It was generally supposed that the centest for the mayorality, and reeveship, would have been much closer than what it was, the majority by which the sucessful candidates were elected being a surprise no doubt, both to their friends as well as of

Centre, Mich.:—

"Liver complaint and indigestion made my life a Lurden and came near ending my existence. For more than four years I suffered untold agony, was reduced almost to a skeleton, and hardly had strength to drag myself about. All kinds of food distressed me, and only the most delicate could be digested at all. Within the time mentioned several physicians treated me without giving relief. Nothing that I took seemed to do any permanent good until I commenced the use of Ayer. Sarsaparilla, which has produced wonderful results. Soon after commencing to take the Sarsaparilla I could see an improvement in my condition. My appetite began to return and with it came the ability to digest all the food taken, my strength improved each day, and after a few months of faithful attention to your directions, I found myself a well woman, able to attend to all household duties. The medicine has given me a new lease of life." those who were defeated. To the Electors of Eldon. To the Electors of Eldon.

LADIES AND GENTLEMEN,—Your confidence on Monday last imposes on me the pleasant duty of returning my sincere and hearty thanks to all who assisted in my election. It is particularly pleasing to me to observe that the vote in my favor is very evenly distributed over the Municipality, for this I must thank my many friends and the electors generally in Lorneville, Bolsover and Hartley divisions for having taken so much interest in my candidature. I assure you, gentlemen, that in return, so far as possible, I will cheerfully assist in looking after your interests to the beat of my ability. Trusting that the new council will succeed in transacting your business to the satisfaction of all. I am yours jaithfully,

Political Points

Some of the Annaniases of Gritism seem to know more about Mr. Fairbairn's private business than he does himself. Why don't these slanderers fight political battles fairly? It is said that the Ex-J. A. B. made a windmill spec b at the Grit convention, pitching into the Government red hot. The unseated can do big things when there is no one around to reply to him.

There is nothing like economy in the management of public affairs.

Five years ago the Liberal party endeavored to sweep into power in the Dominion on the strength of the race and religious cry, a most nfamous thing; and in the last general election they made a direct appeal to the agricul-tural class, feeding the farmer on an unlimited amount of chaff. This time they have got down to one single item—binder-twine. There does not seem to be anything too small for the grits to catch unto. Drowning men atch at straws, and a desperate party grabs

The local Grit paper claims that there was a large number of Conservatives at the Reform Convention. If it keeps on at this rate there will not be more than a dozen or two tories left in either the north or south ridings to vote the National Policy ticket by the time the polling day arrives. It is known that one Conservative was present and he is the fellow who charged his hired man twelve and a half cents for grease for his boots having to be sued for his wages. They are welcome to that kind of cattle.

time is money in harvest. 250 pounds of the good twine would be a fair average for 100 acres of grain, while it would take at least 300 pounds of the cheaper kind to do the same work." This statement freely made endorses the position taken in parliament on the twine question-by Mr. Fairbairn.

It would be a difficult thing for the political charlatans to make the people of this county believe that the factories of Sylvester Bros., James Hamilton and George Ingle, would be of as much benefit to our country if they were located in the United States. That is what they are now trying to do in regard to the binder twine industries. They should go and tell the people of Port Hope that their town and Canada would be benefited just as much if the twine factory there was in Rochester instead. The probability is that unpatriotic carcases would soon decorate lamp posts.

Adding Sweetness to Life.

The policy of the D minion Government

seems to be built on a broad-guage principle,

the basis being the greatest good to the greatest number. By the removal of the duty on raw sugar the people generally have receaved a decided benefit, as sugar is an article used by every body-tee-totallers use it in their tes and topers take it in heir toddy: while children cry for it. Still there are some persons, politically opposed to the government of course, who contend that the tariff should have been continued. Even that brilliant genius, Sir Richard Cartwright, stated in parliament when the change was announced "that the removal of the duty on raw sugar was nothing more por less than a present of about two million dollars a year to Senator Drummond," the gentleman name being intereseed in the refining business. But it strikes us that the knight of the ru-ful countenance would have an extremely hard time to make some of his political opponents, whose souls many people in Canada believe anything of are so contemptibly small that there is not a the kind. For a number of years past Grit papers have howled about monoplies, claiming that manufacturers of all kinds were waxing wealthy out of the hard labor of the sgricultural class, but never stating the benefits accruing from the implement of labor in our own country. It was noted that John Redpath, the sugar refiner, had gone back to Scotland with his millions, and erected a mar sion there in which to pass the rest of his days. True, he returned to his native land, but he did not take his refinery with him. It still remains at Montreal, giving steady work to a thousand or so hands and cheaper sugar than ever to the people of Canada. If the farmers of this country had to raise sugar-cane for a living they would undoubtedly grumble a good deal at the small returns they would get for their labor. Only the other day a petroleum fields of Canada are greater in exso cheap, and flour so dear. "In comparison" tent than those of the United States, Southern there was a time, within easy recollection when a farmer would bring in two dozen eggs and exchange them for one pound of brown sugar, but now he brings in one dezen and the government with an increase majority is gets two pounds of nice white augar in return an evidence that the people of Canada still for them. It is the same in regard to tea, have full confidence in the ability and inte- which can now be purchased at less than one grity of the present administration at Ottawa, half the price it could be about fifteen years ago, when the National Policy came into effect. Cotton and woolen goods are all so much lower in price, and the generally cheapening of the necessaries of life must add to the sweetness of living. The people will undoubtedly stand by a government which exercises such parternal care on their behalf
