MANHOOD." ERIE MEDICAL CO., Deffalo, N.Y.

The Victoria Warder

FP.IDAY, MAY 29, 1806.

The Girl That is Yet to Be.

The songs that have long taken chances In praise of a dame with a past: In dreams of her tender glances, Have faded and faltered at last.

The day of an idol behind you,
The sweet maid of eighteen to see, loomers, or skirts, will semind you Of the girl that is yet to be, Beats all that the past can show, and all the ridiculous laughter

Of the girls that I used to know. of I think of her acting and singing. and her wheeling in fancy free, for the girl that is yet to be. ancy she'll dress like her brother:

greet her with words that are gay. d rush out to lunch with another I'm certain to meet every day. tits easy to banish the faces You care not at all to see, Then I only look for the places
Of the girl that is to be.

think and I dream of caresses. Mid perfume as sweet as a rose; The glisten and gleam of her tresses That changed with last winter's snows. She may have a future that's pleasant, She may have a past, I'll agree, But give me the maid with a present,

For the girl that is yet to be.

C. D. CLIFFE, in Montreal Gazette, May, '96.

That Hacking, Persistent, Distressing cough can be quickly cured by using Dr. Wood's Norway Pine Syrup. It cures all Threat and Lung troubles.—48.3.

Political Notes. A Halifax correspondent says that in The bluenoses are so be

alike for their good fortune and their The London Morning Post thinks that only Positive Cure in the Canadians to make a change in the rties in control of the government at the present time "would seem to the ormutal as well as political tactics." The Eurish and the Canadian ideas are much alike on this point.

Every grit paper in the country is de-councing Sir Charles Tupper's support of the Hudson Bay railway scheme as a bribe to the northwest. Singular to say, when Mr. Laurier spoke at Winnipeg in 1894 he denounced the government for its dilatory treatment of that scheme. He said that it was an enterprise full of promise and the government should have vestigated its merits long sgo. - Ottawa

Mr. McCarthy said at Georgeiown in 894,—sixteen months ago,—these words: No man felt ashamed to acknowledge Sir John Macdonald and Sir Charles Papper as leaders." Later on he said that if the government was made up of men like Sir Charles Tupper, he would support it loyally. A few evenings ago he made a shameful and unmanly attack upon Sir Charles Tupper's private character,—the most cowardly and disgraceful ulterance ever made on a public platform

Hon. Mr. Laurier at times shows, for man of his cleverness, an incomprehen sible lack of discretion. He not only makes most injudicious remarks, but his actions betray an indiscretion most damning to the chances of a man who is asking the country to elect him as premier. His latest tactless move is his conference on Monday in Montreal with the notorious Edward Farrer, the archanexationist and the representative of the New York Sun, the newspaper in the United States most antagonistic to Great Britain and British interests and whose thief aim is to accomplish the absorption of Canada by the United States. Mr. Laurier may make any glib explanation of this he chooses, but Canadians place no trust in the would be leader who has displayed neither policy nor patriotism.
It ill becomes the lauded liberal leader. upon the eye of an important political election, to plot with such an enemy to Canada as Edward Farrer.

Weak, Nervous Women.

Strength and good health restored.

I was subject to frequent attacks of acrousness that seemed to sap all my vitality and left me in a state of weakness and misery. I could not relish food and such a thing as a good night's rest was unknown. Incapable of any exertion and with an ever present tired and despondent feeling. Medicines that I took did not do any good; it was a case of gradually becoming weaker and weaker. Hearing of Scott's Sarsaparilla and its success with similar cases to mine, I used it, and from the first few doses began to get better, appetite returned, got natural and refreshing sleep. I grew stronger, in fact life seemed to be fanned into activity.—Lottie Graham, 174 Crawford Street, Toronto.

For any weakness of the nerves, pale and sallow complexion, loss of appetite asse the best blood and nerve remedy extant, Scott's Sarsaparilla. Insist on getting Scott's—imitations do not cure.

Newfoundland's Hidden Wealth. wayside inn. Taverns which had hardly

Canadian newspapere have, until re-ntly, contained such lamentable eccunts of the state of trade in Newto the nature of the ground mining there would be a comparatively easy matter and not surrounded by the many difficulties that it is in rocky British Columbia.

In addition to the ore and metals re-

erred to the region is rich in copper. which is found everywhere, bematite, specular and chronate iron ores, coal, petroleum. lead, nickel, iron pyrites, antimony, marbles, gypsum, mica and asbestos. The rock where the oil was discovered resembles that in which it is

origin of coal, for unlike coal it has no being the case, it can be understood organic structure. The general opinion, however, is that it is caused by the decay grade machines maintain a rigid system of animal and vegetable matter while the coal deposit comes from the decomposition of vegetable matter solely. However this may be there is evidently an abundance of the useful product petroleum to guesswork in the material entering the tion of vegetable matter solely. However this may be there is evidently an abund-ance of the useful product petroleum to be found on the west coast of Newfoundland. The west coast is also rich in fibrous tale which is so largely used in the manufacture of paper, and also for the baser purpose of adulterating sugar and other food products. The material itself seems a pity to put it to such base uses.

As a component part of toilet and bath powders it certainly is valuable as its oily nature increasee its adhesiveness. Already is the fact known that about the glacial period, stood at a much higher thirty per cent of the pulp of good printing paper can be made to consist of this

ground fibrous tale. What Newfoundland needs then is enterprise with capital to develop the from what they now are, and to create

We venture the hope that in the near future Newfoundland may come inte Canada and thus secure valuable aid in the development of those mineral re-sources of which she is so justly proud.— of this great river Dr. Bell assumes to have been in the middle of what is now Industrial Canada.

## HELPLESSNESS AND AGONY!

matism and Sciatica.

intense pain; this disease is veritable

rheumatism. The great medicinal virtues of Paine's Celery Compound makes it the only trustworthy specific in the world for the complete cure of all forms of rheumatism. Paine's Celery Compound is curing hundreds of cases every day. Testimonials without number declare that this great remedy of nature has effected cures after all other medicines failed.

You cannot afford to experiment with hourly has exemplication. When eyelists the common and worthless preparations first ventured to strap and sling little of the day, when you can procure a guaranteed medicine like Paine's Oclery Compound, so highly recommended by the best physicians. Bear in mind that those cured by Paine's Celery Compound are cured permanently. There is no more return of the terrible disease; no twisted, contracted and stiffened limbs.
Paine's Celery Compound gives a new existence, and old sufferers walk with as much elasticity and spryness as any

Do not be persuaded by substituting dealers to take any of the medicines they may resommend for their own benefit and profit; insist upon getting Paine's Celery Compound, the medicine that always cures.

Items of Interest.

It is quite possible to arrange flowers in a garden so that a clock is unnecessary to tell the time. In the days of Pliny to tell the time. In the days of Pliny forty-six flowers were known to open and shut at certain hours of the day, and this number has been increased since then. For instance, dandelions open promptly, often to the minute, at 5.30 in the morning, and close at 8 o'clock at night. The common hawkweed opens at 8 in the morning and may be depended on to shut at a few minutes to 2. The yellow boatsbeard shuts precisely at noon, siderest time. The white lily opens at 7 a.m. and closes at 5 p.m.

closes at 5 p.m:

The need of special hosiery adapted to the use of bicycle riders in knickerbockers has been so great that some knitting mills have been refitted to meet the new demand for that sort of merchandise. The market for aweaters is nearly as important a source of novel business, and the knitting mills profit largely, also, by the demand for equestrian tights, knitted underwear, leggings, belts, caps and gloves. They are feeling the stimulating effects of the great increase in the use of the wheel, all along the line, and no other branch of the woellan industry, probably, is anything like so prosperous as the knitting mills. There is a bloycle-made demand, too, for fine stockings knit by hand, and this promises to cause quite a savival of an old but almost abandoned art; just as the wheelmen and their "sisters, cousins, and aunts," have closes at 5 p.m.

business enough to keep them open, before bicycling came into vogue, are doing a fair business again. The manufacturer of the modern foundland that it is a relief to read of her hidden wealth. According to the report of a skilled mining expert Newfoundland is particularly rich in gold, silver and other precious metals. Owing to the nature of the ground mining there would be a comparatively easy matter pressure gans, for instance, the factor of and other pressure gans, for instance, the factor of and other mechanical product. In high pressure gans, for instance, the factor of and other mechanical product. safety is even as great as twenty—that is, guns are made twenty times as strong as is theoretically necessary for the strain they are to bear. In ordinary guns the factor of safety is twelve, in boilers it is about six, in bridges, usually five, and in almost every other form of machine it is at least four. Such wide margins of extra strength are deemed as an offset to errors in theoretical computations or defect in material construction. With The origin of petroleum has long been the modern light construction in bicycles a subject of scientific speculation and it is reduced to a very small margin, seems more difficult to solve than the being as low in instances as 1.25. Such

construction of their wheels. Some interesting scientific theories geological and geographical have been brought to the attention of the Royal Society of Canada by Dr. Robt. Bell, and in particular concerning what he dehas so many other merits merits that it clares to have been a great pre-glacial the glacial period, stood at a much higher elevation than at the present time, amounting to, perhaps, between two and three thousand teet, the imevitable result of this being to change the river systems vast hidden resources and make of the in the north a gigantic river, draining an island a veritable El Dorado. American continent and forming a drainage basin seven times as large as that of the St. Lawrence. The central portion Hudson Bay, as proved by the existing depressions of land in the north of Canada and the great depth of the centre of Hudson bay, and its lower part discharged through what is now Hudson Straits, into Dayis Straits. It is also maintained that the upper half of the St. Lawrence basin, both in preglacial times and also at a later geographical period, discharged its waters northward by way of what is now Hudson Bay, and it is asserted that this constituted one of the main branches of this great northern

The Guelph Mercury, a liberal paper doing business beside a larger manufactory of musical instruments says :- "In 1878 ONTARIO Nova Scotia the achool question is releschinidt at Co., schinidt at Co., schinidt at Co., church, and led control of the background, and the dispoint of the background, and the dispoint is generally on the trade question. Prompt Banisher of Rueu

In the background of the background, and the dispoint of the background of the bac ed of a melodian or organ. were few and far between. The farm house which contained any musical instrument more costly than a fiddle was a The Only Positive Cure in the World.

Thousands of Convincing Testimonials from Oured People.

The agonizing and terrible troubles known as rheumatism and setatica, are probably the cause of more helplessness and acute suffering than any half dozen others that could be named.

The original cause of rheumatism is a lack of nerve force. By this weakness of the nervous system, an acid is formed which enters the blood. Soon the joints swell—usually the knees, elbows and wrists—and there is inflammation with intense pain; this disease is veritable

The Only Positive Cure in the secome a necessity, and are no longer a luxury. Planos are as plentiful perhaps as organs were in the seventies. The annual consumption, or purchase, of such instruments in 1878 80 was about \$1,700,000; to-day it is double, say about \$3,400,000, while the population has only increased about 12 to 15 per cent. Of the \$1,700,000 used about 1878 80, our own factories supplied \$1.

200,000 worth, while nearly \$500,000 were supplied from outsile, over \$350,000,00 this being planos. The annual purchase to-day of \$3,400,000 may be said to be supplied almost wholly by our own factories, the imports of \$800,000 being balanced by the exports." It cannot be denied that without protection these results would have been utterly impossible. rarity. In our day musical instruments

Mr. C. Connelly, wholesele liquor dealer, Alliston, Ont., was troubled for years with Itching Piles. He was persuaded by Jas. McGarvey. Alliston, livery man, to use Chare's Ointment, which he did, was cured, has had no return of them, and highly re-commends this Ointment as a sovereign cure

"Familiarity breeds contempt" is an old and true adage which daily and even ones on the foreparts of their wheels many an anxious onlooker expressed concern and discomfort at the sight; but in cern and discomfort at the sight; but in due course fear or thought of probable danger no longer haunted the mind or pointed the tongue and comments expressive of gladness and amusement were heard instead. The Illinois humane society has however placed itself on record as strongly opposed on hygienic grounds to the fashion and has determined to prosecute offenders in the interest of babies and of humanity. It is pointed out that the defenceless child must bear the brunt of any shock from collision or loss of balance, and that the collision or loss of balance, and that the excessive speed through air and wind is productive of serious effects on the deli-cate fabric of lung and of brain.

Preacher and Teacher.

REV. CHAS. E. WHITCOMBE, RECTOR ST. MATTHEW'S EPISCOPAL CHURCH AND PRINCIPAL ST. MATTHEW'S PARISH SCHOOL, HAMILTON, ONT , FOUND GREAT RELIEF FROM DR. AGNEW'S CATARRHAL

The rector of St. Matthew's church, Hamilton, Oat., holds a warm place in the hearts of his people, not alone because he is a taithful pastor, but for the work he has done for the children of Hamilton as principal of St. Matthew's parish school. As he has sent forth his influence through church and school, so he extends in a wider way the good properties of that wonderful medicine, Dr. Agnew's Catarrhal Powder, by telling the people of Canada how much it has helped him. There is something unique in this medi-cine that secures favor wherever it is known, and which just now is making a host of friends because of the certain re-lief it gives in cases of hay fever, a trouble that afflicts many at this season of the year. As a cure for catarrhal trouble it has no equal. Sold by P. Morgan, druggist, Lindsay.—45-1.

An Exceptional Sale.

ST. JOHN IS MUCH INTERESTED IN THE RECENT

ST. JOHN, N.B. May 25—The many cases of marvellous restoration to health from various torms of kidney trouble which have been constantly appearing in the daily press of the Dominion have for some time awakened the liveliest interest here, and the remedy by which the cures were effected namely, Dodd's Kidney Pills, are obtaining great celebrity througnout the province. The appearance of the testimonials of Drs. Rose and McCormick startling the benefits which they had personally derived from their use was considered a sufficient sign of the merits of the remedy, and the other interesting and wonderful cases which have since been chronicled has caused the specific to have an exceptional site —45-1. the specific to have an exceptional sale -45.1,

It Saved Our Child. "My little daughter, three and a half years old, suffered three years with Eczema. Her little body was covered with the itching rash, and doctors did no good. Four boxes of Chase's Clatmene have entirely cured and saved cur child. Her skin is clear and not a sign of rash is to be seen." Andrew Alton, Hartland, N.B. Mr. Alton is one of thousands benefited by this unfailing cure for piles and skin diseases.—45 1.

Law's Worm Syrup is the standard of excellence. Mothers recommend it. Children cry for it. Worms fly from it.—41.5.

A Silver Anniversary. "My heart throbs with pride, my love," remarked Mr. Proone, as he threw himself into his favorite armchair on their silver anniversary, "when I reflect that in all these years

no thunder-cloud has crossed the horizon of our connubial bliss." "Yes, it is a matter to be thankful for," replied Mrs. Proone, with a sigh, "Had I been like some women, though, you could not congratulate yourself

Mr. Proone looked rattled at this; then he squirmed uneasily in his chair "And if I had been like some men I know, I don't think we should have

lived as peaceably." "Perhaps not," mused Mrs. Proone, "though we might have been better off financially. Take the Haymaker family, for instance. Mr. Haymaker converts everything he puts his hands to to money. He works like a beaver-" "Yes, and Mrs. Haymaker is a sensi-

ble woman, too, and-" "Do you mean to say I am not "And do you insinuate that I an iazy, and-" sensible-'

"You're a fool-" "You're an idiot." "How dare you strike me?" Well, let go my ear with your

An Irishman, who was near-sighted and was about to fight a duer, insisted that he should stand six paces nearer to his antognist than the latter did to him, and they were both to fire at the same time. This beats Sherrdan's telling about a fat man who was going to fight a thin one, that the latter's slim figure ought to be chalked on the other's portly person, and if the bullet hit him outside the line it was to go for nothing.

Queer Fishes in Texas. Miss Myra Winkler called at our office the other day with a queer little fish found in the artesian wells at San Marcos, Tex. The fish is about four inches long, has human face, hands and feet. A large number or these are said to live on land as well as' in water.-Courier-Light.

The apple as a money maker compares favorably with any other fruit large or small, grown in any section of America. Hence the increased acreage of late years is not surprising Vast tracts of new commercial or-chards have been set out.

Mice, Rabbits, Insects. To keep off the mice and rabbits rub on axle grease lightly for two feet from the ground. Keep all loose bark rubbed off the trees, for under these scales is where insects like to hide.

To Renovate Leather. To renovate leather chairs, wipe them with a cloth, slightly damp, and then rub dry. Beat the white of an egg to a stiff froth, and apply to the leather with a soft cloth; then rub with a flannel.

A goose is not fully matured at one year old, but sometimes breeders will couple old males with young temales. Avoid getting them too fat, and give them plenty of opportunity for exercise.

W. G. WOODS,

DRAE Sig.—I have much pleasure in stating that the Gurney Oxford Hot Water System which you set up in my house in the autumu of 1894 was fully what you represented it to be, and gave entire satisfaction. There was no dust, no smoke, no gas, no leakage, and the air seemed pleasant and agreeable to breathe, so that no one had a cough in my house during the entire winter. Notwithstanding the severity of last winter our house was so comfortable that we had to go outside to find if the day was cold, while the quantity of coal consumed was only a little more than we had burned in former winters in one large coal stove with less rooms to be heated. The Furnace was easily managed, and with ordinary care the temperature of the house could be kept at any degree desired. I can heatily recommend this system of heating to any one who during our Canadian winter desires to enjoy what I can best describe as "Solid Cemtort."

(Sgd). THOS. W. POOLE. M.D., Lindsay.
