The rain, foreseen by my astute friend Wilson, hastened all my calls; but it did not prevent my climbing one of my mother's youthful haunts and pulling for her a few bunches of "bonnie purple heather." W. G. WOODS,

DARS SIR,—I have much pleasure in stating that the Gurney Crierd Hot Water Professor which you set up in my house in the autumn of 1894 was fully what you represented it to be, and gave once astisfaction. There was no dust, no smoke, no gas, no leakage, and the sir seemed pleasant and sgreeable to breathe, so that no one had a cough in my house during the entire winter. Notwithstanding the severity of last winter our house was so confortable that we had to go outside to find if the Jay was cold, while the quantity of coal consumed was only a little more than we had burned in former winters in one large coal stove with less rooms to be heated. The Furnace was sasily managed, —? with creinary cave the temperature of the house could be kept at any degree desired. I can heatily recommend this grown of heating to any one who during our Canadian winter desires to enjoy what I can best describe an "Solid Cemfort,"
