The Kent Case.

PHYSICIANS UNIVERSALLY ADMIT THE DIAG NOSIS TO HAVE BEEN CORRECT.

OTTAWA, April 22—The diagnosis in the case of Mr. G. H. Kant, of this city, whose recovery from Bright's disease by the use of Dodd's Kidney Pills has been so extensively chronicied appears to have been a very correct chronicied appears to have been a very correct one. The swelling of the body and extremi-ties to an abnormal size, the fearful convul-sions and consequent insensibility, the racking pains, the formation of the hard ridges across pains, the formation of the hard ridges across the pit of the stomach and the great loss of albumen are all symptoms of this terrible disease, and it is universally admitted by all who have been approached on the subject that the case was unmistakable in its character. This also universally admitted that he owes his restored health to the above mentioned remedy.

Meeting of Presbytery.

AFTER SUFFERING FOR 18 YEARS THE GREAT SPRING MEDICINE

CUBES MRS. G.H. PARKER

Eighteen years of intense suffering, disappointment and anxiety!
Failure after failure with doctors and worthless medicines made life sad and dreary for

Mrs. G. H. Parker, Winona, Ont.!

After some persuasion Mrs. Parker was induced to give Paine's Celery Compound a fair and honest trial. What happy grand results! Such a victory over suffering! Complete cure and renewed

The following is Mrs. Parker's unsolicited "I have been a great sufferer from neuralgia for nearly eighteen years; these sufferings at times were so bad that words would fail to describe them. After having tried every known remedy, and different physicians, and receiving no help I was persuaded to try your Paine's Celery Compound, which I have been using for the past four months. I am happy to say that I am now a different woman and

Short-sighted Dr. Parkhurst.

Dr. Parkhurst, of New York, has en listed the sympathy of reformers the world over, by his vigorous and fearless onelaught on the Tommany thieves of New York. Owing to his persistent pugnacity, he has succeeded in exposing to legal penalties a system of organized blackmail which every business man in New York has known to exist, by his o . n personal experience, for more than thirty years. In spite of the complicity of both political parties, a partial and temporary reformation has been effected. How partial and temporary begins already to

that they have already seriously lessened the popularity of the paper with the sex upon whose patronage Mr. Bok depends, Dr. Parkhurst says

"Some of my loquacious sisters are giving us to understand that men are very wloked and very much disposed to neglect their civic obligations. . . . Each one of these wicked and unfaithful men was bern of a woman, and it his mother had been a more faithful mother the probability is that he would have been a better man and a more faithful citizen. All the female congresses in the world might sombine in colossal mass meeting and vote with passionate show of hands that woman's sphere is coincident with the spherity of the globe or even of all the heavens; but the very idiosynceracy of her physical build and the limitations essentially bound up in it will sponge out her mass-meeting resolations as fast as she can pass them. . . I am really sorry for those women that wish they were men; I wish they were, it would be such a relief to the rest of us all as well as to them; but it is a little late to move for a repeal, and without it any masculine experiments which they may venture will never quite succeed or satisfy."

Dr. Parkhurst assumes that voting is a

function exclusively masculine, and that women who want to vote wish they were Paine's Celery Compound men. On the contrary, we want women to vote because they are unlike men, and need the ballot to represent themselves.

Now mark our prediction; with all the glamor of apparent success, the spasmodic effort for reform in New York politics will soon die out. Within five years a republican ring of tricketers known as "Tammany," and every abuse of 1898 will go on unchecked in 1900.

And why? Because the only condition of permanent reform in a representative govern-ment is a reform in the voting constituency Given a body of voters a majority of whom are selfith, ignorant, corrupt, preoccupied and careless and the result is Tammany in some form and under some adroit organizer and distributer of public plunder. Either the suffrage must be taken from a great body of irresponsible persons who now vote, or it must be extended to a great body of responsible persons not new voters. The first is practically impossible; the latter is municipal suffrage for women upon an

educational qualification.

Dr. Parkhurse, if, as I believe, he is an earnest, sincere, public spirited man, will wake up one of these days to the fact that he is attempting the impossiblecutting off the hydra which are sprouting anew. Then he will give his aid and cooperation to the only permanent reform -a reform in the voting constituency by the extension of suffrage to educated, responsible, public spirited women made to be the political help-meets of men.

Lucy Stone has well said : "There is only one name under heaven whereeby America can be saved politically, and that name is 'woman.'"—[Boston Woman's Journal.
