He makes sure of being able to pull himself back to a safe place out of the liberal wreck. This cold, calculating, half-in and half-out position of Sir Oliver's must be sorely humiliating to Mr. Laurier. Mr. Laurier has risked everything on the result. Sir Oliver is risking absolutely nothing. He evidently does not consider the chance of a liberal victory a very safe chance to risk anything upon.

The subjoined is an unsolicited testimonial which Dr. Poole kindly handed me a few days ago. "Nuff sed" Read it. W. G. WOODS,

DEAR STR.—I have much pleasure in stating that the Gurney Oxford Hot Water System which you set up in my house in the autumn of 1894 was fully what you represented it to be, and gave entire satisfaction. There was no dust, no smoke, no gas, no leakage, and the air seemed pleasant and agreeable to breathe, so that no one had a cough in my house during the entire winter. Notwithstanding the severity of last winter our house was so comfortable that we had to go outside to find if the day was cold, while the quantity of coal consumed was only a little more than we had burned in former winters in one large obal stove with less rooms to be heated. The Furnsco was easily managed, and with ordinary care the temperature of the house could be kept at any degree desired. I can heastly recommend this system of heating to any one who during our Canadian winter desires to erjoy what I can beat describe as "Solid Comfort."
