewith.

We would specially recommend the adoption of clause 8 in the engineer's report, viz., that a 15 ft. x 15 ft. x 15 ft. circular pipe be laid in the drainage pipes, with junctions every 30 feet, or twice along the centre of William-st., extending northward from Gloucester, to the corner of Wellington-st., where it will join the brick sewer, all of which shall be constructed according to plans and specifications similar to details in the engineer's report.

We recommend that the above works be in conjunction with the engineer's report so far as adopted be proceeded with and carried out under sec. 18, ch. 18, sec. 612 Out, which provides for the means of ascertaining and determining what real property will be immediately benefited by the proposed improvements—the expense of which is proposed to be assessed, as herein mentioned, upon the real property benefited thereby; and of ascertaining and determining the proportions of which the assessment is to be made with various portions of real estate so benefited, subject to appeal to the county court.

Sub sec. 4 of sec. 612, Out, provides for an annual special rate to be levied, and sub sec. 8 also provides that if the contemplated improvements is the construction of a common sewer having a sectional area, of more than four (4) feet, one-third of the cost shall, as far as practicable, be provided by the council.

We have carefully considered the engineer's report annexed hereto, and estimate the probable cost of the several proposed works to be as follows, viz:

For the construction of the Lindsay st. sewer, at 8 ft. x 5 ft. \$14,000

William-st. at 8 ft. x 5 ft. 4,000

Trunk-sewers along Wellington-st. and Victoria Avenue to Kent-st. 14,400

Deepening and enlarging the water courses 1,000

Total \$54,000

The above estimate provides for the required man-holes.

All of which is respectfully submitted,

F. C. TAYLOR,
Agent, Lindsay.

To His Worship the Mayor and Council of the Town of Lindsay.

GENERAL.—After a careful examination of your town, I beg to submit the following report on the improvements which, in my opinion, are required in order to commence a proper system of drainage.

I find that the portion of the town which requires to be first attended to is traversed by two natural water courses, the one extending from Durham-st. down Lindsay-st. to Roswell-st., and thence across private property to the river in the neighbourhood of the mill; and the other extending from Durham-st. down Sussex-st. to Kent-st., thence in a diagonal direction across private property to where it empties into the river adjoining the property on William-st. The land to the south for a considerable distance falls towards Durham-st., so that these watercourses not only form outlets for the water which comes off the land on their easterly and westerly sides, and that portion of the town which lies between them, also for the water which comes from a considerable distance south of Durham-st.

The ordinary rain-fall and flood water in time of freshets, and I am informed does not always sewage also, at present finds an outlet to the river through open drains and in some places through large box-drains, from which frequently run off small colors which are not only objectionable but very liable to seriously affect the health of residents of the locality.

In order, therefore, to make provision for the escape of the flood water above referred to, in the sewer which I propose to be constructed to be first constructed are of course greater capacity than would be required for ordinary purposes, and the cost of the work will of course be increased; and I would therefore recommend that before any contract is entered into, tests be made along the line of excavation as to ascertain exactly the nature of the material which will require to be removed.

If it is decided to entail the work and clear out present watercourses, or, instead of constructing a sewer, I estimate the average cost at 75¢ per linear rod.

The details of man-holes, vent-tops, etc., and the necessary reductions of grades of the outlets of sewers are matter which I consider should be dealt with in the plans and specifications which will require to be prepared to enable the work to be carried out. Respectfully submitted,

Ron. McCullough, C.E.

"We say at night, 'Would God the day were here,'
And say at dawn, 'Would God the day were dead.'

How well Subinver has emphasized the feelings of thousands of Earth's fairest daughters, who are held prostrate by disease's cold hand. But, instead of the anguish of despair, what a crop of joy ascends from the hearts of those ladies who have used Dr. Subinver's Prescription, and by its means been restored to the glorious sunshine of health. It is a positive remedy for those deformities, irregularities and weaknesses so common to our best female population. Price reduced to one dollar. By druggists—

More Remarkable Still.

Found at last, what the public has been looking for these many years and that is a medicine which although but lately introduced, has made for itself a reputation second to none, the name of Dr. Johnstone's Liver Pill, in conjunction with Johnson's Liver Pill. This Pill has performed some most wonderful cures. Impure or impounded blood soon becomes purified and enriched. Diarrhoea, indigestion, sick headache, liver complaint, languor, weakness, etc., soon disappear when treated by these excellent tonic medicines. For sale by A. Higinbotham, Esq.

ESSENTIAL ELEMENTS.

Wife.—What are some of the requirements necessary to make a successful player, my dear?

Husband (thoughtfully).—Well, a man must be cool, calculating, crafty, deceitful, sly, sly, and have a touch of meanness in his disposition.

Wife (shocked).—I shouldn't think you would care to play with such people.

Husband.—O, I must always wait!—Puff.

A Narrow Escape.

People who are exposed to the sudden changes of our northern climate have little chance of escaping colds, coughs, sore throat and lung troubles. The best safe guard is to keep Haynes' Petoral Balsam at hand.

843 St. George St., Montreal, May 2nd 1877.

After ineffectually trying many of the so-called remedies for catarrh, I made a trial of New Farnel which gave me instant relief, and since commencing its use I daily note the beneficial effects it is producing after a few applications. It changes the unpleasant odor of the veins in the throat and the poisonous secretion over which every breath must pass.

To any that troubled it for priceless medicine.

E. A. CARDINAL.—831.

A HOME DRUGGIST.

TESTIMONIALS.

Testimony is not always the best proof of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, state, and country, and among all people, as

Ayer's Sarsaparilla.

The following letter from one of our best known Massachusetts Druggists should be of interest to every subscriber.

RHEUMATISM.

"Eight years ago I had an attack of Rheumatism, so severe that I could not move from the bed, or even, without help, sit upright in it. I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. I still take it, and it retains its wonderful popularity. The many notable cures it has effected in the vicinity cannot be overestimated. A new Blood medicine ever offered to the public.

River St., Buckland, Mass., May 12, 1872.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists, \$1, six bottles for \$2.

ROBERT CHAMBERS.
