Paine's Celery Compound was the outcome of his entire pro-

verience of those in charge. The heating is done by means of wood furnance and throughout the whole place it is costly warm, the temperature, in come cases where required being above

70°. Registers and drums control and distribute the heat. The lightir g is all by coal oil, the lamps ed in one home, where the same light, being in brackets, in order to avoid accidents by upsetting. It is thought that the council or the Heat, Light and Power company will put in electric light shortly, which is undoubtedly required and would be of great service and saving in every way. Another of the board of management's pleasent dreams is that some

country realize the fact as quickly as the men When times are really hard, the women are the first to study true economy.
