When six months old, the left hand of our little grandehild began to swell, and had every appearance of a large boil. We poultied it, but all to no purpose. About five months after it became a running sore. Soon other sores formed. He then had two of them on each hand, and as his blood became more and more impure, it took less time for them to break out. A sore came on the chin, beneath the under lip, which was very offensive. His head was one solid scab, discharging a great deal. This was his condition at twenty-two months old, when I undertook the care of him, his mother having died when he was a little more than a year old, of consumption (scrofula, discharging as a little, but could not get up if he fell down, and could not move when in bed, having no use of his hands. I limmediately commenced with the CUTICURA REMEDIES, using all freely. One sore after another healed, a bony matter forming in each one of these five deep ones just before healing, which would finally grow loose and were taken out; then they would heal rapidly. One of these ugly bone formations I preserved. After taking a dozen and a half bottles he was completely cured, and is now, at the age of six years, a strong and healthy child. Mrs. E. S. DRIGGS, MAY 9, 1885. 612 E. Clay St., Bloomington, Ill. My grandson remains perfectly well. No signs of serofula and no sores. Mrs. E. S. DRIGGS, Frs. 7, 1890.
