To-day, she is a picture of womanly health, vigor and beauty, and joyfully declares, 'I am now a new woman, can enjoy life, and am as well as I wish to be."

When Miss Blake makes the declaration that she is a "new woman," she does not wish it to be understood that she has entered the ranks, and adopted the fads of shose light-brained women who would usurp the legitimate positions of men, and go through life clad in half masculine attire, with the fixed idea of altering the plans of an all-wise Providence,

No estimate has ever been formed of the wealth lavished on the building, but that it must have been enormous no one who examines the almost incredible employed a host of the most skilled laborers obtainable in the Eastern world tor twenty-two years, and when it is re-membered that the building is small com-pared with most of those on which emperors have lavished their treasures, some idea of the intricacy of its design and the beauty of its execution may be formed.

The gateway by which we entered the the purest white marble polished to the highest perfection of which the stone is capable, while the carving and designs embossed on the surface are remarkable for the elegance and grace of their conception as well as for the perfection of their execution. It is no easy matter to accustom the mind to the idea that this work, hardly less perfect to day than it was two hundred and fifty years ago, can have stood exposed to the weather all those years. Something, no doubt, is due to the climate, and more, perhaps, to the exquisite polish of the surface, which has fitted it to resist the weather to the best advantage. It is, however, on the interior of the mausoleum that Eastern art, with all its wealth of patient industry, has lavished the best of all it had to offer. The whole interior blazes with absolute silence.

The veilist was greeted with absolute silence.

Political Notes. A FEATURE OF THE DAY.

Champions of slavery were always stermined free traders. The man who must go to market pays the price of getting there.

A tariff in a rex upon us when levied on goods we desnot produce. If manufacturing is so profitable, why do not free traders undertake it? In free trade times the constable and

ORGANIZATION OF FARMERS.

James Rogers Speaks Earnestly The development of Farmers' Institutes and other means of education on successful practical farming has proven beyond a doubt that the present day farmer requires to be a student of his work. The most successful ones are not,

as a rule, those who do the greatest amount of manual labor, but they are found ranking first as prize-winners on all agricultural products. James Rogers, a resident of Tilsonburg, Oxford Co., Ont., for 45 years, has taken numerous firs prizes during the year. A successful, reliable man, his statement will be of interest to many: "I have suffered for seven or eight years with Itching Piles; the torture and agony I cannot here find words to describe. Night after night was kept awake with the painful itching. I tried all the physicians and every known remedy all to no account, not even relief. In talking over my curious trouble with Mr. Chas.
