The Modera dollath of the Fenelon Palle Gazette Gives a Talk on Sulphur.

Sie. I must ask rour ferbearance for treating with a subject foreign to the one I started out on, but circumstances alter cases, and when a matter is forced on a man it is imperative for him to meet it with his opponent's own weapons. An eye for an eye and a tooth for a tooth is an old and hackneyed phrase but one frequently accepted in all its fullness. Doubtless but you have seen the production of that specimen of a probable 100 ibs avoirdupois who goes by the nomenclature of editor inchief of that sheet with patent inside pages and known as the Fenelon Falls Gazette. Many have been pursued and slandered by chief of that sheet with patent hande and known as the Fenelon Falls Gazette. Many have been pursued and slandered by this fellow who has characteristics of the sleath hound and annanias proclivities which render him at once a synthetical monstresity. This hero of some questionable episodes and cymeal writings bobs up screnely now to try and describe the thoracutic action of sulphur and he probably smells the fumes (although not yet dead). However he endeavors to describe its physiological effect but does not say anything of its compound chemical action, something he ought to know all about. He evidently understands that it is capable of combustion and that a blending of it with charcoal and nitrate of potach forms that powerful and useful agent known as gunpowder, and I presume that he understands the efficacy and power of this explosive. Moreover he likely had some other man in his mind (whom he knows quite well) when he was trying to teil where I excelled and it must be adtell where I excelled and it must be admitted that his efforts at description of mitted that his efforts at description of that personage were quite clear. He had better just now devote his time in an endeavor to get back the trade to the fazette office that he has lost and in renovating things in general down there as matters seem to be at low cob at that eauctum. I see that the electric light has been cut off as it paid no revenue there and his staff have asked the job of taking care of the skating rink. This job consists in purping and carrying water, scraping and purping and carrying water, scraping and aweeping ice, shovelling snow, making fires and some other minor duties I do not know what the senior member of the stail (the one great mighty and novel discourser of the Queen's English) intends doing besides running the famous local weekly ione half of which is printed in Toronto) but as he is of an inventive turn of mind, he possibly may hatch something new out of his patent hen egg, probably start a manufactory, turn out wooden hen eggs by water power and sell them for canon balls. The hypothet is of opinion being ongs by water power and sentiment of the non-balls. The hypothesis of opinion being that some such industry might be about as accessfully run by him as a local newspaper.

Local and General.

The Whitby, Ont., winter fair will be

Exactly so. Subscribers can materially and same town winnin a rew days. At Francis Williard's face, and with it went assist publishers to meet the demand for last the postal authorities shut down and one of the bravest, truest souls of the prepayment of postal rates by being

A gentleman advertised for a clerk who could be a confidence and who had been some years in his last place. He was answered by a person who had been for a number of years a prisoner in Newgat prison, and who therefore possessed each

of the required qualifications. From now antil New Year's our readers should carefully examine the advertising columns of THE WARDER, as merchants and others who want your eastern for the holiday season take that means of inviting you to call and see what they have bought specially for the occasion.

There are two hundred cases of small-

metely connected. Politry raises of miles section are fortunate to having out miles in their mides where they can get this out flour at first cost.

Mr. W. C. McDonald, the millionaire tobacco manufacturer, of Montreal, seems to make money easily and rapidly, but he is not mean with it. He has already given several large gifts to McGill college and other deserving institutions. He is establishing to connection with the college a mining and commercial department, furnishing the cost not only of the building, but of the full equipment. This valuable addition to the college is to be formally opened by the Governor General, on the 20th of this month, and it is said Me. McDonald is to be knighted on that

In view of the evidence given by a number of young men at the Penton trial at Napages last week, as to the manner at Napage last week, as to the manner in which they spent their evenings and leisure hours, Judge Forguson, the presiding judge, made the statement that the majority of the young men of the present seemed to spend their time in frivolity and pleasure-seeking, whereas, when he was young, a great number devoted their leisure to reading and study thereby large leisure to reading and study, thereby laying the foundations for future prominence and usefulness. This is a serious indictment of the young men of to day. What do they say to it?

Two or three weeks ago nine tramps were arrested in Oshawa on a charge of housebreaking. Lest week Judge Dartinell sentenced five of them to one year's imprisonment, two were acquisted and the other two will come up again. Among those convicted was a man named Gardiner, who had \$37 when arrested. On hearing the sentence the good-hearted chap ordered the constable who had charge

FRIDAY, DECEMBER 16, 1898.

TRIDAY, DECEMBER 16, 1898.

Ontario Times.

Peterborough Examiner, Dec. 9th:

A number of local horsemen is conversation with a reporter last evening stated that it was their intention to boom a winter race meet in Peterborough this season. Towns like Napanee, Brighton and Lindsay hold successful races every winter, which attracted large number of horsemen, and they could see no reason why Peterborough, the banner town of the province, could not provide a programme of ice races that would draw the leading flore of the country. Winter races have been held in Peterborough in past years, and though not as successful as the promoters anticipated, still it went to prove that with proper management and with a united effort on the part of all horsemen, a series of successful meets could be held.

of the races that would draw the leading fiters of the country. Winter races have been held in Peterborough in past years, and shough not as successful et the promotere anticipated, still it wont to prove that with proper management and with a united effort on the part of all horsemen, a series of successful meets could be held. The gentiemen interested turther stated that a meeting of enthusiasts would be held at an early date, when steps would be taken to arrange the preliminaries.

Ohaww Vindicator: We frequently hear of the prosperity of these who go into new countries to seek their fortunes, but it is saidem, if ever, we flad anyone witing to the press of the discouragements to be found there. In a lenter received at this office this week we make a few extracts. The letter was written by a former resident of these parts, but now residing in one of the territories:

"We are having a hard time here this year, 75 acres of wheatin and only threached doubling, twine, taxes and all other expenses to pay, 8 in the family to be this year, there are oaly a few tavored localities. Late day pering, half the grain did not come up, one half that did was chaked out with weeds. We did not get our supply of rain till harvest time, which has been very damaging to the prespin some localities, but the land is in good shape for a cop another year under the most favorable conditions.

The article to the World the other day dealing with the faktre in the state of Maine, who live on postage stamps taken from children all over the country by well-bailed advertisements, is belong extended that a meeting of the proper in some localities, but the land there were no wings to earry un there, and there was nothing to do but come not into the country to the country to the country to the series of the state of the field, the directory and annual report prepared for the press, the previous difference of the provious country by well-bailed advertisements, is belong extended to the provious difference of the provious difference of the provi

Inder the most favorable conditions.

The article in the World the other day dealing with the fakirs in the state of Maine, who live on postage stamps taken from children all over the country by well-baited advertisements, is being extensively copied and commented on. It seems these fakirs have, some of them, located in Canada, and are promising to give watches to children who will sell so many of their and puttons or other nick. many of their cuff buttons or other nickknaks. The child sends the stamps, peeters friends to buy the buttons, sends the fakir in all two deliars in stamps or times a warning herald prepares for the coming change and sometimes it is as in the fakir in all two deliars in stamps or held on Saturday, Dec. 24th.

Actions speak louder than words, it has been said, but perhaps they don't speak nearly so often.

The fakir makes a clear dollar out of the child. Parents should be on their guard the days of Noan—and they allow hos money, for twenty cents worth of buttons, women lovers frances Willard had won, the fakir makes a clear dollar out of the child. Parents should be on their guard the ties were gently broken. They knew Fencion Falls people are still talking of inducing the Rethbun people to locate their Lindeay braceh in North Victoria's hustleg little town.

Military Notes

The permanent intantry schools of Toronto, London, St. John and Frederton, N. B., are to be concentrated at O.taws next summer under command of Lieut. Ool, Otter for a course of training by Major General Hutton. It will last about two months.

English as She Rhymes.

A farmer's boy, starting to plough,
Once harnessed an ox with a cough;
But the farmer came out,
With a furious shout,
And told him he didn't know hough.

In a manner exceedingly rough
He proceeded to bluster and blough;
He scolded and scowled,
He raved and he howled,
And declared he'd have none of such stough.

At length, with a secoul and a cough,
He dragged the poor boy to the trough,
And ducking him in
Till wet to his chin,
Discharged him and ordered him ough.

And now my short story is through-And levill not assert that its trough,
But it's chiefly designed
To impress on your mind
What wonders our spelling can dough.

And I hope you will grant that although It may not be the smoothest in flough,
It has a swered it's end
It it only shall tend
To prove what I meant it to shough.
—St. Nicholas.

The above was not written by Gough But by a man a little bit ough,
For though sells men's clothes

As everyone knews
At the first corner east of the Postough.

PURE BLOOD is LIFE Paine's Celery Compound the Only Hope of all Suffering

from Blood Diseases. The Great Medicine Quickly Ex-

pels all Poisons and Renews the System. Serofu's is one of the most terrible and

wasting of blood diseases; it usually develops in early life, and in the majority of cases is hereditary. Many medical men contend that serofule is the parent of consumption.

When the blood is thin impoverished, im pure and foul, its poisoned condition shows up clearly in pimples, sores, tumorr, abscesses, biotches, erysipelas, cancer, white swellings, sore eyes, felons, boils, salt rheum, ecz ma,

Pure blood represents life; foul and poisoned blood means suffering and death. Strength, section and the health of all parts of the hu man system are dependent upon the blocd.

The only true way to cleanse and enrich the blood is to use Patce's Colery Compound. Its vitalizing and purifying effect upon the blood of old and young is magical. The most virulent blood diseases quickly visid to its healing and cleaning power. No other medicine known to man has ever achieved the victories cover obstinate blood troubles that Paine's over obstinate blood troubles that Paine's Celesy Compound has accomplished.

If you have a trace or symptom of blood

If you have a trace or symptom of blood disease, your life is truly in danger. It you are anxiously seeking for a cure, have a care how you make use of the widely advertised "blood purifiers;" in the great majurity of instances they are frauds. Ask your druggist for Paine's Celery Compound, the only medicine that can make your blood and firsh clean

G. WOODS,

Dran Str.,—I have much pleasure in stating that the Gurney Orford Hot Water System which you set up in my house in the autumn of 1894 was fully what you represented it to be, and gave entire estimation. There was no dust, no smoke, no gas, no leakage, and the air seemed pleasant and agreeable to thou. There was no condensate in my house during the entire winter. Notwithstanding the severity breaths, so that no one had a cough in my house during the entire winter. Notwithstanding the severity heathst winter our house was so comfortable that we had to go outside to find if the day was cold, while the quantity of coal consumed was only a little more than we had burned in former winters in one large coal quantity of coal consumed was only a little more than we had burned in former winters in one large coal severity with less rooms to be heated. The Furnace was easily managed, and with ordinary one the temperature of the house could be kept at any degree desired. I can heatily recommend this system of hosting ature of the house could be kept at any degree desired. I can heatily recommend this system of hosting ature of the house could be kept at any degree desired. I can heatily recommend this system of hosting to any one who during our Canadian winter desires to enjoy what I can best describe as "Solid Comfort,"

Give W. G. WOODS the contract of making your life a comfort this winter.
