Transpiration—We are pleased to see Mrs. Mekinner home again after spending five weeks in Toronto; also pleased to see her daughter and grandson Mrs.
Hooper and Gerdon, accompany her home......Mr. Wm Channon accompanied with others have gone to England with a cas load of cavile.

A woman never really knows the meaning of happiness and content until the is the mother of a hashing, happy child. The health of the child depends on the health of the mother, both before and after birth. Most all of woman's weakness and particularly the weakness that most strongly influences the health of children, comes from some derangement or disease of the distinctly feminic organs. Dr. Pierce's Favorite Prescription will cure trembles of this nature. It should be taken requisely by every woman during the be taken regularly by every woman during the entire period of gestation. It gives strength than "chance" in that."
