## the Victoria Avarder

FBIDAY, MAY 11, 1894.

Kate Kearney. Oh! did you ne'er hear of Kate Kearney?

She lives on the banks of Killarney! n the glance of her eye, shun danger and fly, For fatal's the giance of Kate Kearney. For that eye is so modestly beaming, You ne'er think of mischlef she's dream-

Yet, oh! I can tell, how fatal's the spell, That lurks in the eye of Kate Kearney.

O should you e'er mest this Kate Kearwho lives on the banks of Killarney, Beware of her smile, for many a wile Lies hid in the smile of Kate Kearney.

Though she looks so bewitchingly simple, Yet there's mischief in every dimple,
And who dares inhale her sigh's spicy gale,
Must die by the breath of Kate Kearney.

Believe Me, if all Those Endearing Young Charms.

AIR-"My Lodging is on the Cold Ground." Believe me, if all those endearing young Which I gaze on so fondly to-day,

Were to change by to-morrow, and fleet in my arms,
Like fairy gifts fleeting away!
Thou would'at still be adored, as this moment

Let thy loveliness fade as it will, And around the dear ruin, each wish of

Would entwine itself yerdantly still! It is not while beauty and youth are thine

And thy cheeks unprofaned by a tear, That the fervor and faith of a soul can be To which time will but make thee more

Oh! the heart that has truly loved, never

forgets,
But as truly loves on to the close, As the sun flower turns on her god, when he The same look which she turn'd when he

Masterpieces of Labor.

AN ENGLISHMAN'S TRIBUTE TO THE BUIL

DERS OF THE C.P.R. Under the heading, "Masterpleces of Labor-the Canadian Pacific Railway," Mr. Percy A. Hard contributes a most interesting paper to Young England, of London. The C.P.R. is an ever growing power in the affairs of Canada and of the British Empire, aye, and the whole world,

were laid, or an average of 3.19 miles per day, exclusive of sidings. In 1883, even this average was exceeded. In eight weeks, or forty eight working days, 166 miles were laid, or an average of 5.46 miles per day, while on one day the record reached the enormous figure of 6.38 miles, requiring 2,120 rails, or 640 tons of electric states. The P. & O. is another of the grea forces of British civilization, and we know Each day the contents of from twent how much it has done to build up and to twenty five 20 ton cars of rails and bind together what we have far more reason than Milton had for calling a "Britannick Empire" of "glorious and enviable height with all her daughter lands about her." But the Peninsular and Oriential company is after all only a great steamship corporation. The Careto twenty-five 20 ton cars of rails and fastenings, and from forty to fifty cars of ties and other materials, were laid by the sixty different working parties. Nearly all this heavy material had to be brought an average of 1,000 miles by rail; while every stone and piece of timber, and every morsel of tood for the axray of hungry men and horses, had to come from distant Winnipeg. Very different this from railway building in a settled land like Eugland, where food and material are almost at your feet. One who saw the work done tells us, in Engineering, great steamship corporation. The Canadian Pacific railway company is that and much more besides. It owns fleets of much more besides. It owns need to lake and fast ocean mail steamers. It possesses one of the largest inland telegraph systems in the world. Bolder than many English and European railway alecting and the work done tells us, in Engineering, that where not a stick of timber, and no preparation for work sould be seen one day, the next would show two or three spans of a nicely finished bridge, and twenty-four hours afterwards the rails would be laid, and trains working reguany English and European railway, impanies, it runs its own sleeping and ming cars. Its hotels up among the cuntain glaciers attract tourists from all its of the globe. Its huge grain clevates give a storage to the farmers what I through the North-west; and its impanse landed estate—twenty-five millins of acress at the start—has probably against acres at the start—has probably

but now that the prairie is oro Children Cry for

756 miles and you must pa a more than six times between London and Inverness there for ages. It was really a giant's task to find, before you have accomplished a similar amid these treacherous glaciers and ma-A howling wilderness you may have heard some one call this thousand miles of rock and swamp, and lake and forest, along the northern edge of Georgian Bay and Lake Superior. Sparsely peopled it certainly is, with only here and there a lumberman's shanty, a small farm hewn

what about those three mountain what about those three mountain way, and

and the meeting of many landslips. Then came a gap of 220 miles, in which

two mountain ranges, the Selkirks and the Gold Range, had to be crossed.

What all this meant you can well realize to day as you climb for mile after

mile along the mountain sides through

forests of gigantic trees, and at last reach

the summit. Pile a respectable moun-

tain of 1,000 feet on the top of Snowdan,

and you will be about on a level with

this one point on the O.P.R. track. And

when you reach that summit what groups

rising up like giants to

and gives the Empire its only British route through nothing but British territory to

among the islands of the Southern seas.

Pinned up within the four corners of his little island, it is not easy for an Englishman to realise what a main line of 2,906 miles means. That is exactly

the distance from Montreal, where the trans-Atlantic voyage ends, to Vancouver,

whence the China and Japan and Hono-

lulu and Australasian steamers push their

way West and South across the Pacific.

Take the longest through journey known to us in the United Kingdom (from Lon-

don to Inverness), and you will have to pass up and down five times before you

cover the distance of this one Uanadian

main line. Add to this main line the

section to Halifax on the Atlantic verge-

and that section you must add if you

the nickel for the armor plates of its war-

To cut the hard rocks, dynamite fac

rock cutting, and on one 90-mile section

the iron rails bridged the gap between the

old Canada and the new just in time to

allow Canada's own soldiers to pass rapidly

to the Northwest to crush the half-breed

rising of 1885. The journey which Colonel Wolseley made with great labor

in three months, when he went to quell

1870, may now be done with ease in a

But it was on the prairie section,

covering the next thousand miles between

Winnipeg and the Rocky mountains, that

the C.P.R., set the world's record in rail-

way making. Very much easier the

work of course was than that through the

rocks and swamps of the Lake Superior

section, or that among the gorges and

glaciers of the mountains. But do not

suppose that the prairie is like one long

billiard table. There is really very little

level country west of Winnipeg; it is all up and down hill, and it took 17,000

cubic yards of earthwork in each mile to

raise the rails to a level and put the line

out of reach of the winter snow. And do

not suppose that the rails were just

stretched out on the flat earth with a

spike here and there and then left. The

line was meant for many a year's hard

day or two.

tories had to be established on the spot,

from the east and the other from the Jr 4th class-Eva Rodman, Luther Gilson, west, face to face, with only one rail Eliza Stevens, Maggie Gilson, Louie wanting to make the line complete from Haskill, Bessie Robinson, Louie Gilson, sea to sea. And now for the last spike! Mary A Wills, Laurence Rodman, Melv'e Was it to be a golden one, driven amid the flow of champagne, as on other American roads? Not at all. It was Wills, Ida Wickett, Heber Cornish,

ready hear of the mineral wealth of this same "howling wilderness." It is from for the first time by one through line, and ald. 1st class-Margaret Ferguson, Stanthis region that the United States buys the experience of seven years has shown ley Gilson, Casey McDonald, Eletta Weshow well the work was done. What tern, Ernest Wooldridge. R. S. Broad, Columbus set out to discover, what the teacher, Sieur de la Salle dreamed away his days and on dynamite alone one and a half in desiring, and what Franklin and many million pounds sterling is said to have been spent. All through the winter of another hero gave their lives to find-a new route to China and India-was THE UNFAILING SUCCESS OF DODD'S KIDNEY 1884 85, 9,000 laborers, culled from all quickly found and opened to the world by corners of Europe, were employed in this mixed gang of engineers and navvies.

The United States, when it had a population of forty millions of people, only with difficulty carried a line from St. of the road alone as much as two million pounds sterling was expended.

Thus the hardest rocks at last were cut,

Thus the hardest rocks at last were cut,

Slied in the Canada, with five millions of

may judge by the past. Only yesterday, the first ricing of the hot headed Riel in as it were, Canada was little more than disconnected and despised provinces; to-day, thanks largely to the Canadian Paetfic railway, it is the home of a stordy, prosperous nationality. Only yesterday, homesteads and busy little towns-"cities" all, if you please. Only yesterday, as it were, Vancouver was the centre of a dense pine forest. To-day the pines have given place to broad avenues of shops and residences, with electric lights and electric cars such as England cannot

boast, and into their storehouses trans-Pacific steamers are pouring the produce and luxuries of Asia and Australasia. Who shall set limits to the future of a land with such a record of enterprise as

that? POWLES CORNER, FENELON.

full tied and full spiked, and in no case were rails hauled ahead by teams; they Special to The Warder
RANCHES.—Mr. Jas. Fell drove 31 head of cattle back to his ranch in Somerville Mr. Feil is a large stock raiser, and a good farmer in every particular ...... Another drove of cattle went from this locality to the big island owned by Smith running over 105 miles westward from & Co. of Port Hope. This island is a grand Winnipeg. A line about equal in length to that from London to Sheffield had shade.

AROUND AGAIN.—We are glad to see our old friend Mr. John Lean around again, after an attack of inflamation. Mr. than equal to the distance from London again, after an at to Edinburgh, were added, and in 1883 Lean was skilfull another 876 miles, and thus in three sea- of Fenelon Falls. Lean was skilfully treated by Dr. Wilson

SEEDING .- Farmers in this part are nearly through seeding. Some have already finished They are all pleased with the fine spring, and good crops are anticitwo working days—for the record shows the fine that the C.P.R. rested from its labors on

Good Enough .- Mr. John C. Parrish has a ben turkey that layed two eggs in one day. Who can beat this? AN OLD PRACTICE. —It is an old practice and one that should be stepped, that is for the council to allow pigs to run at large to cultivate each side of the road for every bnoxious weed, and then compel the mers to cut these weeds. As the Fen-

elon council is made up of wise men why don't they show some of their wisdom and abelish that which is wrong?

Come to Stax.—Mr. John McRae, Mrs. Samuel Magee's father, who has been livnamuel Magee's father, who has been living near Pontypool for a number of years, has some to spend the rest of his days with his daughter, Mrs. Magee. The old gentlemen is very feeble. Owing to the infirmitles of old age his memory is nearly gone, as he still thinks he is living at Pontypool.
