GRIT TACTICS.

Orangemen and other conservative protestants have become familiar with grit appeals to prejudice, and therefore pay no attention to such.

In 1871 the grits in Ontario appealed to Thomas Scott, and between misrepresentations and the bogus offer of \$5,000 for Riel's head succeeded in misleading the grits in office.

Once in office, however, they had no further use for orangemen. It then leaked out that the solid promises of one learning history from such an exhibit office and needless changes in the separate school law had been given the roman catholics. They got the substance.

concerned, been sucking thumbs ever since, and enjoying the fun of seeing their opponents fatten at the public crib.

In 1885, the grits again prepared a vigorous appeal on the Riel question, the Ontario public of the absolute neceshoping to catch orange votes. But Sir sity of the Manitoba school law of 1890, it John Thompson signed Riel's death can be found in this beautiful historical warrant and refused to recommend a production, which condemns all those commutation of the sentence. Riel was hanged. The grits saw no gain from orange votes; so thay wheeled about within twenty-four hours and played for the French-Canadian vote. Then began that struggle in Quebec which has so greatly redounded to the credit of French Canadian conservatives. They stood to that the Rev. Canon Logan, for many their guns like men; they braved the years rector of St. James' church, Fenelon Canadian conservatives. They stood to jeers and even personal violence of those whom Laurier, Mercier and others then incited to extreme measures. Though losses were sustained in Quebec yet they altogether unexpected, for Mr. Logan's were very few indeed.

In 1889 the grits tried to break up the orangemen on the question of the Jesuits Estates act. The act was passed by Scotchman by birth, and was one of the Mercier and his grit following in Quebec: | courtly gentlemen not too often met with the law officers of the crown in England while admitting the preamble to be

The orangemen and other protestant conservatives stood to the constitution

They know that in Ontario the grits have corruptly given school concessions to roman catholics that are unnecessary, and unjust to protestants for they increase the burdens of taxation on the latter.

They know also that all that the conservative government at Ottawa is doing in presenting the remedial bill is to allow the roman catholics to tax themselves; not touch one farthing of protestant taxes or money as the grits in Ontario have let them do; and not even to get a

agrees with him or not. This case differs from the New Bruns wick school case in that in New Brunswick case the roman catholics had no legal grievance, no judgment of a court in their favor, no legal status. In this Manitoba case the roman catholics have a legal decision of the highest court in the British Empire in their favor.

Orangemen and protestant conservatives will not be misled as in 1871, by the grits, their hereditary enemies.

The Manitoba government should have made the second proposal absolute, instead of depending on the fancy of a majority of the trustees in each section. It cannot be said the Manitoba government have made any proposal that even s majority of protestants would accept.

A Pretty Picture.

The Star has on its counter, or will have in a couple of days after the picture is properly mounted, a christian and historical chart issued by the Oblate fathers and bearing the imprint of father Lacombe, showing the progress from the creation of the world until hell swallows the orangemen on the murder of the noble | the protestants and other improper people of the human concourse that wends its way from time into eternity. This remarkable chart, which is of considerable extent, was used in the schools of Manitoba, and enough protestant conservatives to place is without doubt one of the most paganish things ever exhibited in a christian country as an educational document. Its marvellous windings are used to teach not only theology, but history, and anywould certainly consider himself privileged to kill at sight anyone wandering on the dark path, the convolutions of which fill one side of this interesting "progress." The orangemen turned their friends out Not one out a hundred of our intelligent of office and have, so far as Ontario is roman catholic fellow citizens in Ontario could be made to believe that such a picture could ever be exhibited in a public school. I think it would be a pityif we could not give it to them. The hon. gentleman knows as well as I do that the protestants of that country asked that they might enjoy the same privileges as the protestant minority of Quebec enjoyed, and their request was granted, by the Canadian government. But when the descendants of the old pioneer missionaries of that country are reduced to a small minority. Owing to the facts that the number of voters in polling subdivision No. 2 exceeds 200, which is the limit prescribed in the act, and that the people living in the noth-neast part of of the township experienced much incomvenience on election days by coming to the saudpit to poll their votes. After the argument given by the Seco State upon the second reading of the Bill. it seems to me that those people in Manitoba should have settled this difficulty in three should have settled this difficulty in three hours. As a juror of this country, I fail to see that the argument laid down by the hon, Secretary of State has been answered or confuted yet. have to admit the same thing, if he was a sworn juror. Now, I want to say to the hon. leader of the Opposition that I regret exceedingly that I, as an Orangeman since the year 1855, have to stand on the floor of this house and vindicate the rights of the catholic minority in Manitoba when the leader of the sition will not stand up for the rights of he minority of his own religion, for the sake of political clap-trap. I say as an honest man and having the courage of my convictions that it is greatly to be regretted that a man would sacrifice the rights of his own church and his own people for the sake of a little political capital. I pity the hon, gentleman, I remember very well a day or two after the opening of this debate, when I was standing up in defence of the hon, gentleman, and saying that I was pleased to see him in good health and good form and good voice, and that he had made a good fight in such a bad cause, always having a sympathy for the 'under-dog' in a fight, a nice little curly headed French Canadian remarked: "Mr. Laurier speak well, speak long, but, my God, he say nothing." I agree with that bright, black-eved young French Canadian that Mr. Laurier spoke well and spoke long, but he satil nothing, He never pretchied to answer the arguments of the header of the house. I say it is an outrage on the stability of this country that the people in Manitoba cannot of political clap-trap. I say as an honest say it is an outrage on the stability of this country that the people in Manitoba cannot enjoy the same educational privileges as the protestant minority enjoy in Quebec. I would go a long way to allow them to have the same privileges, and I think the least we can do is to give them the privilege of putting their hands in their pockets to provide for the advention of their own children. The rails. education of their own children. The religious teaching of our children is a sacred right that all Ganadians have a right to enjoy. The that all Ganadians have a right to enjoy. The hon, leader of the Opposition made a remark in his first speech which I think was in bad taste. He pitched into his clergyman. It my clergyman interfered with anything pertaining to my firm, I widn'd cross swords with him very quick, but I think any clergyman has a right to look after the religious interests of his flock. I had not looked at that letter until after I had heard the hon, gentleman's remarks. Then I went and hunted it up, and I really thought it was very fair, and gave good advices to the hom, gentleman, and its might be proud to follow a shephard like that. The Peterboro Saturday Afternoon inti-mates that Lindsay will lose one of her fairest daughters in June. It says the roman catholic church will be the scene of the very interesting event and that the groom will hail from New York, whither the young couple will take up residence. People sometimes talk about inefficency of the firemen. This cannot be said THE WARDER representative on the brigade, however At the alarm on Wednesday that individual in clearing a mud hole made a leap, by actual measurement, 22 feet in length. The sporting scribbler now wears a smile and wants to back the jump

against any previous records. There are two modes of establishing off reputation—to be praised by honest men and to be abused by regues. It is best, however, to secure the fermer, because it will be invariably accompanied by the latter. His calumniation is not only the destest benefit a rogue can easier upon as, but it is also the only service that be perform for nothing.
