An Important Flant:

The following bulletin has eccently been knight by the Ontaria Apricultural society of (highly and will prove valuable to residents of North Victoria and Hall-

An Ant of Parliament having been passed it is a last insetting of the Ontario Ingisiature, for the protection of the plant sincans, the thinteese of Applaulture has thought it advisable to have the following bull the published, containing a description of the plant, so that the people of Outside may be better acquainfed with a plent of so much securities with and to a throughout our province, though unc Ang du to many,

The following are the clauses of the bill, trace which it will be seen that the plant securit by ploked refers Saplember

donder states an inch to longth. The leastes are thin, smooth below and of delicate atructure; two in each cluster are about two inches long and the others almost four, eval in general form, but taper, by to a point and doubly technic along the edge. History from the main stem and in the analyse of the three componed layers is a stalk three inches long bearing incompletione greenish white dowers, appearing not unlike a small need of white dowers, and

and reloged to an entirely different species, though of the same penals.

The root of a specimen in the College herbarium is quite fleaky, rather short (three inches) and from it release the single stem already described. Hy means of the above descriptions, technical and popular, the reader will readily identify the plant ginessy from other plants in the vide and so, in swamps, or low land woods and not in swamps, or low

the above descriptione, technoical and popular, the render will reachily the plane in the render will reachily the render will reachily the plane in the render will reachily the war, no doubt, on account of its being considered by the Chinese and the plane, member, is their least, among hoth the Chinese and the lately occurs in beds from which represents the render resemblence of the human figure. In fact, fronth of its vicine seems to doped upon its form a familiar than the render as eager to seems to doped upon its form a familiar than the render as the render of the chinese have used in the monopolized the right of collecting the roots, and whole districts were starfully guarded agained and such as the right of the partners. Each of these collectors in the part for large and an analysis of the render of the render of the partners. Each of these collectors in the part for large and an analysis of the render of the render of the partners. It is not to run these than the render of the partners. It would be replaced for the partners. Each of these collectors in the part for large and an annual partners of the render of the partners. It would be replaced for the partners. It was the description of its weight in gold. Even to day years price are paid for large and curiously happen appealing the require, and in 1718 a description of its required, and it is relieved to the render of the form of the form of the render of the renders of the form of the renders. The renders is the renders of the form of the renders of the for eprolimens, especially if they reacrable the human figure. It was first discovered in Canada, near Montreal in 1718, by Pather Leiftan, a Jesus missionary among the Iroquois, and in 1718 a description of it was furnished. The French soon engaged in collecting and exporting it to China, and a great did the trade become that it gave quite an impulse to the commerce of Montreal for a number of years. At one time great numbers of Indians were of great numbers of Indians were of great numbers of Indians were of Quebec and large quantities of it were sent to China. In 1832 the shipments of gluscing from the United States ments of glusens from the United States amounted to 107,067 pounds, valued as \$99.808. In one county in Visconsin the trade is reported to have resched, in 1858 \$40,000 and in 1859 \$80,000. Im-Minnesota. At present the chief sources of the plant in the States are Obio. West Virginia and Minneants. About the close of the eighteenth control it was discover-

During the last year 75,000 poness were sent from America. In the foreste of Tartery, where it was once plentifely, its in our attended extincts and hence he arisens the demand for it from America. It is not regarded of any value in this control to a drive about the city.

A satt on the nave, as the fine are sent from the fine at senser Mayflower, and took the ingest and prongent. in extreme old age.
The following figures taken from the Caradian Passmaosucieal Journal, April 1891, will give some idea of the trade in

discount in Canada !-The quantity sent out of Canada last wear is stated to represent \$100,000, and one retail drugglet exported \$1,000 worth. From along the Kingston & Pembroks railway fully \$20,000 worth was abipped. The price realised was from \$3 to \$8 50 per pound for dry roots. The question is now being considered whether it would por pay to cultivate it. Such is done in some parts of the United States, and in order that readers of this bolletin may understand how to do it, the writer inseries a description of the process taken from the December issue of the American

Agriculturists

OULTIVATION. "It appears to thrive best in loamy soils, such as are usually found in sugar maple and oak forests at the North. Shade seems also to be seen which is with the seem that the plant cannot be picked refore September 15, rice are conside to ripe the first?

RECEPTION AT THE HINK, In the evening a reception was held in Aburn or cut will heat quickly and leave the Mutual etreet rink in honor of the less sear if Victoria Carbolic Salve is applied meeting in this city of the triennial at once. -89.5. connoil. Owing to the chortness of notice given, there were not so many people there as the occasion should have brought out, but those who were there were very enthusiastic, and each speaker received his full meed of applause. The prople arrived early, and as each prominent Orangeman went up to the platform he received a perfect ovation, especially William Johnston, M.P., of Ballykilber,

Ald. Bell, Rev. George Burnfield and H. A. K. Kent, C.M. The chairman (Mr. Kent) called the meeting to order charp at 8.15, and in a few well-chosen words welcomed the delegates from our provinces, the United States and from "over the water." He was sure that if the people generally had known that they were going to have Most Worshipful Grand Master Johnston from Ballykilbeg with them the hall would have been filled to overflowing. Addresses were delivered by the fol-
