Political Notes.

The political campaign opened on April th, in Owen Sound, when Mr. Dalton McCarthy, Mr. Wem. Stubbs, and Mr. J. M. Godfrey addressed the electors. The visitors were met at the C.P.R. depot on their arrival by a reception committee of the McCarthy league. A procession was formed, and with the Citizens' Own band leading, a march was made through the treets. That part of the demonstration was a complete fiasco, and it is questionable if a more dilapidated turnout was ever seen in Owen Sound on any cooasion of this description.

The liberal leader has issued a highly colored lithograph of himself, decorated with two Union Jacks. It is clearly a little dodge to play upon the patriotism of the electors. But it will not go down with intelligent people. The picture of a man who is willing to lend himself to as in the vain hope of getting into power, is out of place in such a setting. The stars and stripes would be more in keeping with his policy of unrestricted trade with he United States which simply means commercial union, or an ill-concealed stepping stone to annexation.

The trade returns for the nine months of the present fiscal year show that the pusiness of the country as shewn in the exports and imports has increased \$11, in the country would be compelled to

"Mr. Laurier speak well, speak long, but, my God, he say nothing." This remark was made by a French Canadian, and the applicability of it is quite apparent to any person who has taken the time and trouble to read Mr. Laurier's speeches. At one time a protectionist, then for commercial union; again for unrestricted reciprosity, to be followed by free trade; then for revenue tariff, again for free trade as they have it in England. Anything and everything to eatch a vote, but no settled policy.

Flaneur in the Mail and Empire writes as follows: "As several people who have written to me do not apparently quite understand what Mr. Chamberlain's proposal amounts to, I will endeavour to make it plain in a few words. It is simply that England and her colonies should enter into an offensive and defensive partthe ports within this union should establish a tariff, or customs duty, against all the world if necessary, or such portions of the world as declined to enter into reciptocal trade relations with the British zollverein. In fact it is proposed in a manner differing little from the United States, with free trade, or nearly free trade; throughout the British Empire and protection outside. I think I have made the but for the shild, the most helpless and proposal plain.'

OUR BOYS AND GIRLS.

Paine's Celery Compound Gives Them Strong Nerves, Pure Blood and Healthy Bodies.

IT PLANTS THE FEET OF THE YOUNG ON THE SURE ROCK OF HEALTH.

It is now an established fact that the majority of boys and girls who are ailing and sickly, suffer from a weakened condition of the nervous system.

It should be remembered, that a boy's or girl's nervous system is exceedingly delicate, sensitive, and very easily deranged. When the young people are nervous, irritable, do not sleep well, have headache, variable appetite, sallowness of akin, and eruptions on face, be assured the blood is disordered and the nervous force weak.

and mothers have sent in thankful and grateful letters, testifying in unmistakeable language that their children were saved from disease by Paine's Celery Compound. of the Salvation Army, entitled "Light in Darkest England," the writer voices the grave danger that exists in the wide disnership for trading purposes, and while grave danger that exists in the wide disadmitting each partners products into all tribution of objectionable literature among the young. He says: "I have been much struck by some words of the kingdom for the soldier, a kingdom for the merchant, a kingdom for the schooldependent person in the community, the kingdom has practically no existence. Everybody has held the doctrine that the children make the nation, but nebody has held the doctrine that the nation had any duty towards the children.

"But before the children come to their kingdom one or two things must come to pass. Perhaps the most important of these would be some better classification of them in the schools, many of which are now, in the nature of things, hot-beds of sinful infection. One sinner destroyeth much good, and the schools prove it. The tidy children of the careful working mother, who have been guarded at least from open blasphemy and unclean habits, must associate with those who are the very opposite in taste, in training, in habits, and in heart; and if they do there the contract of the co can only be one result. We are already reaping the harvest we have sown day by

While we are quarrelling about the number of verses of the Bible which are to be read in the hearing of the little children, a thousand printing presses are pouring out a stream of filth at the lowest possible price, and it is spread abroad among them like the breath of the grave in its blighting and demoralising effect.

We Hold the Key. But why reflect upon the politician? He is simply the creation of the conditions which Christians suffer to prevail. The latter can effect a reform in a night. HEADACHE.

A SIMPLE CURE.

As a sure cure for headache, whether caused by liver, stomach, kidney or nerve trouble, Burdock Blood Bitters is the most effective medicine known. It removes the cause of headsche by restoring all the organs of the system to proper action and health. Doubts disappear in view of proofs like this;

In the spring of 1891 I got a bottle of B. B. B. for my mother who had been troubled for twenty five years with sick headache. I got it from Mr. W. Paxton Baird, of Woodstock, N. B., who gave me two other medicines to take home and let my mother take her choice. Fortunately she chose the Burdock Blood Bitters, and I returned the other bottles. She used it for three months, and has had no headache since. We are sure that it was B.B.B. cured her, as she took no other medicine. J. A. GREEN, Hartford, N.B. Nov., 1895.—41.2.

W. G. WOODS,

DEAR SIR,—I have much pleasure in stating that the Gurney Oxford Hot Water System which you set up in my house in the autumn of 1894 was fully what you represented it to be, and gave entire satisfaction. There was no dust, no smoke, no gas, no leakage, and the air seemed pleasant and agreeable to breathe, so that no one had a cough in my house during the entire winter. Notwithstanding the severity of last winter our house was so comfortable that we had to go outside to find if the day was cold, while the quantity of coal consumed was only a little more than we had burned in former winters in one large coal stove with less rooms to be heated. The Furnace was easily managed, and with ordinary care the temperature of the house could be kept at any degree desired. I can heastly recommend this system of heating to any one who during our Canadian winter désires to enjoy what I can best describe as "Soiid Cemfort."
