THE KING CLOTHIER OF THE MIDLAND DISTRICT.

CORNER KENT AND WILLIAM STREETS,

LINDSAY, ONT.

for food, because steam transport had brought the fields of all countries within a few days of the consumer in all parts of the world; because a harvest was progressing in some part of the world in every month of the year, and because wheat exporting nations had increased greatly in numbers. Did the stated could be a considerable increase in the sacreage devoted to spring wheat. This increased greatly in numbers. Did the stated conditions all exist they could in no material degree affect the world's supply of food unless the areas employed were hereby greatly increased. Only one of the three postules has any support, even apparent, in fact. It is true that the steamship and railway have lessoned the time required to transport food over great distances, but meither has added a particle to the productive power of given areas, and the proponents of these theories are evidently forgetful of the fact that before railiy forgetful of the fact that before rail-ways and steamships became the world's heat and lack of moleture. ways and steamships became the world's earriers little other wheat than that grown in the United States east of the Alleghanies was produced further from the importing consumer in Western Europe than across the narrow seas which separate Britain from the neighboring continent.

As to the vapid "stuff" about a continuous auccession of harvests it is

As to the vapid "stuff" about a continuous succession of harvests, it is enough to say that of some 2,500,000,000 fed green, to supplement pasture, and the whole world, quite 2,100,000,000 are harvested between the middle of June and the middle of September; 120,000,000 in Docember and January, and 260,000,000 in February and March, leaving a pitiable 10 to 30 millions to be harvested in the remainder of the year, while of this latter quantity rarely does a single bushel enter commercial channels.—

From "Frosperity Present and Future" by C. Wood Davis, in Self Culture for September. As to the vapit "stuff" about a constitution and short, and the grain apt to be light.

In the was excession of barveste, it is country to the waste world, quite 2,100,000,000 are harvested between the middle of September; 120,000,000 in December and January, and 230,000,000 in Pebruary and 230,000,000 in Peb

year and the average for the period 1882.

37 The mean average of temperature during the three months, May-July, was 63 To over two degrees more than the average, while the rainfail for the same period was only 6.36 inches as compared with the normal precipitation of 8.33 These features reached their climax in July, when with a temperature nearly three degrees above the normal there was a rainfail of only 1.11 inches—the average for the sixteen years being 2.63. The precipitation of May was about half an in some parts, have sustained a good deal have yet been reconstruction.

The Canadian Pacific, Montreal and Ottawa

THESUCCESSION OF HARVESTS inch below the average, and that of June, normal. These figures hardly give a fair idea as to the extremity of the drouth in many localities, while owing to the uncertainty of the trouble of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a to the extremity of the drouth in many localities, while owing to the uncertainty of the drouth in many localities, while owing to the uncertainty of the drouth in many localities, while owing to the uncertainty of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a to the extremity of the drouth in many localities, while owing to the uncertainty of the curcuito, and the yield as a whole of the curcuito, and the yield as a whole of the curcuito, and the yield as a to the extremity of the drouth in many localities, while owing to the uncertainty of the curcuito, and the yield as a whole of the curcuito, and the yield as a to the extremity of the drouth in many localities, while owing to the uncertainty of the curcuito, and the yield as a whole of the curcuito, and the yield as a to the extremity of the drouth in many localities, while owing to the uncertainty of the curcuito, and the yield as a to the extremity of the drouth in many localities, while owing to the uncertainty of the curcuito, and the curcuito, and the curcuito, and the property of in the curcuito.

In the below the aver

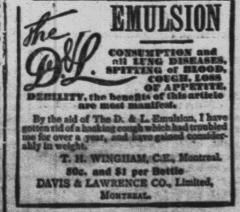

General Jaudenes, ad interim Governor of the Philippine Islands, reclying to the Government's request for information as to the true situation of affairs in the Archipelago, replied that to assure the re-establithment of Spanish covereignity over the island would require a permanent army of sixty thousand men, a fleet and endiese quantities of material.

Last Saturday night, Sept. 3, large numbers of posters were circulated around Havana and fastened at street corners, exhorting the Spanish coldrer to return to Spain, unless they were first paid in full all that was due them. Many have not been paid for 15 months, and they fully realize how hopeises their case is if they return home, there to await case is if they return home, there the result of the dissatisfaction of the troops, who feel that they have been deceived and betrayed to the Spanish Government.

Laber day was a gale day in Buffale. The labor organizations turned out in parade, in which it was estimated 8,000 men participated. In the meantime the members of the 65th Regiment, returning home from Camp Alger, about a thousand in all, had arrived at the New York Control depot. The last column of the labor parade had scarcely passed when the head of the column eccorting the 65th turned into Hain street, and passed slowing up the street between demonstrations of wildly cheering people and handsomely decorated stores.

The Canadian Pacifia, Montreal and Ottawa

The constitution and reports for the past two years of the Home for the Aged have been printed in pamplet form, and can be had on application to the secretary, Mrs. E, E.
